

Table of Contents—Case Scenarios

Chapter 9

- Case 9-1: “Reading” the diagnostic-classification from motor-behavior in very young children
- Case 9-2: Severe refractory polyarticular JIA in a 14-year-old girl

Chapter 10

- Case 10-1: 9-year-old child with spondylolisthesis
- Case 10-2: 12-year-old child with postural roundback

Chapter 11

- Case 11-1: Initial examination and follow-up of an infant with congenital muscular torticollis and deformational plagiocephaly

Chapter 12

- Case 12-1: A young man with arthrogryposis followed from birth through adolescence.
- Case 12-2: Child with arthrogryposis followed from birth to age 7 years
- Case 12-3: Connor and his relapsing club feet

Chapter 13

- Case 13-1: An 11 year-old girl with III/IV osteogenesis imperfecta
- Case 13-2: Cody’s desires for enhanced functional skills

Chapter 14

- Case 14-1: A 9-year-old boy with dystrophinopathy and probably Duchenne’s muscular dystrophy
- Case 14-2: Ambulatory changes in a 7-year-old girl with spinal muscular atrophy type III

Chapter 15

- Case 15-1: Anthony, a 14 year-old boy with traumatic amputation
- Case 15-2: Gabby, child born with congenital longitudinal deficiency of the tibia, complete

Chapter 16

- Case 16-1: A 12-year-old boy diagnosed with Sever’s disease
- Case 16-2: A 14-year-old girl with a diagnosis of vascular malformation of the left leg presenting with an ankle sprain
- Case 16-3: 9-year-old boy with idiopathic toe walking
- Case 16-4: 13-year-old girl with generalized joint hypermobility

Chapter 17

- Case 17-1: Post-concussion rehabilitation management in a 16-year-old swimmer
- Case 17-2: A 10-year-old boy with stable osteochondritis dissecans lesion in the medial femoral condyle
- Case 17-3: Postoperative management of anterior cruciate ligament reconstruction in a young female athlete

Chapter 18

- Case 18-1: 10-year-old girl with vincristine-induced peripheral neuropathy (VIPN)

Chapter 19

- Case 19-1: 5-year-old boy referred to outpatient physical therapy
- Case 19-2: 5-year-old boy being evaluated for special education
- Case 19-3: A 13-year-old boy with attention and coordination difficulties

Chapter 20

- Case 20-1: Physical therapy assessment and intervention in the home of a 6-year old girl with a medical diagnosis of Rett syndrome

Chapter 21

- Case 21-1: A 4-year 6-month-old child with Down syndrome

Chapter 22

- Case 22-1: A girl with asymmetric quadriplegic cerebral palsy (Noelle)
- Case 22-2: A girl with cerebral palsy (Nicole)

Chapter 23

- Case 23-1: PBPI case report: promoting recovery and functional use after microsurgery in infancy

Chapter 24

- Case 24-1: Patient with C2 AIS D tetraplegia
- Case 24-2: 8-Year old male with transverse myelitis
- Case 24-3: 14-month-old patient with neuroblastoma
- Case 24-4: Patient with tetraplegia secondary to traumatic spinal cord injury
- Case 24-5: Patient with tetraplegia secondary to acute flaccid myelitis
- Case 24-6: Patient with C4 AIS D tetraplegia secondary to acute flaccid myelitis

Chapter 25

- Case 25-1: John: Severe traumatic brain injury and multitrauma

Chapter 26

- Case 26-1: L3 MMC assessment and plan of care for walking

Chapter 27

- Case 27-1: A 30-month-old boy with a diagnosis of autism spectrum disorder receiving services through the early intervention system

Chapter 28

- Case 28-1: A boy with cystic fibrosis followed from newborn to age 16

Chapter 29

- Case 29-1: A boy with exercise-induced asthma and pectus excavatum

Chapter 30

- Case 30-1: An infant with hypoplastic left heart syndrome
- Case 30-2: A 10-year-old child with cardiomyopathy receiving outpatient physical therapy

