Introduction	vii
1. Choosing an Antibiotic for the Neonate	1
2. Antimicrobial Drug Therapy for Neonates	9
A. Neonatal Pharmacokinetics	9
B. Antimicrobial Pharmacodynamics	12
C. Drug Dosage Tables	14
D. Therapeutic Drug Monitoring	18
E. Individual Drug Monographs	21
Acyclovir	21
Amphotericin B	22
Ampicillin	24
Cefazolin	25
Cefepime	26
Cefotaxime	27
Fluconazole	28
Gentamicin	29
Meropenem	31
Penicillin G	32
Vancomycin	35
3. Bacterial Infections in Neonates	37
Conjunctivitis	38
Gastrointestinal infections	39
Botulism	39
Osteomyelitis, suppurative arthritis	40
Otitis media	42
Parotitis, suppurative	42
Pulmonary infections	42
Sepsis and meningitis	44
Skin and soft tissues	46
Syphilis, congenital (<1 mo of age)	48
Syphilis, congenital (>1 mo of age)	49
Tetanus neonatorum	49
Tuberculosis	50
Urinary tract infection	51
4. Viral Infections in Neonates	53
Cytomegalovirus	54
Enterovirus	55
Hepatitis B	55
Hepatitis C	56
Herpes simplex virus infection (HSV-1 and HSV-2)	56

Human immunodeficiency virus	5
Influenza A and B viruses	5
Respiratory syncytial virus	6
Varicella-zoster virus	6
5. Fungal Infections in Neonates	6
Aspergillosis	6
<i>Candida</i> spp	6
<i>Malassezia</i> spp	6
Mucormycosis	6
<i>Pneumocystis jiroveci</i> pneumonia	6
6. Parasitic Infections in Neonates	6
Amebiasis	7
Babesiosis	7
Chagas disease	7
Giardiasis	7
Malaria	7
Scabies	7
Toxoplasmosis, congenital	7
7. Antimicrobial Stewardship in the Nursery	7
Index	8
