<b>Preface</b>	<b>1</b>
<b>I Network Science in R</b>	<b>7</b>
<b>1 Network Perspectives</b>	<b>9</b>
1.1 Introduction . . . . .	9
1.2 Network approaches . . . . .	11
1.3 Network models . . . . .	12
1.4 Network theories . . . . .	17
1.5 Network approaches, models, and theories . . . . .	19
1.6 Conclusion . . . . .	23
1.7 Exercises . . . . .	23
<b>2 Short Introduction to R</b>	<b>29</b>
2.1 Introduction . . . . .	29
2.2 The R environment . . . . .	29
2.3 Basics of R programming . . . . .	31
2.4 Basic R data structures . . . . .	34
2.5 Functions and packages . . . . .	36
2.6 Advanced object structures . . . . .	38
2.7 Working with data in R . . . . .	40
2.8 Conclusion . . . . .	42
2.9 Exercises . . . . .	43
<b>3 Descriptive Analysis of Network Structures</b>	<b>45</b>
3.1 Introduction . . . . .	45
3.2 Complex systems and network science . . . . .	46
3.3 From network science to network psychometrics . . . . .	48
3.4 Constructing networks . . . . .	49
3.5 Analyzing networks . . . . .	50
3.6 <i>Lord of the Rings</i> example . . . . .	61
3.7 Conclusion . . . . .	62
3.8 Exercises . . . . .	63
<b>4 Constructing and Drawing Networks in <i>qgraph</i></b>	<b>67</b>
4.1 Introduction . . . . .	67
4.2 <i>qgraph</i> functionality . . . . .	67

4.3	<i>qgraph</i> interpretation . . . . .	72
4.4	Saving <i>qgraph</i> networks . . . . .	75
4.5	Descriptive analysis of networks using <i>qgraph</i> . . . . .	75
4.6	Conclusion . . . . .	76
4.7	Exercises . . . . .	77
<b>5</b>	<b>Association and Conditional Independence</b>	<b>79</b>
5.1	Introduction . . . . .	79
5.2	Independence and dependence . . . . .	80
5.3	Conditional independence . . . . .	83
5.4	Testing for statistical dependencies . . . . .	84
5.5	Where do conditional dependencies come from? . . . . .	86
5.6	Conclusion . . . . .	88
5.7	Exercises . . . . .	88
<b>II</b>	<b>Estimating Undirected Network Models</b>	<b>91</b>
<b>6</b>	<b>Pairwise Markov Random Fields</b>	<b>93</b>
6.1	Introduction . . . . .	93
6.2	Pairwise Markov random fields . . . . .	94
6.3	Interpreting pairwise Markov random fields . . . . .	95
6.4	Estimating saturated network models . . . . .	102
6.5	Conclusion . . . . .	107
6.6	Exercises . . . . .	107
<b>7</b>	<b>Estimating Network Structures using Model Selection</b>	<b>111</b>
7.1	Introduction . . . . .	111
7.2	Comparing multivariate statistical models . . . . .	112
7.3	Thresholding & pruning . . . . .	115
7.4	Model search . . . . .	118
7.5	Regularization . . . . .	120
7.6	Recommendations for applied researchers . . . . .	123
7.7	Exercises . . . . .	129
<b>8</b>	<b>Network Stability, Comparison, and Replicability</b>	<b>133</b>
8.1	Introduction . . . . .	133
8.2	Stability and accuracy in one sample . . . . .	135
8.3	Analyzing and comparing multiple samples . . . . .	140
8.4	Conclusion . . . . .	150
8.5	Exercises . . . . .	150
<b>III</b>	<b>Network Models for Longitudinal Data</b>	<b>155</b>
<b>9</b>	<b>Longitudinal Design Choices: Relating Data to Analysis</b>	<b>157</b>
9.1	Introduction . . . . .	157

9.2	Data designs . . . . .	158
9.3	Analysis designs . . . . .	160
9.4	Differences between data and analysis . . . . .	162
9.5	Separating contemporaneous and temporal effects . . . . .	166
9.6	Conclusion . . . . .	167
9.7	Exercises . . . . .	168
<b>10</b>	<b>Network Estimation from Time Series and Panel Data</b>	<b>169</b>
10.1	Introduction . . . . .	169
10.2	Graphical vector auto-regression . . . . .	170
10.3	$N = 1$ estimation: personalized network models . . . . .	171
10.4	$N > 1$ estimation: multi-level estimation . . . . .	176
10.5	Challenges to GVAR estimation . . . . .	182
10.6	Conclusion . . . . .	188
10.7	Exercises . . . . .	188
<b>11</b>	<b>Modeling Change in Networks</b>	<b>193</b>
11.1	Introduction . . . . .	193
11.2	Time-varying network models . . . . .	195
11.3	Estimating time-varying network models . . . . .	197
11.4	Mood measurements example . . . . .	201
11.5	Conclusion . . . . .	206
11.6	Exercises . . . . .	206
<b>IV</b>	<b>Theory and Causality</b>	<b>211</b>
<b>12</b>	<b>Causal Inference</b>	<b>213</b>
12.1	Introduction . . . . .	213
12.2	A language for expressing causal relations . . . . .	214
12.3	Statistical and causal relations . . . . .	216
12.4	Structural causal models . . . . .	224
12.5	Conclusion . . . . .	228
12.6	Exercises . . . . .	228
<b>13</b>	<b>Idealized Modeling of Psychological Dynamics</b>	<b>233</b>
13.1	Introduction . . . . .	233
13.2	Basics of the Ising model . . . . .	234
13.3	Idealized simulations of attitude dynamics . . . . .	236
13.4	Modeling phenomena in intelligence research . . . . .	239
13.5	Conclusion . . . . .	243
13.6	Exercises . . . . .	243
<b>Index</b>		<b>247</b>
