Section 1 Introduction to educational research 1

1 Introduction 3
Chapter overview 4
Introduction 4
The quest allegory 5
Framework for this book 6
Starting with you 7
Uniqueness of educational research as a discipline 11
Case study 1: Academic theory 12
Case study 2: Applied solution 13
Case study 3: Hybrid approach 14
Contemporary issues and trends in educational research 15
Understanding the importance of the cultural context 17
So why is educational research needed? 19
The transformative effect of educational research 22
Lessons learnt the hard way 22
Lesson 1: Your supervisor may not be aligned to your interests 23
Lesson 2: Don't be swayed by what appears difficult 23
Lesson 3: Don't be put off by perceived 'experts' 23
Core points 24
Checklist for your understanding 24
Further reading 25

2 Perspectives and philosophy 26
Chapter overview 27
Introduction 27
The quest allegory 29
Philosophy as truth 30
Perspectives and philosophy within education 32
Perspectives and philosophy within research (paradigms) 36
The positivist paradigm 37
The interpretivist paradigm 38
The eclectic paradigm (or pragmatic paradigm, or reconciliationist paradigm) 40
Your educational research philosophy 40
A return to the candle analogy 41
Contemporary issues and trends in educational research 41
Lessons learnt the hard way 42
Lesson 4: Read widely 42
Lesson 5: Follow your own way 42
Core points 43
Checklist for your understanding 43
Further reading 44

3 Sociocultural context 45
Chapter overview 46
Introduction 46
The quest allegory 47
Society, culture and context: a working definition 47
Society or civilisation? 49
Anthropology and education 50
Two key theorists in cultural anthropology 51
Further sociocultural theorists 52
Educational anthropology 56
A return to culture 58
Cultural theories and ideologies 60
Contemporary issues and trends in educational research 61
Lessons learnt the hard way 63
Lesson 6: The worst response you will hear from a participant is, 'It's just what I do' 63
Lesson 7: Culture happens in lots of places even within one institution 63
Core points 64
Checklist for your understanding 64
Further reading 65

4 Research design stages 66
Chapter overview 67
Introduction 67
The quest allegory 67
Overview of the research process 68
Integration of perspectives, philosophy and the sociocultural context 69
Hourglass model 70
The introduction 70
Literature review 72
Core concepts and theories 72
Research focus 72
Research design 72
Methodology 73
Data collection 73
Data analysis and results 73
Discussion 74
Conclusion 74
Further thoughts about the hourglass model 74
Contemporary issues and trends in educational research 76
Lessons learnt the hard way 77
Lesson 8: If a research design does not exist, make one up 77
Core points 78
Checklist for your understanding 78
Further reading 79

Section 2 Initial considerations 81

5 The literature review 83
Chapter overview 84
Introduction 84
The quest allegory 85
The importance of the literature review 85
Part 1 The pragmatics of effective searching 86
Finding information sources 86
Step 1: Identify your focus 87
Step 2: Establish your word list 88
Step 3: Draw a Venn diagram 88
Step 4: Conduct an initial search 90
Step 5: Narrow your results 93
Part 2 Evaluating what you have read 95
Analysis 97
Synthesis 100

Part 3 Structuring the literature review 103
Contemporary issues and trends in educational research 108
Lessons learnt the hard way 110
Lesson 9: Layers of an onion 110
Core points 110
Checklist for your understanding 112
Further reading 112

6 Research designs 113
Chapter overview 114
Introduction 114
The quest allegory 115
The threshold test 117
Interest 119
Specificity 120
Ethics 120
Validity 120
Reliability 122
Generalisability 124
Beyond all reasonable doubt 124
Proportionality 124
Research design 124
A 'field trip' into the paranormal 126
A return to research design 130
The third way 132
Where do we go from here? 133
Contemporary issues and trends in educational research 134
Lessons learnt the hard way 134
Lesson 10: What may be best science may not be the best approach for you 134
Core points 135
Checklist for your understanding 135
Further reading 136

