

Contents

Getting Started 1

Chapter 1

The Basics 9

Electricity and the Heart 10

The Cells of the Heart 13

Time and Voltage 19

P Waves, QRS Complexes, T Waves, and Some Straight Lines 21

Naming the Straight Lines 30

Summary: The Waves and Straight Lines of the EKG 32

Making Waves 34

The 12 Views of the Heart 39

A Word About Vectors 49

The Normal 12-Lead EKG 51

Summary: Orientation of the Waves of the Normal EKG 62

Some Really Important Stuff That You May Be Wondering:

Part 1: Why Not Just Let the Computer Do It? 64

Some Really Important Stuff That You May Be Wondering:

Part 2: How Do I Get the Goop Off My Patient's Chest Once the EKG Is Finished? 66

Coming Attractions 67

Chapter 2

Hypertrophy and Enlargement of the Heart 69

A Few Introductory Remarks 70

Definitions 71

Axis 74

Summary: Axis 83

Axis Deviation, Hypertrophy, and Enlargement 86

Atrial Enlargement 89

Summary: Atrial Enlargement 92

Ventricular Hypertrophy 93

Secondary Repolarization Abnormalities of Ventricular Hypertrophy 99

Summary: Ventricular Hypertrophy 102

CASE 1 103

CASE 2 104

Chapter 3

Arrhythmias 107

The Clinical Manifestations of Arrhythmias 109

Why Arrhythmias Happen 110

Rhythm Strips 111

How to Determine the Heart Rate From the EKG 115

The Five Basic Types of Arrhythmias 119

Arrhythmias of Sinus Origin 120

Summary: Arrhythmias of Sinus Origin 127

Ectopic Rhythms 129

Reentrant Rhythms 130

The Four Questions 132

Supraventricular Arrhythmias 135

Summary: Supraventricular Arrhythmias 157

Ventricular Arrhythmias 158

Summary: Ventricular Arrhythmias 166

Supraventricular vs Ventricular Arrhythmias 167

Summary: Ventricular Tachycardia vs Supraventricular Tachycardia With Aberrancy 174

Electrophysiology Studies (EPS) 175

Implantable Defibrillators 177

External Defibrillators 178

CASE 3 180

CASE 4 183

CASE 5 185

Chapter 4

Conduction Blocks 189

What Is a Conduction Block? 190

AV Blocks 192

Summary: AV Blocks	202
Bundle-Branch Block	204
Summary: Bundle-Branch Block	210
Hemiblocks	211
Combining Right Bundle-Branch Block and Hemiblocks	216
Blocks That Underachieve	219
The Ultimate in Playing With Blocks: Combining AV Blocks, Right Bundle-Branch Block, and Hemiblocks	220
Pacemakers	222
CASE 6	227
CASE 7	229
CASE 8	230

Chapter 5

Preexcitation Syndromes 233

What Is Preexcitation?	234
Wolff-Parkinson-White	235
A Short PR Interval Without a Delta Wave	237
Why Do We Care About Preexcitation?	238
Summary: Preexcitation	244
CASE 9	245

Chapter 6

Myocardial Ischemia and Infarction 247

Stable Angina and Acute Coronary Syndromes	248
How to Diagnose a Myocardial Infarction	251
ST-Segment Elevation Myocardial Infarctions	254
Summary: The EKG Changes of an Evolving STEMI	266
Localizing the Infarct	267
Non-ST-Segment Elevation Myocardial Infarctions	280
Takotsubo Cardiomyopathy	281
Angina Without Infarction	283
Sorting Out the Different Ischemic Syndromes	285
Limitations of the EKG in Diagnosing an Infarction	287
Stress Testing	288
CASE 10	294
CASE 11	299

Chapter 7

Finishing Touches 301

Electrolyte Disturbances 303

Hypothermia 308

Drugs 310

More on the QT Interval 315

Other Cardiac Disorders 317

Pulmonary Disorders 323

Central Nervous System Disease 325

Sleep Disorders 326

Sudden Cardiac Death 328

The Athlete's Heart 331

Preparticipation Screening for Athletes 332

The Preoperative Evaluation 334

Summary: Miscellaneous Conditions 335

CASE 12 338

CASE 13 341

Chapter 8

Putting It All Together 343

The 9-Step Method for Reading EKGs 346

Chapter 9

How Do You Get to Carnegie Hall? 369

Index 393
