Preface

xvii

1. Particles and microbiota: interaction to death or resilience?	1
Djouhar Souak, Ségolène Depayras, Mohamed Zommiti, Nathalie Connil, Sandra Leblanc, Nicole Orange, Marc Feuilleley and Cécile Duclairoir Poc	
1.1 Introduction	1
1.2 Human microbiota: various specific microbiota	2
1.2.1 Difference between microbiota and microbiome	4
1.2.2 Characteristics of microbiota related to its habitat	5
1.3 Experimental strategies to evaluate the responses of microbiota to environmental factors	5
1.3.1 From the human scale to the microorganism	6
1.3.2 Experimental models	7
1.4 Human exposure to nanoparticles	10
1.4.1 Various nanoparticles	10
1.4.2 Usual exposure of human to nanoparticles (except for therapeutics purpose)	11
1.4.3 General traits of microbial response to nanoparticles exposition	11
1.4.4 Experimental bias through microbial exposure to nanoparticles	15
1.5 Gut microbiota and nanoparticles	15
1.5.1 The intestinal microbiota	15
1.5.2 Nanoparticles used in foods and human exposure	17
1.5.3 Impacts of silver nanoparticles on gut microbiota	17
1.5.4 Impacts of TiO ₂ nanoparticles on gut microbiota	18
1.5.5 Impacts of SiO ₂ nanoparticles on gut microbiota	18
1.5.6 Impacts of ZnO nanoparticles on gut microbiota	18
1.6 Skin microbiota and nanoparticles	20
1.7 Oral microbiota and nanoparticles	24
1.8 Airway microbiota and nanoparticles	28
1.9 Vaginal microbiota and nanoparticles	30
1.10 Conclusion and perspectives	33
References	34

2. Current and future prospects of nanoparticles to combat bacterial infections 49

Dinesh Prasad Gond, Atul Srivastava, Subhashini, Anjney Sharma and Kumari Mrinalini

2.1	Introduction	49
2.1.1	Bacterial infection	49
2.1.2	Nanoparticles as antibacterial agents	50
2.2	Pharmacodynamic properties of nanoparticles exhibiting antibacterial activity	51
2.3	Nanomaterials mechanisms to mitigate bacterial infection	52
2.4	Application of nanoparticles	54
2.4.1	Antibacterial coating on implantable devices	54
2.4.2	Wound dressing	54
2.4.3	Bone cement	54
2.4.4	Dental materials	55
2.4.5	Antibiotic delivery system	55
2.5	Different classes of nanoparticles currently used for antibacterial application	55
2.5.1	Metallic nanoparticles	56
2.5.2	Carbon nanoparticles	58
2.5.3	Polymeric nanoparticles	59
2.5.4	Nanocomposites	61
2.5.5	Nanoemulsions	61
2.5.6	Smart materials	62
2.5.7	Nanomaterials conjugated with Antimicrobial Peptides	62
2.6	Limitation of nanoparticles application against bacterial infection and their future prospects	62
2.7	Conclusion	63
	Conflict of Interest	63
	References	63

3. Prospects of biosynthesized nanoparticles in treating pharmaceutical wastewater in relation to human health 75

Karishma Das Purkayastha and Nayanmoni Gogoi

3.1	Introduction	75
3.2	Biological synthesis of single metallic and bimetallic nanoparticles	77
3.2.1	Single metallic or monometallic nanoparticles	78
3.2.2	Bimetallic nanoparticles	79
3.2.3	Plant extracts as reducing and capping agents	83
3.2.4	Stabilizers	86

