About the author xv

Introduction 1

01 Emotional and rational elements in decision making 5

People decide based on emotional reasons—even really smart people,
even in B2B 6

In both B2C and B2B, your goal is to create an emotional connection
in your marketing 11

The role of rational selling points in your marketing 15

References 18

02 Conveying customer benefits through loss aversion and the endowment effect 19

Is there anything better than benefits? Consider loss aversion 20

Combine the endowment effect with loss aversion to trigger
behavior 27

References 31

03 Creating urgency and exclusivity through the scarcity principle 32

Scarcity is a powerful driver of behavior 33

Urgency prompts people to take quick action 34

Never underestimate the psychological appeal of exclusivity 38

References 45

04 The reciprocity principle and the marketing value of give to get 47

Reciprocity is a hardwired human behavior 48

How savvy marketers employ the reciprocity principle 51

References 59

- 05 Social proof: harnessing the power of people like us, and the people we like** 60
- Relying on social proof is a very common decision-making shortcut 62
- Your customers will imitate people like themselves, and also people whom they like 70
- References 73
- 06 Storytelling: increasing consumer involvement and engagement** 75
- Stories can be magically persuasive for marketers—and science shows us why 77
- References 88
- 07 Autonomy bias: harnessing the human need for control** 90
- Autonomy bias is one of the most powerful drivers of human behavior 91
- References 103
- 08 Encouraging sales and loyalty through the consistency principle and the Zeigarnik effect** 105
- Commitment and consistency bias strongly influences a person's behavior 106
- Zeigarnik effect: how marketers can harness the need for completion 116
- References 119
- 09 Information gap theory: prompting consumers to take action through curiosity and the need to know** 121
- Information gap theory is a natural driver of behavior 123
- Novelty as a complement to information-gap theory 128
- References 133
- 10 Tapping into the authority principle to stand out and prompt responses** 135
- People can feel compelled to respect and respond to authorities 136
- References 148

- 11 Choice architecture and status quo bias: how to use inertia to get things moving 149**
 - Choice architecture can exert a strong influence on how people decide 150
 - References 163
- 12 Labeling and framing: making people see things your way 165**
 - Labeling can help marketers direct their prospects to the desired action 166
 - Framing can change people's perceptions and behaviors 172
 - References 180
- 13 Increasing action through automatic compliance triggers and reasons 182**
 - Marketers can prompt response by offering the reason why 184
 - Five more ways to appeal to the automatic ways your customers make decisions 189
 - References 195
- 14 Maximizing the impact of your marketing copy and language 197**
 - Rhyme as reason effect can prompt an automatic assumption that is quite helpful to marketers 198
 - Literary devices that aid marketing copy and language 206
 - References 214
- 15 Increasing desirability through triggering availability bias 216**
 - Triggering availability bias can pave the path for easier sales 218
 - References 230
- 16 Creating stand-out marketing communications through context, rewards and unpredictability 232**
 - Marketing that stands out from what's around it will get noticed and remembered 234
 - Make your message stand out using surprise and uncertain rewards 241
 - References 247

17 Temporal landmarks and temporal discounting—the effects of time on behavior 248

People are more likely to take action when they encounter a temporal landmark 249

People put off behaviors when they perceive the payoff to be too distant 254
