

Content

Content	5
1 Forests in biota of the planet	11
1.1 Primary production of the ecosystems	11
1.1.1 Gross primary production	11
1.1.2 Net primary production	12
1.2 Forest and light ratios.....	12
1.3 Forest and thermal radiation.....	13
1.4 The importance of forest functions as a carbon sink and its relationship to the current problem of global climate change	14
2 The importance of forests for the development of human society	17
2.1 The importance of wood production	18
3 Development of Forests in Europe	19
3.1 Primary succession	19
3.2 Development of forest in the period 4000 years BC until the end of the 11th century.....	19
3.3 Development of forest in the period from 12 to 18 century	19
3.4 Development of forest in the period from 18 century to the present day.....	21
4 Approach to forests	23
4.1 Strategic Concepts of the Society	23
4.2 Economic approaches.....	28
5 Bioproduction function of forests	30
5.1 Factors influencing the production	30
5.1.1 Abiotic factors influencing production	30
5.1.2 The composition of the atmosphere as a production factor	31
5.1.3 Light as a production factor	31
5.1.4 Temperature as a production factor	33

5.1.5	Water as a production factor	34
5.1.6	Soil as a production factor	35
5.2	Ecosystem and economic use of biomass	36
5.2.1	Biomass – basic characteristics	36
5.2.2	Types of biomass	37
5.2.3	Forest biomass	38
6	Ecological stabilization function of forest in the landscape	40
6.1	Ecological stability of natural and anthropogenic systems	40
6.1.1	Natural forest and forest close to nature	40
6.1.2	The life cycle of natural forests	41
6.1.3	The Large Forest Cycle	41
6.1.4	The Small Forest Cycle	43
6.1.5	A significant landscape element	44
6.2	Forests of protected areas in relation to land use	45
6.2.1	Forests in national parks	46
6.2.2	Forests of protected areas	48
6.2.3	Forests localities of European significance of the Natura 2000	52
6.2.4	Care principles of forest small-scale protected areas	53
7	Edaphic – soil-forming and soil-protecting function of forests	56
7.1	Basic components of soil	56
7.1.1	The mineral component of the soil	56
7.1.2	Organic part of soil	57
7.1.3	Non-living organic matter	58
7.2	Changes in forest management aimed at reducing the negative effects of soil acidification	61
7.3	The need for changes in the management of forest determined by the varying environmental conditions	62
7.3.1	Anti-Erosion functional potential of forests	63

7.3.2	The soil conservation functional potential of forests	65
7.4	Relations between forest and farmland, anthropogenic soil degradation	65
7.4.1	Measures against wind erosion	65
7.5	Place of forests in the landscape and forestry recultivation and revitalization	68
7.5.1	Landscaping and riparian stands near water bodies	68
8	Hydric and water management function of forest	73
8.1	Water regime of forests and landscapes.....	73
8.1.1	Interception - Evaporation from the vegetation surface.....	73
8.1.2	Evaporation	73
8.1.3	Transpiration	74
8.1.4	Evapotranspiration.....	75
8.1.5	Interception of vertical precipitation in forests.....	75
8.2	Settlement of the river basin runoff.....	76
8.2.1	Runoff water	76
8.2.2	Retention and infiltration of water in the forest soil.....	77
8.2.3	Effect of forest on the settlement of the outflow from the catchment area	78
8.3	Accumulation effects of forests.....	78
8.3.1	Influence of forest on the horizontal precipitation	78
8.3.2	The influence of the forest on vapour	79
8.3.3	Influence of forest on water quality	80
8.3.4	Melioration.....	80
9	Recreational, medical and hygienic functions of forests	81
9.1	Forests as a recreational environment, recreational potential and effects.....	81
9.1.1	Increasing the recreational function and efficiency of forests	86
9.2	Optimization of recreational functions of forests	87

9.2.1	Forest recreation measures depending on the significance of the recreational area	87
9.2.2	Methods of increasing the effect of recreational forests	88
9.3	Links to the landscape environment and human settlements	90
9.3.1	Prohibition of certain activities in forests	90
9.4	Influence of the forest on the microclimatic conditions	91
9.5	Health aspects of the forest environment, physiological and psychological. Therapeutic effects.	93
10	Forests in the Czech Republic	95
10.1	Review, data, categorization, differentiation	95
10.2	Administrative and property relations.....	99
11	International forest policy	100
11.1	Specifics of international forest policy.....	100
11.2	International forestry and environmental agreements.....	103
12	Forestry Policy and Strategies of EU	106
12.1	The EU Forestry Strategy and Policy	106
12.2	Strategies in forest managemet.....	108
12.3	The EU Forest Action Plan.....	109
13	EU Institutions and organizations related to forestry	111
13.1	Forestry institutions	111
13.1.1	Standing Forestry Committee.....	111
13.1.2	Joint Research Centre of the European Commission	111
13.1.3	European State Forest Association (EUSTAFOR)	112
13.1.4	European Environment Agency	113
13.2	Organization of the private sector	114
13.2.1	The Confederation of European Forest Owners (CEPF)	114
14	Organizational links between forestry and regional development in the Czech Republic	115

14.1	State and local governments linkages	115
14.2	Certification of sustainable forest management.....	115
14.2.1	PEFC.....	116
14.2.2	FSC.....	116
14.3	The National Forestry Programme II	117
15	Forests of the World	119
15.1	Information on the state of forests in the world according to FAO.....	119
15.2	Changes in forest area: the difference in various regions of the world.....	122
15.3	Forests in outlook	123
15.4	Promotional Forest Complexes	124
16	Literature	128
16.1	Recommended reading for study:.....	130
