| <b>I FUNDAMENTALS OF ANIMAL HUSBANDRY .....</b>                                       | <b>9</b> |
| 1.1 Raising of farm animals under conditions of conventional and organic farming..... | 9        |
| 1.2 Domestication of farm animals .....   | 10       |
| 1.2.1 The course of domestication.....  | 10       |
| 1.2.2 Changes caused by domestication .....   | 11       |
| 1.3 Zootechnical taxonomy.....  | 12       |
| 1.3.1 Origin of breeds and performance types .....                                    | 12       |
| 1.3.2 Classification of breeds .....  | 14       |
| 1.3.3 Categories of farm animals.....   | 16       |
| 1.4 Gene reserves.....  | 19       |
| 1.5 Appraisal of body conformation traits (exterior of farm animals) .....            | 22       |
| 1.5.1 Measuring of body parts.....  | 24       |
| 1.6 Physiological characteristics of farm animals .....                               | 26       |
| 1.6.1 Constitution .....  | 26       |
| 1.6.2 Body condition.....   | 27       |
| 1.6.3 Earliness and longevity .....   | 28       |
| 1.6.4 Growth and development .....  | 29       |
| 1.6.4.1 Stages of growth and development in the course of ontogeny .....              | 29       |
| 1.7 Performance characteristics of farm animals .....                                 | 32       |
| 1.7.1 Biological foundations of fertility.....  | 32       |
| 1.7.2 Biological foundations of meat production .....                                 | 33       |
| 1.7.3 Biological foundations of milk production.....                                  | 35       |
| 1.7.4 Biological foundations of egg production .....                                  | 37       |
| 1.7.5 Biological foundations of skin, fur and wool production.....                    | 39       |
| 1.7.6 Biological foundations of labour .....  | 40       |
| 1.8 Ethology and welfare farm animals .....   | 41       |
| 1.8.1 Basic daily activities .....  | 42       |
| 1.8.2 Welfare .....   | 43       |
| 1.9 Foundation of farm animal breeding and selection .....                            | 45       |
| 1.9.1 Breeding value .....  | 47       |
| 1.9.2 Selection .....   | 49       |
| 1.9.3 Methods of breeding .....   | 52       |

|   |           |
|---|-----------|
| <b>2 REPRODUCTION OF FARM ANIMALS .....</b>                           | <b>56</b> |
| 2.1 Biological foundations of reproduction in farm animals .....      | 56        |
| 2.1.1 Sex organs of males .....                                       | 56        |
| 2.1.1.1 Neuroendocrinal regulation of sexual activities in males..... | 60        |
| 2.1.2 Sex organs of females .....                                     | 61        |
| 2.1.2.1 Neuroendocrinal regulation of sexual activities in males..... | 63        |
| 2.2 Reproduction cycle, estrus cycle, heat detection.....             | 64        |
| 2.2.1 Reproduction cycle .....  | 64        |
| 2.2.2 Estrus cycle.....   | 64        |
| 2.2.3 Heat detection .....  | 66        |
| 2.3 Natural reproduction and reproductional biotechniques.....        | 69        |
| 2.3.1 Natural reproduction (mating) .....                             | 69        |
| 2.3.2 Reproduction biotechniques .....                                | 70        |
| 2.3.2.1 Insemination.....   | 70        |
| 2.3.2.2 Embryo transfer.....  | 76        |
| Heat induction and synchronisation.....                               | 77        |
| 2.3.2.2 Manipulation with recovered embryos .....                     | 79        |
| 2.4 Diagnostics of pregnancy.....                                     | 79        |
| 2.5 Course and management of the birth process.....                   | 82        |
| <b>3. CATTLE BREEDING.....</b>  | <b>85</b> |
| 3.1 Cattle herd turnover .....  | 85        |
| 3.2 Milk performance .....  | 86        |
| 3.2.1 Factors influencing milk performance .....                      | 90        |
| 3.3 Meat performance .....  | 93        |