3.2.5	Kinetics of synthesis	87
3.2.6	Characterization	89
3.2.7	Storage and sustainable use	89
3.3	Pharmaceutical waste	90
3.3.1	Antibiotics and their classes	91
3.3.2	Fate of antibiotics in the ecosystem	91
3.3.3	Antibiotic-resistant bacteria and human health	97
3.3.4	Antibiotic-resistant genes	99
3.3.5	Multidrug resistance	100
3.4	Various strategies to treat pharmaceutical wastes	104
3.4.1	Conventional methods	104
3.4.2	Modern methods	107
3.4.3	Combined methods	108
3.5	Conclusion and future prospects	112
	References	112
4.	Role of plant and microbe-derived nanoparticles in medical waste management	121
	Jugal Barman, Kingshuk Panda, Atreyee Sur Roy Chowdhury, Rahul Deka and Punuri Jayasekhar Babu	
4.1	Introduction	121
4.2	Plant-mediated synthesis of nanoparticles	122
4.2.1	Thallophytes (algae)	123
4.2.2	Bryophytes	124
4.2.3	Pteridophytes	125
4.2.4	Gymnosperms	125
4.2.5	Angiosperms (flowering plants)	126
4.3	Microbes-mediated synthesis of nanoparticles	128
4.3.1	Bacterial mode of nanoparticle synthesis	132
4.3.2	Fungal mode of nanoparticle synthesis	133
4.3.3	Yeast mode of nanoparticle synthesis	134
4.3.4	Viral mode of nanoparticle synthesis	135
4.4	Application of nanoparticles in medical waste remediation	136
4.4.1	Nanoparticle-based treatment of virus and microbial contamination	136
4.4.2	Bioremediation of solid medical waste	141
4.4.3	Nanomaterial-based strategies for cleaning radioactive wastes	145
4.5	Environmental issues and challenges associated with nanoparticle-mediated cleanup/remediation	148
4.6	Future perspective	151

4.7 Conclusion	152
References	152
5. Nanotechnology: a new strategy to combat bacterial infections and antibiotic resistant bacteria	167
Rabiya Tabbassum Khan and Shafaq Rasool	
5.1 Introduction	167
5.2 Antibiotics, antibiotic resistance, and its epidemiology	168
5.2.1 History of antibiotics	169
5.2.2 Classes of antibiotics and their mode of action	169
5.2.3 Epidemiology of antibiotic resistance	175
5.3 Introduction to nanotechnology	176
5.3.1 Types of nanoparticles	177
5.3.2 Synthesis of nanomaterials	179
5.4 Role of nanotechnology in combating antibiotic resistance	179
5.4.1 Use of nanoparticles as antimicrobials	180
5.4.2 Multidrug delivery using nanoparticles	184
5.4.3 Prevention of biofilm formation	184
5.5 Conclusion	186
Future prospects	186
References	187
6. Green synthesis of gold nanoparticles and their biomedical and healthcare applications	191
Punuri Jayasekhar Babu and Akriti Tirkey	
6.1 Nanotechnology	191
6.1.1 Concept of "nano" and comparison	192
6.2 Nanotechnology and its applications	193
6.3 Nanomaterials and its types	194
6.3.1 Gold nanoparticles	194
6.3.2 Synthesis of gold nanoparticles	196
6.3.3 Applications of gold nanoparticles	211
6.4 Conclusion and future prospective	219
References	220
7. Nanomedicines in cancer immunotherapy: challenges and opportunities	231
Sarang Tarteey	
7.1 Introduction	231

7.2	Nanomedicine	232
7.3	Nanoparticle therapeutics in cancer and its mode of action	234
7.3.1	Antigen presentation to immune cells	234
7.3.2	Promoting immunogenic cell death	238
7.3.3	Intracellular delivery of danger signals and nucleic acids	239
7.3.4	Targeting myeloid cells	239
7.4	Challenges in clinical translation	241
7.4.1	Precision-guided reproducible synthesis of nanoparticles	241
7.4.2	Evaluation and screening of nanoparticles	242
7.5	Conclusion	242
	References	243
8.	Recent applications of nanomedicine in lung disease	247
	Atul Srivastava, Mrinalini kumari, Dinesh Prasad Gond and Subhashini	
8.1	Introduction	247
8.2	Nanotechnology: an emerging revolution	248
8.2.1	Nanotechnology and its application	249
8.3	Pros and cons of nanotechnology	252
8.4	Nanomedicine: an approach for healthcare	253
8.4.1	Application of nanomedicine in the medical field	254
8.4.2	Challenges and perspectives of nanomedicines	254
8.5	Lungs as an organ for drug delivery	255
8.6	Nanocarriers for lung treatment	256
8.7	Common respiratory disease and nanomedicines as therapeutic	257
8.7.1	Chronic obstructive pulmonary disease	258
8.7.2	Bronchial asthma	259
8.7.3	COVID-19	260
8.7.4	Tuberculosis	261
8.7.5	Pneumonia	262
8.7.6	Lung cancer	262
8.8	Conclusion and future perspective of nanoparticles in lung disease	263
	References	263
9.	Role of nanotechnology in diagnosis and disease control with a focus on COVID-19 and future perspectives	269
	Md. Harun Al Rashid, Dhananjay Saha and Subhash C. Mandal	
9.1	Introduction	269
9.2	Nanoparticles	271
9.2.1	COVID-19 infections	271

