

CONTENTS

- BRÄNDLE R., POKORNÝ J., KVĚT J. & ČÍŽKOVÁ H.: Wetland plants as a subject of interdisciplinary research [7]
- CRAWFORD R.M.M.: Whole plant adaptations to fluctuating water tables [13]
- ARMSTRONG W., ARMSTRONG J. & BECKETT P.M.: Pressurised aeration in wetland macrophytes: some theoretical aspects of humidity-induced convection and thermal transpiration [31]
- WEBER M. & BRÄNDLE R.: Some aspects of the extreme anoxia tolerance of the sweet flag, *Acorus calamus* L. [43]
- VOESENEK L.A.C.J., BANGA M., RIJNDERS J.G.H.M., VISSER E.J.W. & BLOM C.W.P.M.: Hormone sensitivity and plant adaptations to flooding [53]
- SCHLÜTER U., ALBRECHT G. & WIEDENROTH E.M.: Content of water soluble carbohydrates under oxygen deprivation in plants with different flooding tolerance [63]
- BIEMELT S., ALBRECHT G. & WIEDENROTH E.M.: The effect of post-hypoxia on roots in *Senecio* and *Myosotis* species related to the glutathione system [71]
- ČÍŽKOVÁ H., STRAND J. & LUKAVSKÁ J.: Factors associated with reed decline in a eutrophic fishpond, Rožmberk (South Bohemia, Czech Republic) [79]
- REA N.: Water levels and *Phragmites*: decline from lack of regeneration or dieback from shoot death [91]
- WEISNER S.E.B. & STRAND J.A.: Rhizome architecture in *Phragmites australis* in relation to water depth: implications for within-plant oxygen transport distances [97]
- KUBÍN P. & MELZER A.: Does ammonium affect accumulation of starch in rhizomes of *Phragmites australis* (CAV.) TRIN. ex STEUD.? [105]
- ČÍŽKOVÁ H., LUKAVSKÁ J., PŘIBÁŇ K., KOPECKÝ J. & BRABCOVÁ H.: Carbohydrate levels in rhizomes of *Phragmites australis* at an oligotrophic and eutrophic sites: a preliminary study [117]
- WATRILBOVÁ O. & PECHÁČKOVÁ A.: Effect of nitrogen over-supply on root structure of common reed [125]
- ARMSTRONG J., ARMSTRONG W., WU ZENBIN & AFREEN-ZOBAYED F.: A role for mycorrhizas in the *Phragmites* die-back syndrome? [133]
- BRÄNDLE R., RÜEGSEGGER A., BRUNOLD C. & BRÄNDLE R.: Sulphide utilization and mycorrhizas in hypoxic roots and rhizomes of common reed (*Phragmites australis*) [149]
- STRKOVÁ S., VOSÁTKA M. & POKORNÝ J.: Root symbioses of *Alnus glutinosa* and their possible role in alder decline: a preliminary study [159]
