Section I Special Issue

Current Issues in Asia-Pacific Engineering Education

Guest Editor

Pao-Nan Chou – National Pingtung University of Science and Technology, Taiwan

Editorial	279
<i>Ahmad Ibrahim</i>	
Guest Editorial – Current Issues in Asia-Pacific Engineering Education	280–281
<i>Pao-Nan Chou</i>	
English Medium Instruction for Electrical Engineering Education: A Focus on Physical Computing	282–288
<i>Ai-Jou Pan, Chin-Feng Lai, Chun-Ch Hsu and Pao-Nan Chou</i>	
The Effectiveness of using QUIZIZZ Application in Teaching in a Large Engineering Undergraduate Class	289–300
<i>Atthaphon Ariyarat, Piyapong Suwanno, Rattanaporn Kasemsri, Kestsirin Theerathitichaipa, Manlika Seefong and Fareeda Aryuyo</i>	
Novel Course Design and Assessment of Electrical Engineering Capstone Project	301–317
<i>Guichen Zhang, Jinghua Zhou, Shuang Xu and Xiaowei Zhang</i>	
Status and Consulting Needs of K-12 Maker Education at Korean National Schools	318–331
<i>Hyuksoo Kwon and Dongkuk Lee</i>	
Investigating Graduates' Feedback for the Implementation of Project-Based Learning in Electrical Engineering Undergraduate Program	332–341
<i>Jinsong Tao, Umair Bacha, Stephen C McClure, Cunhui Zhang and Xishan Wen</i>	
Introducing Engineering to High School Curriculum: Effects of an Introductory Engineering Program	342–352
<i>Joosoon Mo and Hyuksoo Kwon</i>	
Institutionalizing Engineering Education Research (EER) in China under the Context of New Engineering Education: Departments, Programs, and Research Agenda	353–368
<i>Lina Zheng and Siqing Wei</i>	
Outcome Based Approach Applied to a Mechanical Engineering Course to Advance the Teaching-Learning Processes	369–375
<i>Rayapati Subbarao</i>	
A Bibliometric Analysis of Project-Based Learning Research in and Outside Mainland China	376–396
<i>Shuang Lin, Zhengtang Tan and Wenping Guo</i>	
Integrating Social Network Analysis with Cooperative Learning in Programming Courses: A Case Study	397–408
<i>Wen-Chih Chang</i>	
Enhancing Students' Learning Performance by Combining Flipped Learning and Online Formative Assessment Platform	409–419
<i>Shu-Chen Cheng, Yu-Ping Cheng and Yueh-Min Huang</i>	
An Autoethnography Study of Using Critical Pedagogy to Teach an Introductory Course of Engineering Education to Chinese Graduate Students Majoring in Education	420–428
<i>Xinrui Xu</i>	

Section II

Contributions in: Manufacturing, Curriculum Design, K-12 Education, Cross-Disciplinary Teams, Control Systems, Remote Experimentation, Newly-Hired Engineers, Aerospace Engineering, Project-Based Learning, Software Analytics, First-Year Students, Student Success

Use of a Delphi Research Process for Designing, Developing, and Assessing the Importance of Contemporary Advanced Manufacturing Curriculum	429–440
<i>Gisele Ragusa, Satyandra K. Gupta, Qiang Huang, Yong Chen, Azad M. Madni and Sven Koenig, Lilian Leung</i>	

Predicting Engineering Integration in K-12 from the Perspective of Pre-Service Teachers	441–452
<i>Pilar Pazos, Francisco Cima, Jennifer Kidd, Kristie Gutierrez, Dorothy Faulkner, Minjung Lee, Krishna Kaipa and Orlando Ayala</i>	
Teaching System Identification by Remote Access to a Networked Control System Laboratory	453–463
<i>Tangming Guan, Guo-Ping Liu and Wenshan Hu</i>	
Actions Recent Engineering Graduates Undertake to Integrate into the Workplace – A Case Study from the Aerospace Industry	464–475
<i>Benjamin Ahn, Yun Dong and Secil Akinci-Ceylan</i>	
Applying Project-Based Learning to Teach Software Analytics and Best Practices in Data Science	476–487
<i>Silverio Martínez-Fernández, Cristina Gómez and Valentina Lenarduzzi</i>	
Investigating the Relationship between the Initial English Reading Skills of Newly Enrolled Engineering Undergraduates and their Academic Success – A Case Study	488–496
<i>Avshalom Danoch, Roman Michaelan, Revital Danoch and Neta Kela-Madar</i>	
Guide for Authors	497
