

CONTENTS

■ Introduction to genetics – basic concepts and terms	6
■ Inheritance patterns, genetic risk assessment	23
■ Epigenetics	51
■ Cytogenetics	57
■ Chromosomal aberrations	67
■ Molecular genetics – basic theory.....	87
■ DNA testing in clinical practice	97
■ Introduction to human population genetics	108
■ Oncogenetics	110
■ Hereditary cancer syndromes.....	118
■ Genetic syndromes with a high risk of cancer	125
■ Inherited metabolic disorders	130
■ Somatosexual abnormalities.....	143
■ Genetics of haematooncologic disorders – introduction	158
■ Neurogenetics.....	172
■ Genetic diseases in ophthalmology	184
■ Preimplantation genetic testing.....	189
■ Screening examinations in pregnancy	193
■ Prenatal diagnostics.....	203
■ Teratogenic factors in pregnancy	216
■ Immunogenetics.....	224
■ Pharmacogenetics	233
■ Introduction to genetics of selected internal diseases.....	242
■ Genetic databases.....	250
■ Gene therapy for selected disorders	251
■ Clinical case reports	256
List of figures.....	272
List of tables.....	275
