

# Table of Contents

## STUDENT PAPERS

### Foundations of Computer Science

- Probabilistic and Frequency Finite-State Transducers . . . . . 1  
*Kaspars Balodis, Anda Beriņa, Gleb Borovitsky, Rūsiņš Freivalds, Ginta Garkāje, Vladimirs Kacs, Jānis Kalējs, Ilja Kucevalovs, Jānis Ročāns, and Madars Virza*
- Quasiperiodicities in Fibonacci strings . . . . . 13  
*Michalis Christou, Maxime Crochemore, and Costas S. Iliopoulos*
- Using Neighborhood Diversity to Solve Hard Problems . . . . . 23  
*Robert Ganian*
- Reset Complexity of Ideal Languages . . . . . 33  
*Marina I. Maslennikova*
- Fixpoints vs Moore Families . . . . . 45  
*Fuyuan Zhang, Flemming Nielson, and Hanne Riis Nielson*

### Software & Web Engineering

- Web-Based Bibliometric Data Warehouse . . . . . 56  
*Jerzy Nawrocki, Piotr Miklosik, and Piotr Nowicki*

### Artificial Intelligence

- Gabor Wavelets for Automatic Face Recognition . . . . . 64  
*Ladislav Lenc and Pavel Král*
- Language of Preference Formulae . . . . . 75  
*Radim Nedbal*

## POSTERS

- Secure Size Estimation for Wireless Sensor Networks . . . . . 87  
*Przemysław Błaśkiewicz, Mirosław Kutylowski, and Marcin Zawada*
- Accuracy Estimates for Surrogate Solutions of Integral Equations by Neural Networks . . . . . 95  
*Věra Kůrková*
- A Refinement Technique for Overlapping Over-Approximations of Cooperating Systems . . . . . 103  
*Nils Semmelrock*
