## Part I The fundamentals

#### Molecules and molecular structures: an overview 1

- Simple covalent molecules 1.1
- Structure determination by X-ray diffraction 1.2

1.3	Where are the bonds?	17
1.4	Types of bonding	19
1.5	Weaker non-bonded interactions	21
1.6	Solids	25
1.7	How to draw molecules	25
1.8	Common names and abbreviations	27
1.9	The ideal gas	28
1.10	Moving on	32
Ansv	vers to self-test exercises	34
2 Ele	ectrons in atoms	35
2.1	Introducing quantum mechanics	36
2.2	Introducing orbitals	39
2.3	Hydrogen atomic orbitals	43
2.4	Spin	62
2.5	Hydrogen-like atoms	63
2.6	Multi-electron atoms	64
2.7	Ionization energies	71
2.8	Moving on	77
Furth	ner reading	77
Ansv	vers to self-test exercises	77
3 Sy	Calculating the entropy change of the Universe grtemm	79
3.1	Why symmetry is important	79
3.2	Symmetry elements and symmetry operations	80
3.3	Point groups	85
3.4	Applications of symmetry	89
3.5	Classification of orbitals according to symmetry	93
3.6	Moving on	96
