

CONTENTS

PREFACE	v-vi
<i>Chapter</i>	
1. INTRODUCTION	1-20
1. General Problems of the Ageing Process, 1	
2. The Locomotor System in Old Age, 4	
2. OLD-AGE CHANGES IN THE MOTONEURONS	21-62
1. Morphological Changes, 21	
a. The nerve-cell, 21	
b. The nerve-fibre, 33	
2. Biochemical Changes, 48	
3. OLD-AGE CHANGES IN THE MUSCLE	63-113
1. Morphological Changes, 63	
2. Biochemical Changes, 80	
3. Physiological Changes, 96	
4. Motor Performance in Old Age, 106	
4. THE SPECIFICITY OF SENILE MUSCLE ATROPHY	114-132
1. Types of Muscle Atrophy, 114	
2. Nervous and Hormonal Mechanisms in Development of Senile Muscle Atrophy, 121	
3. Complex and Specific Features of Senile Muscle Atrophy, 129	

5. INVOLUTION AND ATROPHY IN AGEING	133-141
1. General Mechanisms in 'Involution', 133	
2. Denervation Changes in Early Ontogenesis, 137	
3. Muscle Atrophy in Ontogenetic Involution, 138	
4. General and Specific Aspects of Senile Involution and Muscle Atrophy, 140	
6. MOTOR CAPACITIES AND ADAPTATION IN THE NEUROMUSCULAR SYSTEM IN OLD AGE	142-151
1. Fitness in Old Age and the Neuromuscular System, 142	
2. Evidence for Adaptation in the Neuromuscular System, 146	
3. Capacity and Limitations of Adaptation, 151	
7. NATURE OF AGEING IN THE NEURO- MUSCULAR SYSTEM	152-168
1. General and Specific Aspects in Ageing of the Neuromuscular System, 152	
2. Life Span, Environment, and the 'Prevention' of Ageing, 162
