

Aerosol Particle Formation During Summer Campaign at Rural Background Site Košetice	
<i>Mgr. Adéla Holubová Šmejkalová</i>	5
Data Processing of Experimental Results in Systems of Ionic Liquids. Pitfalls and Challenges.	
<i>Ing. Jan Rotrekl</i>	7
Thermodynamic Properties of Saccharinate-based Ionic Liquids: Comparison of Experimental Data to a Prediction by means of COSMO-RS	
<i>Maja Čanji, MSc.</i>	9
New Porous Carbon Electrocatalysts Derived from Ionic Liquid for Oxygen Reduction Reaction	
<i>Nikola Zdolšek, MSc.</i>	11
Synthesis of Amidoazaphenacenes for Applications in Molecular Electronics	
<i>Ing. Lubomír Váňa</i>	12
Preparation of Fluorinated [5]- and [6]Helicenes	
<i>Ing. Pavel Jakubík</i>	14
Helicene-based Thioureas	
<i>Ing. Martin Jakubec</i>	16
Transition-Metal Complexes with Helical Phosphines	
<i>Ing. Tomáš Beránek</i>	17
Progress in Synthesis of Aza-helicenes	
<i>Martin Kos</i>	18
Preparation of Magnesium Silicide and Magnesium Germanide from Waste for Material recovery	
<i>Ing. Jakub Bumba</i>	20
Reaction Kinetic Study of Heterogeneous Hydrogenations for 3D-printed Catalysts	
<i>Massimo Ujčić, Mgr. Ing.</i>	22
Hydrodynamic Behavior of Bubbles in Slot Channels	
<i>Kingsley Ezeji, MSc.</i>	23
High-Temperature Desulfurization of a Producer Gas by La- and Ce-based Oxides	
<i>Ing. Jiří Brynda</i>	25
Preliminary Evaluation of Sewage Sludge Biochar Composition and Mass and Energy Balance of the Sludge Pyrolysis	
<i>Ing. Jaroslav Moško</i>	26

Dry Flue Gas Treatment: Preparation for Experimental Campaign and Preliminary Experiments	
<i>Ing. Boleslav Zach</i>	28
Use of Water-Modified Supercritical Carbon Dioxide for Direct Preparation of Crystalline Monolithic TiO_2 Aerogels	
<i>Ing. Marie Cerhová</i>	30