Chapter 31

- Case 31-1: A boy born extremely preterm, spent more than 4 months in the neonatal intensive care unit
- Case 31-2: Preemies can talk!
- Case 31-3: Swaddling for calming may improve parent-infant interaction
- Case 31-4: A girl born full term with Down syndrome

Chapter 32

- Case 32-1: A 22-month-old with both global developmental delay and failure to thrive and his mother
- Case 32-2: A 26-month-old boy with right hemiplegia and his family
- Case 32-3: Tele physical therapy for a young child and their family
- Case 32-4: Addressing the challenges in the primary service provider approach: Advocating for meaningful decision making

Chapter 33

- Case 33-1: A 5-year-old student with Down syndrome receiving physical therapy through telehealth
- Case 33-2: Education, health equity, and future applications of telehealth
- Case 33-3: A young girl with spastic diplegic and ataxic cerebral palsy in a school setting

Chapter 34

- Case 34-1: A 22-year-old man recently transitioned from high school to part-time community employment
- Case 34-2: A physical therapist working in the public schools, expanding her role to service youth with physical disabilities transitioning from high school to postsecondary education

- Case 34-3: Doctoral candidate Matt Freeman shares his thoughts on the transition process as someone who lived the experience as an individual with cerebral palsy

Chapter 35

- Case 35-1: A 37-year-old woman with spastic quadriplegia cerebral palsy and how her assistive technology needs have changed as she matures

- Video 24-1: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-2: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-3: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-4: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-5: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-6: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-7: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-8: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-9: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-10: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-11: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-12: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-13: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-14: Case 24-1 child with C5-C6 ASIA B tetraplegia
- Video 24-15: Case 24-5 patient with tetraplegia—ventilator
- Video 24-16: Case 24-5 patient with tetraplegia—ventilator
- Video 24-17: Case 24-5 patient with tetraplegia—ventilator
- Video 24-18: Case 24-5 patient with tetraplegia—ventilator
- Video 24-19: Case 24-5 patient with tetraplegia—ventilator
- Video 24-20: Case 24-6 patient with incomplete tetraplegia

- Video 24-21: Case 24-6 patient with incomplete tetraplegia
- Video 24-22: Case 24-6 patient with incomplete tetraplegia
- Video 24-23: Case 24-6 patient with incomplete tetraplegia

- Video 25-1: 15-year-old post severe traumatic brain injury

- Video 26-1: 15-year-old child with spastic quadriplegia cerebral palsy
- Video 26-2: Walking

- Video 26-3: Sitting
- Video 26-4: Adolescent walking
- Video 26-5: Adolescent walking down steps
- Video 26-6: Adolescent walking down steps

- Video 27-1: Child with autism during physical therapy session

- Video 28-1: Child with cerebral palsy and spastic quadriplegia

- Video 28-2: Parent instruction in postural drainage and peristomal care for infant with cystic fibrosis
- Video 28-3: Exercise instruction with 8-month-old child with cerebral palsy
- Video 28-4: Biomechanical biomechanical analysis of 13-month-old child with cerebral palsy
- Video 28-5: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-6: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-7: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-8: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-9: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-10: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-11: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-12: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-13: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-14: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-15: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy
- Video 28-16: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Video 28-17: Biomechanical biomechanical analysis of 14-month-old child with cerebral palsy

- Case 35-2: A 17-year-old man with cerebral palsy, spastic quadriplegia, and learning disabilities and how his family's advocacy for assistive technology from early childhood helped his development
- Case 35-3: A 10-year-old boy with cerebral palsy and quadriplegia and the multiple assistive technology devices he uses to achieve independence

