

Table of contents

Summary	7
1. WHAT IS BIBLIOGRAPHICAL DATA?	9
1.1. Producing bibliodata	9
1.2. Using bibliodata	10
1.3. Processing bibliodata	11
1.4. The need for a contemporary bibliodata landscape analysis	12
1.5. Bibliography	13
2. MAPPING THE CURRENT BIBLIODATA LANDSCAPE	15
2.1. Main categories of bibliodata stakeholders	15
2.2. Dimensions of the contemporary bibliodata landscape	19
2.2.1. Understanding the public/private dimension	20
2.2.1.1. The public/private division and interdependence	20
2.2.1.2. Divisions inside stakeholder groups	23
2.2.2. Understanding the production/use dimension	25
2.2.2.1. Continuous bibliodata reuse across different services	26
2.2.2.2. Reconfiguring traditional bibliodata production and use	28
2.2.2.3. Inefficiencies in the reuse ecosystem	30
2.3. Overarching trends in the bibliodata ecosystem:	
The data influx, automation, and data-driven research	32
2.4. Bibliography	34
3. KEY CHALLENGES AND OPPORTUNITIES FOR PUBLIC BIBLIODATA STAKEHOLDERS	39
3.1. Infrastructure	39
3.2. Open science	42
3.3. Data management lifecycle: Creation and documentation	44
3.4. Bibliography	47
4. CONCLUSIONS: TOWARDS JOINT AGENDAS FOR PUBLIC BIBLIODATA STAKEHOLDERS	49
Acronyms	52