| 3.3.1 Evaluation of meat performance.....                             | 94        |
| 3.3.2 Factors influencing the meat performance of cattle.....         | 95        |
| 3.3.3 Beef cattle marketing .....                                     | 96        |
| 3.4 Cattle breeds .....   | 99        |
| 3.4.1 Dairy breeds.....   | 99        |
| 3.4.2 Dual-purpose breeds of cattle .....                             | 102       |
| 3.4.3 Beef cattle .....   | 104       |
| 3.5 Breeding work and selection in cattle industry .....              | 108       |
| 3.6. Technologies and methods used in dairy farming .....             | 116       |
| 3.6.1. Dairy cows.....  | 116       |
| 3.6.2 Rearing of calves.....  | 121       |

|  |            |
|--|------------|
| 3.6.3 Rearing of heifers .....   | 122        |
| 3.6.4 Fattening of calves, young cattle and steers .....                       | 125        |
| 3.7 Technologies and techniques used in herds of non-milked cattle .....       | 126        |
| 3.7.1 Cows.....  | 126        |
| 3.7.2 Rearing cows during the summer grazing season.....                       | 127        |
| 3.7.3 Rearing of cows during the winter period .....                           | 128        |
| 3.8 Evaluation of the breeding environment.....                                | 129        |
| 3.8.1 Technical requirements .....   | 130        |
| 3.8.2 Animal signals .....   | 130        |
| <b>4 SHEEP AND GOAT HUSBANDRY .....</b>  | <b>133</b> |
| 4.1 Current situation in goat and sheep husbandry in the Czech Republic.....   | 133        |
| 4.2 Sheep and goat reproduction .....  | 135        |
| 4.2.1 Fertility, sexual and breeding maturity, sex cycle .....                 | 135        |
| 4.2.2 Sheep and goat breeding.....   | 137        |
| 4.2.3 Pregnancy and parturition in sheep and goats .....                       | 138        |
| 4.2.4 Assessment of reproduction in sheep and goats .....                      | 139        |
| 4.3 Meat performance of sheep and goats .....                                  | 140        |
| 4.3.1 The importance of meat performance .....                                 | 140        |
| 4.3.2 Composition of lamb and kid meat .....                                   | 140        |
| 4.3.3 Factors influencing the growth and the carcass value.....                | 141        |
| 4.3.4 Major categories of slaughter sheep.....                                 | 143        |
| 4.3.5 Sale and classification of live lambs and sheep.....                     | 143        |
| 4.3.6 Grading of lamb and mutton carcasses .....                               | 144        |
| 4.4 Milk performance .....   | 147        |
| 4.4.1 Factors influencing milk production .....                                | 147        |
| 4.4.2 Sensory properties and composition of sheep and goat milk .....          | 149        |
| 4.4.3 Milking .....  | 150        |
| 4.5 Sheep wool and goat hair .....   | 151        |
| 4.6 Breeds of sheep and goats .....  | 152        |
| 4.6.1 The most important dual-purpose sheep breeds in the Czech Republic ..... | 152        |
| 4.6.2 The most important meat sheep breeds in the Czech Republic .....         | 154        |
| 4.6.3 The most important dairy sheep breeds in the Czech Republic.....         | 155        |
| 4.6.4 The most important breeds of dairy goats in the Czech Republic .....     | 156        |
| 4.7 Technologies and techniques of sheep and goat husbandry.....               | 157        |

|   |            |
|---|------------|
| 4.7.1 Technologies and techniques used in sheep husbandry .....             | 157        |
| 4.7.2 Rearing and weaning of lambs.....                                     | 158        |
| 4.7.3 Methods of lamb fattening.....  | 159        |
| 4.7.4 Technologies and techniques of goat husbandry .....                   | 161        |
| 4.7.5 Rearing of kids.....  | 161        |
| 4.7.6 Weaning of kids .....   | 162        |
| <b>5 PIG FARMING .....</b>  | <b>163</b> |
