<b>Acknowledgements</b>	V
<b>Abbreviations</b>	XII
<b>Introduction</b>	1
Questions Guiding the Research	2
Structure of the Report	3
<b>One Describing Open Source and Free Software Communities</b>	5
1.1 Introduction	5
1.2 Popularity of Open Source and Free Software	6
1.3 Historical Development of Openness and Freedom	7
The origin of the Internet	8
Richard Stallman and free software	8
Berkeley Software Distribution	9
Linus Torvalds and Linux	11
The name ‘open source’	12
1.4 The Communities	12
Roles in open source and free software communities	12
Software in various forms	15
The software development process	16
The layers of an onion	18
1.5 Characteristics of the Communities	19
Free availability of source code	20
Distributed ownership and control	20
Resources	23
Limited lock-in	24
High tolerance of mistakes	26
Open and ambiguous performance indicators	26
Selection through professional attention	27
Selection based on technical merits (elegance)	28
Limited knowledge about end-users	30
1.6 Summary	30

Two	<b>Interpreting Open Source and Free Software Communities</b>	33
2.1	Introduction	33
2.2	The Challenge Facing Open Source and Free Software	34
	On the nature of open source and free software	34
	Problems facing public goods	35
2.3	How Individuals in Communities Provide a Public Good	36
	Low entry costs	37
	Low transaction costs	38
	The user's direct need	38
	Joy	40
	Reputation	40
2.4	On the Nature of Innovations	41
	Two different approaches	41
	The individual and collective level	42
	Innovation in open source and free software communities	43
2.5	Variation and Selection in Open Source and Free Software Communities	44
	Variation mechanisms	44
	Selection mechanisms	46
	Consequences of the selection mechanisms	49
2.6	Summary	50
Three	<b>The Commons Under Pressure: Business Processes and IPR</b>	51
3.1	Introduction	51
3.2	What Are Intellectual Property Rights?	52
	The economic rationale underlying IPR	52
	Different institutions under the IPR umbrella	53
	The system of copyrights in the United States and the European Union	55
	Patents in the United States and the European Union	56
3.3	Copyrights and Patents on Software	58
	Challenges	58
	Copyrights on software in the United States and the European Union	59
	Software patents in the United States and the European Union	60

	Colonizing the commons?	61
3.4	Firms and Their Attitude Towards IPR in the Digital Age	62
	The business model of companies	62
	Ownership of software	63
	Lock-in	63
	Decision-making	64
	Company resources	64
	Characteristics compared	65
3.5	Threats From the Physical Domain	66
	Patents	66
	Companies hiring core open source and free software developers	68
	Free-riding	68
	Performance indicators	68
	Commercialization	69
3.6	Summary	70
Four	<b>Mechanisms to Protect the Commons</b>	71
4.1	Introduction	71
4.2	Open Source and Free Software Licenses	72
	The BSD license	72
	Derivatives of the BSD license	73
	The GPL	74
	GPL version 3.0	75
	Derivatives of the GPL	77
	Effects of the licenses	77
	Legal status of the licenses	78
4.3	Beachheads	79
	The Free Software Foundation	79
	The Open Source Initiative	81
	The Apache Software Foundation	82
	The KDE Free Qt Foundation	83
	The Python Software Foundation	84
	Effects of the organizations	85
4.4	Strategies	86
	Boycott of software	86
	Developing alternatives	87

---

	Power play	88
	Publish early	88
	Effects of the strategies	89
4.5	Communities Becoming a Threat to the Corporate Software Development Model	89
	The GPL virus	90
4.6	Effects of the Protection Mechanisms	91
<b>Five</b>	<b>Living Apart Together: Hybrid Business Strategies on the Edge of the Commons</b>	93
5.1	Introduction	93
5.2	Hybrid Strategies for Software Developers	94
	Business model	94
	The method of dual licensing	95
	Different development lines	96
	Stimulating developers to continue working in communities	97
5.3	Hybrid Strategies for Hardware Manufacturers	99
	Business model	99
	Giving away free hardware	99
	Outsourcing software development	100
	Outsourcing testing	101
5.4	Hybrid Strategies for Corporate Users	102
	The business logic	102
	The dilemma	102
	Using the stable version	104
	Creating a business forum	104
5.5	Conclusion	105
<b>Six</b>	<b>Analysis and Conclusion</b>	109
	The Open Source and Free Software Licenses	109
	Intellectual Property Rights	110
	Tensions Between the Commons and Companies	111
	The Role of Governments	113

---