9.2.2	Gene	271
9.2.3	Structure	272
9.2.4	Transmission	272
9.2.5	Entrance to body	273
9.2.6	Target organ	273
9.3	Pathogenesis of COVID-19	274
9.3.1	Potential management	274
9.3.2	Diagnosis	275
9.3.3	Vaccine for COVID-19	275
9.4	Nanomedicine therapy for COVID-19 infections	276
9.5	Applications of nanomedicine in diagnosing COVID-19	276
9.6	Nanotechnology: future approaches to challenge COVID-19	277
9.7	Conclusion	278
	Acknowledgments	279
	Conflict of interest	279
	Funding	279
	References	279
10.	Nanotechnology for the treatment of cancer: progress and challenges	285
	Mansavi Bhardwaj and Shafaq Rasool	
10.1	Background	285
10.2	Nanoparticle therapeutics in cancer treatment	287
10.2.1	Unique properties of nanoparticles	288
10.2.2	Types of nanoparticles used for cancer diagnosis and treatment	290
10.2.3	Challenges associated with cancer nanotechnology	298
10.3	Conclusion	301
10.4	Future perspectives	302
	References	303
11.	The role of chitosan-based nanoparticles to reduce obesity: a glimpse	309
	Subham Rakshit, Kalyanbrata Pal, Keshab Chandra Mondal and Suman Kumar Halder	
11.1	Introduction	309
11.2	Properties of nanoparticles	311
11.3	Chitosan nanoparticles and their applicative potential	311
11.4	Application of chitosan nanoparticles against obesity	313

11.4.1	Experimental evidence of antiobese activity of chitosan	313
11.4.2	Experimental evidence of use of chitosan nanoparticles as a carrier of antiobese drugs	316
11.5	Conclusion and future perspectives	327
	References	327
12.	Nanotechnology for the removal of pesticides hazardous to human health	333
	Fatima Abba, Javad M.B. Parambath, Sofian M. Kanan and Ahmed A. Mohamed	
12.1	Introduction	333
12.2	Pesticides	334
12.3	Removal routes of pesticides	336
12.3.1	Zeolites	336
12.4	Metal oxide nanoparticles	342
12.5	Zero-valent iron nanoparticles	345
12.6	Graphene-based substrates	349
12.7	Conclusion	352
	Acknowledgments	353
	References	353
13.	Immunomodulation through nanoparticles	363
	Ivan Aranha	
13.1	Introduction	363
13.2	The immune system	366
13.3	Nanotechnology in immune system modulation	368
13.4	Nanoparticles in innate immunity	370
13.4.1	The innate immune cells	370
13.4.2	Recognizing nanoparticles by innate immune cells	371
13.5	Nanoparticles in adaptive immunity	372
13.5.1	Nanoparticles targeting B cells	373
13.5.2	Nanoparticles targeting T cells	374
13.6	Immunomodulation properties of nanomaterials in vaccination	374
13.7	Conclusions	376
13.8	Future prospective	377
	Acknowledgment	378
	References	378

14. Role of nanoparticles in the treatment of human disease: a comprehensive review	381
Ruth Zomuansangi, Bhim Pratap Singh, Garima Singh, Zothanpuia, Prashant Kumar Singh, Jae Jun Song, Arun S Kharat, Purbhajyoti Deka and Mukesh Kumar Yadav	
14.1 Introduction	381
14.2 Classification of nanoparticles	383
14.3 Biological barriers that nanoparticles can overcome	388
14.4 Nanoparticles used in a drug delivery system	389
14.5 Nanoparticles and drug delivery	394
14.6 Nanoparticles in precision medicine	394
14.7 Future prospective of nanomedicine and drug delivery system	397
Acknowledgment	398
References	398
Index	405
