1. ACCEPTANCE SAMPLING WHEN THE REMAINDER OF REJECTED LOTS IS INSPECTED	9
1.1. Introduction	9
1.2. LTPD plans by variables and attributes	9
1.3. Calculation of the LTPD plans by variables and attributes	12
1.4. Tables of the LTPD plans by variables	16
2. TABLES OF THE LTPD SINGLE SAMPLING INSPECTION PLANS BY VARIABLES	19
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 0.5\%$	20
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 1\%$	65
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 2\%$	100
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 3\%$	126
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 4\%$	148
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 5\%$	167
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 7\%$	184
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 10\%$	198
Tab.I Sample size n corresponding to lot size N and producer's risk in % for $P_t = 15\%$	209
Tab.II Critical value k corresponding to sample size n (consumer's risk 10%)	218