- Video 29-1: Case 29-1 child with spastic quadriplegia cerebral palsy
- Video 29-2: Spastic quadriplegia cerebral palsy
- Video 29-3: Spastic quadriplegia cerebral palsy
- Video 29-4: Spastic quadriplegia cerebral palsy
- Video 29-5: Spastic quadriplegia cerebral palsy
- Video 29-6: Spastic quadriplegia cerebral palsy
- Video 29-7: Engagement in upper extremity (Case 29-1)
- Video 29-8: Effects of movement on spastic quadriplegia cerebral palsy
- Video 29-9: Effects of movement on spastic quadriplegia cerebral palsy
- Video 29-10: Turn control 8 months

- Video 30-1: Boy born at 28 weeks gestation with spastic quadriplegia cerebral palsy
- Video 30-2: Preterm birth with spastic quadriplegia cerebral palsy
- Video 30-3: Spastic quadriplegia cerebral palsy
- Video 30-4: Spastic quadriplegia cerebral palsy
- Video 30-5: Spastic quadriplegia cerebral palsy
- Video 30-6: Effects of movement on spastic quadriplegia cerebral palsy
- Video 30-7: Effects of movement on spastic quadriplegia cerebral palsy
- Video 30-8: Effects of movement on spastic quadriplegia cerebral palsy
- Video 30-9: Effects of movement on spastic quadriplegia cerebral palsy
- Video 30-10: Head and trunk control 10 months

Chapter 31

- Video 31-1: Boy born at 28 weeks gestation with spastic quadriplegia cerebral palsy
- Video 31-2: Preterm birth with spastic quadriplegia cerebral palsy
- Video 31-3: Spastic quadriplegia cerebral palsy
- Video 31-4: Taylor, Scale of infant development
- Video 31-5: Hand in use 8 months
- Video 31-6: Test of infant motor performance

- Video 32-1: Early intervention process during teletherapy sessions (Case 32-1)
- Video 32-2: Intervention process during teletherapy sessions (Case 32-2, Clip one)
- Video 32-3: Intervention process during teletherapy sessions (Case 32-3, Clip two)
- Video 32-4: Intervention process during teletherapy sessions (Case 32-3, Clip three)
- Video 32-5: Intervention process during teletherapy sessions (Case 32-3, Clip four)
- Video 32-6: Intervention process during teletherapy sessions (Case 32-3, Clip five)
- Video 32-7: Intervention process during teletherapy sessions (Case 32-3, Clip six)
- Video 32-8: Intervention process during teletherapy sessions (Case 32-3, Clip seven)
- Video 32-9: Intervention process during teletherapy sessions (Case 32-3, Clip eight)
- Video 32-10: Intervention process during teletherapy sessions (Case 32-3, Clip nine)
- Video 32-11: Intervention process during teletherapy sessions (Case 32-3, Clip ten)

- Video 33-1: Topic 1 Educational relevance (Case 33-1)
- Video 33-2: Topic 2 Communication and collaboration (Case 33-2)
- Video 33-3: Topic 3 Facilitation (Case 33-3)
- Video 33-4: Therapist discussion (Case 33-4)
- Video 33-5: Therapist discussion (Case 33-5)

- Video 33-6: Therapist discussion (Case 33-6)
- Video 33-7: Therapist discussion (Case 33-7)
- Video 33-8: Therapist discussion (Case 33-8)
- Video 33-9: Therapist discussion (Case 33-9)
- Video 33-10: Therapist discussion (Case 33-10)

- Video 34-1: Child with spastic quadriplegia cerebral palsy
- Video 34-2: Child with spastic quadriplegia cerebral palsy
- Video 34-3: Child with spastic quadriplegia cerebral palsy
- Video 34-4: Child with spastic quadriplegia cerebral palsy
- Video 34-5: Child with spastic quadriplegia cerebral palsy

- Video 34-6: Child with spastic quadriplegia cerebral palsy
- Video 34-7: Child with spastic quadriplegia cerebral palsy
- Video 34-8: Child with spastic quadriplegia cerebral palsy
- Video 34-9: Child with spastic quadriplegia cerebral palsy
- Video 34-10: Child with spastic quadriplegia cerebral palsy

