

CONTENTS

ACKNOWLEDGMENTS	xiii
INTRODUCTION	1
Why We Love Myths	5
How Did We Get Here? A Brief History of How (We Think) We Know the Brain	5
Humans Are Getting Smarter Over Time, But . . .	7
The Prevalence of Neuromyths	8
What is a Neuromyth?	11
Where Do Neuromyths Come From?	12
Why Neuromyths Do Harm, But Can Also Be Opportunities	12
What to Expect in this Book	17
CHAPTER 1: MYTHS ABOUT INTELLIGENCE	19
Mental Capacity is Hereditary	19
Intelligence is Fixed at Birth	20
There is No Such Thing as Genius	22
Most People Use About 10% of Their Brains	23
Listening to Classical Music Makes You Smarter: The Mozart Effect	24
Male and Female Brains Are Designed for Different Types of Skills	26
There Are Brain Differences Based on Race	27
Vaccines Cause Autism	28
Why This is Good News for Teaching	29
CHAPTER 2: MYTHS ABOUT BRAIN ARCHITECTURE AND STRUCTURE	31
The Left and Right Hemispheres of the Brain Are Separate Systems for Learning	31

Short Bouts of Coordination Exercises Improve Integration of Left and Right Hemispheric Brain Functions	33
Some People Are More “Right Brained” and Others Are More “Left Brained”	34
There is a “Localizationism” of Academic Skills in the Brain	35
Brain Parts Work in Isolation	38
Keeping a “Cool Head” (Thinking Without Emotions) Improves Learning	39
Feelings Are Produced in the Heart and Thinking in the Brain	41
Creativity is in the Right Hemisphere of the Brain	42
Your Brain Will Shrink if You Don’t Drink Six to Eight Glasses of Water a Day	44
The Bigger Your Brain, the Smarter You Are	46
Brain Scanners “See” Thinking	48
Why This is Good News for Teaching	50

CHAPTER 3: MYTHS ABOUT TEACHING AND LEARNING

53

Individuals Learn Better When They Receive Information in Their Preferred Learning Styles	53
The Theory of Multiple Intelligences is Validated by Neuroscientific Research	57
Intrinsic Motivation is Driven by External Reward	60
Teachers’ Subject Knowledge and Instructional Strategies are More Important Than Their Relationships With Students	62
Students Should Be Rewarded All the Time to Elicit Dopamine	64
Students Should Be Given Positive Reinforcement to Speed Learning Processes	66
Students Must Be Exposed to New Information between Three and Seven Times to Learn It Effectively	68
Unstructured Discovery Learning is Preferable to Structured, Teacher-Centered Instruction	69
Intelligence Tests Measure Intelligence	70
Why This is Good News for Teaching	75

CHAPTER 4: MYTHS ABOUT HUMAN DEVELOPMENT

78

Humans Are Born With a “Blank Slate” and They Will Learn if Knowledge is Simply Provided	78
Humans Are Born with All of the Neurons They Will Ever Have	80
Everything Important About the Brain is Determined by the Age of Three	81
Brain Development is Complete by the Time a Person Reaches Secondary School	84
Human Learning Progresses Linearly	85
Learning Problems Associated with Developmental Differences in Brain Function Cannot be Remediated with Education	88
The “Terrible Twos” and “Crazy Adolescence” Are Inevitable and Always Negative	91
Why This is Good News for Teaching	96

CHAPTER 5: MYTHS ABOUT LEARNING ENVIRONMENTS 98

Humans Need Enriched Environments in Order to Develop Their Natural Potential	98
Violent Video Games Have No Effect on Behavior	102
Using the Internet Makes You Smarter/Dumber	103
Learning is Independent of the Learner's History	105
"Brain Training" is Supported by Neuroscience	106
All Knowledge Has to be Actively Constructed by the Learner	109
Self-Perception is Less Important than IQ in Academic Achievement	110
Brain Activity Depends Entirely on Sensory Input	112
Playing Computer Games Keeps Your Brain Young	114
Why This is Good News for Teaching	116

CHAPTER 6: MYTHS ABOUT THE MIND-BODY BALANCE 119

Your Brain Uses 20% of the Body's Calories, So Sugary Drinks Help Cognition	119
Dietary Supplements Improve Cognition	121
Omega-3 Pills Enhance the Mental Capacity of Children in the General Population	123
When You Sleep, Your Brain Shuts Down	125
People Can Learn in Their Sleep	128
Why This is Good News for Teaching	129

CHAPTER 7: MYTHS ABOUT BRAIN PLASTICITY 132

Critical Periods Limit Learning	132
You Can't Grow New Brain Cells	134
Brain Damage is Always Permanent	136
Neural Plasticity is Due to Good Pedagogy	138
Why This is Good News for Teaching	139

CHAPTER 8: MYTHS ABOUT MEMORY 140

The Brain has Unlimited Memory Capacity	140
Memorization is Unnecessary for Learning and Undesirable in Modern Education	143
Memory is a Single Network in the Brain	144
The Learning Pyramid: People Only Remember 10% of What They Read	147
Why This is Good News for Teaching	150

CHAPTER 9: MYTHS ABOUT ATTENTION 152

The Brain Can "Multitask"	152
Learning Can Occur Without Attention	154

Attention is a Single Network in the Brain 156

Children are Less Attentive after Sugary Snacks 157

Attention is Unaffected by Sleep 158

Why This is Good News for Teaching 159

CHAPTER 10: MYTHS ABOUT LANGUAGE, BILINGUALISM, AND MULTILINGUALISM 161

Language is Located in the Left Hemisphere of the Brain 161

Adults Cannot Learn a Foreign Language as Fast as a Child 162

Children Must Acquire Their Native Language Before Learning a Second 165

Children Learn Skills Effortlessly, Including Foreign Languages 168

All Language Functions Use the Same Brain Networks 169

Crawling is Necessary for Literacy 170

Why This is Good News for Teaching 172

CHAPTER 11: KEY TAKEAWAYS FROM THIS BOOK 175

How to Separate the Wheat From the Chaff 175

CHAPTER 12: CONCLUSION 192

Characteristics of MBE Teachers, or Learning Scientists 193

Endnotes 201
