PART I MICROECONOMICS

- 1 The Economics of Personal and Social Choice** **4**
- Economics and You: *Trade-Offs and Weighing the Alternatives*. Global and National Problems Today. Economics and National Problems Yesterday: *Slavery in the United States*. Scarcity and Choice for Everyone. Economic Analysis and Value Judgments. Using Theory Is Your Only Choice.
- 2 Scarcity and the Economic Problem** **20**
- Facing Up to Scarcity: *Specialization and Economic Cooperation*. Our Production Possibilities: *Specialized Factors and Increasing Opportunity Costs*. Unemployment and Economic Growth. The Economic Problem and the Market Economy: *What. How. To Whom. Markets, Prices, and Information*. Market Deficiencies and Imperfections: *Transaction Costs. Externalities. Public Goods. Income Distribution. Monopoly and Economic Concentration. The Case for the Market Economy*.
- 3 The First Law of Economics** **40**
- Prices Count: *The Law of Demand Restated. The Demand Schedule and Demand Curve. The "Other Things" that Determine Demand. Change in Demand and Change in Quantity Demanded. Price Responsiveness and Price Elasticity*.

4 The Law of Supply and Market Price 61

Information and Supply. The Law of Supply: *The Supply Schedule and Supply Curve. Cost Determinants of Supply. Change in Supply versus Change in Quantity Supplied. Elasticity of Supply. Markets. Changes in Demand and Supply and Market Price: The Effect on Price of a Change in Demand. The Effect on Price of a Change in Supply. Are Markets Orderly?*

5 Shortages, Surpluses, and Prices 78

Price Movements: *Market Disorder. Price Ceilings and Price Floors: Rent Controls and Housing Shortages. Usury Laws and Getting a Loan. Gasoline Shortages in the 1970s. Price Ceilings and Food Shortages.*

6 Production, Profits, and Marginal Analysis 98

Producers Keep an Eye on the Market: *Combining Inputs. Businesses and Productive Resources. Short Run versus Long Run. Another Law: The Law of Diminishing Marginal Productivity: Marginal Costs in the Short Run. Marginal Physical Product and Its Mirror Image—Marginal Cost. Comparing Marginal Cost to Price. Fixed Costs in the Short Run. All Costs in the Long Run. Supplier Responses in the Short and Long Run.*

7 Competition and Monopoly 116

Market Structure and Setting Prices: *Pure Competition: The World of Price Takers. Pure Monopoly: The World of Price Searchers. Marginal Revenue for Price Searchers and Price Takers. Some Monopoly Power Considerations. Market Structures between Pure Monopoly and Pure Competition. Oligopolies—The Near Monopolies. Marginal Analysis—The Decision Maker's Tool.*

8 Jobs and Wages 134

Labor Markets: *Buyers, Sellers, and Wages: The Derived Demand for Inputs. The Demand for Workers. Changing the Demand for Labor. Supplies of Labor Skills: The Shortage of Accounting Professors. The Shortage of Catholic Priests and Nuns. Minimum Wage Laws and Labor Surpluses. Fighting Sexism with Comparable Worth. Unions and Workers.*

9 Market Corrections by Government 154

The Role of Government. The Market System Reconsidered: *Pollution as a Market Failure. Monopoly as a Market Failure. Public Goods and "Total" Market Failure.*

PART II MACROECONOMICS

- 10 National Economic Problems: Stagnation, Inflation, and Unemployment** 172
- The Nature of Economics. Three Big Questions of Macroeconomics. Three Indicators of Economic Health: *Growth and GNP. Inflation and the Consumer Price Index. Idle Resources and the Unemployment Rate.*
- 11 Overview of the National Economy: Cycles and the Circular Flow Model** 190
- The National Bureau of Economic Research (NBER) and the Business Cycle: *Economic Fluctuations. NBER Business Cycles. From Micro Models to Macro Behavior: Where to Begin? Circular Flow Models and Cycles: Version One. Version Two.*
- 12 Government Fiscal Actions and the Pace of the Economy** 206
- Government Economic Intervention. The U.S. Government Budget in Perspective: *Historical Perspective on Federal Spending. Federal Budget Revenues. Federal Deficit Spending. Fiscal Policy and the Circular Flow of Income. Taxes and the Sheriff of Nottingham. Transfer Payments. Government Expenditures.*
- 13 Money, Money, Money** 230
- What Is Money?: *The Monetary Aggregates. Credit. What Price Money?: Money's Intrinsic Value. Money's Exchange Value. Money's Holding Cost. Why We Use Money: The Demand for Money Schedule. Shifts in the Money Demand Curve.*
- 14 The Fed and the Money Supply** 246
- The Money Supply and the Fed: *The Fed and Open Market Operations. Fractional Reserve Banking. The Safety of Our Banking System. Money and the Circular Flow Model: The Workings of the Money Market. Circular Flow Model: Version Five.*
- 15 Why Economists Disagree** 268
- Economists and Their Political Views: *The Role of the Media. Scientific Disputes. The Keynesians: Keynesian Theory and the Circular Flow. Automatic Stabilizers. Critique of the Keynesian Theory. The Monetarists: Quantity Theory of Money. Output and Prices. Critique of the Monetarist Theory. New Classical Macro and Supply-Side Economics: Rational Expectations. Supply-Side Economics. Critique of NCM and Supply-Side Theory. Different Approaches to National Policy.*
- 16 Inflation and Unemployment** 294
- The Causes of Inflation: *Friedman's Law. Inflation as Seen from the Goods Market. The Anatomy of Unemployment: The Causes of Unemployment. The Natural Unemployment Rate. Are Inflation and Cyclical Unemployment Related: Go Policy. Stop Policy.*

17 Rising Living Standards or Stagnation? 314

The Miracle. Why Did Productivity Slow? From Malthus to Solow and Back Again: *The Malthusian Trap. Solow and Jorgenson. Productivity Growth. Demand-Side and Supply-Side Policies: The Demand Side. The Supply Side. Potential for Policy Conflict.*

18 Issues in Stabilization Policy 332

The Mix of Monetary and Fiscal Policy: *Instruments and Targets. The Poor Mix. Debates over Stabilization Policy: Rules versus Authority. Monetary Policy: Long Term versus Short Term. Analytical and National Policy Tools: Large Econometric Models. Nonstabilization Policy Measures. Direct Job Creation. Inflation Damage Control.*

PART III THE INTERNATIONAL ECONOMY

19 Trade among Nations 348

The Gains from Trade: *The Ricardian Approach. Comparative Advantage and Opportunity Cost. Some Complications. Protectionism versus Free Trade: The Issues: The Political Economy of Protection. A Case Study: The Steel Industry. Economic Costs of Protection. Protection and the Distribution of Income. Popular Rationales for Protection. Political Advantages of Protection. Lobbying for Protection.*

20 The Exchange Rate and the Balance of Payments 368

The Foreign Exchange Market. Economic Analysis of the Foreign Exchange Market. The Balance of Payments: *The Current Account. The Capital Account. Statistical Discrepancy. The Link between the Current and Capital Accounts. Determinants of Demand and Supply of Foreign Currencies: Interest Rates. National Incomes. Price Levels. International Monetary Systems: The Bretton Woods System. Managed Floating.*