- Video 35-1: Child with spastic quadriplegia cerebral palsy
- Video 35-2: Child with spastic quadriplegia cerebral palsy
- Video 35-3: Child with spastic quadriplegia cerebral palsy
- Video 35-4: Child with spastic quadriplegia cerebral palsy
- Video 35-5: Child with spastic quadriplegia cerebral palsy

- Video 35-6: Child with spastic quadriplegia cerebral palsy
- Video 35-7: Child with spastic quadriplegia cerebral palsy
- Video 35-8: Child with spastic quadriplegia cerebral palsy
- Video 35-9: Child with spastic quadriplegia cerebral palsy
- Video 35-10: Child with spastic quadriplegia cerebral palsy

- Video 36-1: Child with spastic quadriplegia cerebral palsy
- Video 36-2: Child with spastic quadriplegia cerebral palsy
- Video 36-3: Child with spastic quadriplegia cerebral palsy
- Video 36-4: Child with spastic quadriplegia cerebral palsy
- Video 36-5: Child with spastic quadriplegia cerebral palsy

- Video 36-6: Child with spastic quadriplegia cerebral palsy
- Video 36-7: Child with spastic quadriplegia cerebral palsy
- Video 36-8: Child with spastic quadriplegia cerebral palsy
- Video 36-9: Child with spastic quadriplegia cerebral palsy
- Video 36-10: Child with spastic quadriplegia cerebral palsy

- Video 37-1: Child with spastic quadriplegia cerebral palsy
- Video 37-2: Child with spastic quadriplegia cerebral palsy
- Video 37-3: Child with spastic quadriplegia cerebral palsy
- Video 37-4: Child with spastic quadriplegia cerebral palsy
- Video 37-5: Child with spastic quadriplegia cerebral palsy

- Video 37-6: Child with spastic quadriplegia cerebral palsy
- Video 37-7: Child with spastic quadriplegia cerebral palsy
- Video 37-8: Child with spastic quadriplegia cerebral palsy
- Video 37-9: Child with spastic quadriplegia cerebral palsy
- Video 37-10: Child with spastic quadriplegia cerebral palsy

- Video 38-1: Child with spastic quadriplegia cerebral palsy
- Video 38-2: Child with spastic quadriplegia cerebral palsy
- Video 38-3: Child with spastic quadriplegia cerebral palsy
- Video 38-4: Child with spastic quadriplegia cerebral palsy
- Video 38-5: Child with spastic quadriplegia cerebral palsy

- Video 38-6: Child with spastic quadriplegia cerebral palsy
- Video 38-7: Child with spastic quadriplegia cerebral palsy
- Video 38-8: Child with spastic quadriplegia cerebral palsy
- Video 38-9: Child with spastic quadriplegia cerebral palsy
- Video 38-10: Child with spastic quadriplegia cerebral palsy

- Video 39-1: Child with spastic quadriplegia cerebral palsy
- Video 39-2: Child with spastic quadriplegia cerebral palsy
- Video 39-3: Child with spastic quadriplegia cerebral palsy
- Video 39-4: Child with spastic quadriplegia cerebral palsy
- Video 39-5: Child with spastic quadriplegia cerebral palsy

- Video 39-6: Child with spastic quadriplegia cerebral palsy
- Video 39-7: Child with spastic quadriplegia cerebral palsy
- Video 39-8: Child with spastic quadriplegia cerebral palsy
- Video 39-9: Child with spastic quadriplegia cerebral palsy
- Video 39-10: Child with spastic quadriplegia cerebral palsy

- Video 40-1: Child with spastic quadriplegia cerebral palsy
- Video 40-2: Child with spastic quadriplegia cerebral palsy
- Video 40-3: Child with spastic quadriplegia cerebral palsy
- Video 40-4: Child with spastic quadriplegia cerebral palsy
- Video 40-5: Child with spastic quadriplegia cerebral palsy

- Video 40-6: Child with spastic quadriplegia cerebral palsy