| 5.1 Performance traits of pigs .....  | 163        |
| 5.1.1 Fertility .....   | 163        |
| 5.1.2 Milk production capacity of sows.....                                 | 164        |
| 5.1.3 Fattening capacity .....  | 165        |
| 5.1.4 Carcass and meat quality .....  | 166        |
| 5.1.5 Marketing of slaughter pigs .....                                     | 167        |
| 5.2 Pig breeds .....  | 169        |
| 5.2.1 Important world breeds of pigs .....                                  | 169        |
| 5.2.2 Pig breeds reared in the Czech Republic.....                          | 172        |
| 5.3 Breeding work and selection in pig herds .....                          | 176        |
| 5.3.1 Organisation of pig breeding work in the CR.....                      | 176        |
| 5.3.2 Performance testing.....  | 177        |
| 5.3.3 Hybridisation programmes in pig husbandry .....                       | 180        |
| 5.4 Technologies and techniques used in pig husbandry .....                 | 182        |
| 5.4.1 Sows .....  | 182        |
| 5.4.2 Raising of piglets .....  | 185        |
| 5.4.3 Fattening of slaughter pigs (hogs).....                               | 186        |
| 5.4.4 Rearing of breeding boars (sires).....                                | 187        |
| <b>6 HORSE HUSBANDRY .....</b>  | <b>189</b> |
| 6.1 Characteristics of horse breeds and utility types .....                 | 189        |
| 6.1.1 Origins and evolution of horse breeds and utility types.....          | 189        |
| 6.1.2 Classification of horse breeds and utility types .....                | 190        |
| 6.2 Organisation of horsemanship .....                                      | 193        |
| 6.2.1 Organisational structure of horse breeding in the Czech Republic..... | 193        |
| 6.2.2 Approved associations of horse breeders .....                         | 193        |
| 6.2.3 Organisation of breeding work .....                                   | 194        |

|  |            |
|--|------------|
| 6.3 Categories of horses .....   | 195        |
| 6.4 Breeding facilities in horse husbandry .....   | 198        |
| 6.5 Care about horses .....  | 200        |
| 6.5.1 Rearing of weanlings and young horses .....  | 200        |
| 6.5.2 Care about horses in training and during the period of their adulthood and practical use ..... | 202        |
| 6.6 Technologies in horse breeding .....   | 212        |
| 6.6.1 Grazing .....  | 212        |
| 6.6.1.1 Botanic composition of pasture stands .....  | 212        |
| 6.6.1.2 Acreage of pastures .....  | 212        |
| 6.6.1.3 Organisation of horse grazing .....  | 213        |
| 6.6.2 Housing .....  | 215        |
| 6.6.2.1 Types of housing .....   | 215        |
| <b>7 POULTRY FARMING .....</b>   | <b>218</b> |
| 7.1 Performance characteristics of poultry .....   | 218        |
| 7.1.1 Egg formation and composition .....  | 220        |
| 7.1.2 Laying period .....  | 223        |
| 7.1.3 Production of poultry meat .....   | 226        |
| 7.1.4 Production of feathers and droppings .....   | 227        |
| 7.2 Poultry breeds and types .....   | 230        |
| 7.2.1 Breeds and utility types of domestic poultry .....   | 230        |
| 7.2.2 Turkey breeds and final hybrids .....  | 235        |
| 7.2.4 Breeds and final hybrids of geese .....  | 238        |
| 7.3 Hatching and sexing of poultry .....   | 239        |
| 7.3.1 Hatching .....   | 239        |
| 7.3.2 Sexing .....   | 241        |
| 7.4 Raising and rearing of final laying-type hybrids .....   | 242        |
| 7.4.1 Raising pullets of the egg-laying type .....   | 242        |
| 7.4.2 Rearing of layers .....  | 244        |
| 7.5 Rearing of broilers and meat-type poultry .....  | 247        |
| 7.6 Fattening of turkeys .....   | 250        |
| 7.7 Rearing and fattening of ducks .....   | 250        |
| 7.8 Fattening of Muscovy ducks .....   | 252        |
| 7.9 Rearing and fattening of geese .....   | 253        |