7 Ethics 137
Chapter overview 138
Introduction 138
The quest allegory 139
A question of balance 140
Supererogatory behaviour, utilitarianism and categorical imperative 144
The importance of ethics within both education and educational research 145
Ethical guidelines (BERA, BASES, BPS, etc.) 149

Specific advice for working with children and young people 153
Is today's research tomorrow's ethical dark shadow? 155
Man's best friend? 155
Wakey, wakey, rise and shine! 156
Never trust a monkey with a syringe 156
Are universities the bastions of ethical practice? 157
Contemporary issues and trends in educational research 158
Lessons learnt the hard way 159
Lesson 11: Is it stressful to ask participants about stress? 159
Core points 159
Checklist for your understanding 160
Final Thought 161
Further reading 161

8 Specifying your research focus 162
Chapter overview 163
Introduction 163
The quest allegory 163
Narrowing the focus 165
Framing the research 168
Aims and objectives 168
Research questions 171
Hypotheses 172
Specific designs and associated methods 174
Experiment 176
Case study 177
Action research 179
Grounded theory 180
Contemporary issues and trends in educational research 181
Lessons learnt the hard way 182
Lesson 12: Absorb what is useful, reject what is useless 182
Core points 183
Checklist for your understanding 184
Further reading 184

Section 3 Methodological considerations, methods and analysis 187
The quest allegory 188

9 Quantitative considerations and methods 189
Chapter overview 190
Introduction 191

Types of data 192
Nominal data 193
Ordinal data 193
Interval data 194
Ratio data 194
Data groupings based on sample (parametric and non-parametric data) 195
Standard deviation 197
Sampling procedures 200
Types of data related to statistics (descriptive and inferential statistics) 202
A brief return to variables 203
Correlation 204
Correlation is not causation 207
Probability 208
Selecting the appropriate approach to generate quantitative data 209
A ten-stage approach for developing quantitative research 210
Quantitative methods 211
Questionnaires 211
Existing measures or instruments 213
Developing new measures or instruments 214
Structured interviews 215
Structured observations 215
Contemporary issues and trends in educational research 216
Lessons learnt the hard way 217
Lesson 13: Establish what it is you want to find out in the first place 217
Lesson 14: Know your data types 218
Core points 219
Checklist for your understanding 221
Further reading 221

10 Qualitative considerations and methods 222
Chapter overview 223
Introduction 223
Research philosophy applied to qualitative approaches 224
Qualitative considerations 226
Natural setting 226
Researcher as the key instrument 227
Multiple sources of data 228
Inductive and deductive data analysis 228
Participants' meanings 229
Emergent design 229
Reflexivity 229
Holistic account 230

Selecting the appropriate approach to generate qualitative data 230
A ten-stage approach for developing qualitative research 231
Qualitative methods 232
Notes 232
Observations (unstructured) 232
Interviews and focus groups (semi-structured and unstructured) 234
Secondary data 237
Sociocultural artefacts 237
Drawings and photographs 239
Contemporary issues and trends in educational research 239
Dr Sophie King-Hill: Sex and relationship education 240
Dr Zenna Kingdon: Early years and wave play 240
Lessons learnt the hard way 241
Lesson 15: Check your data – you may have only one chance to collect it 241
Core points 241
Checklist for your understanding 242
Further reading 243

11 Mixed methodologies and mixed approaches 244
Chapter overview 245
Introduction 245
Mixed-methodology considerations 246
Selecting the appropriate approach to generate mixed-methodological data 249
Explanatory sequential design 249
Exploratory sequential design 250
Convergent design 251
Determining the appropriate design 253
A ten-stage approach for developing mixed-methodology research 253
Determining the appropriate analysis 254
Contemporary issues and trends in educational research 255
An example of the exploratory sequential design, leading to the explanatory sequential design 255
Lessons learnt the hard way 256
Lesson 16: Ensure that you write one research project, not three 256
Core points 256
Checklist for your understanding 257
Further reading 258

12 Quantitative analysis and presentation 259
Chapter overview 260
Introduction 260
Statistical software (SPSS, Excel and other resources) 261

Entering data 262
The variable view window 265
The data view window 267
The output window 268
Screening data and initial data analysis 269
Reliability 273
Selecting the appropriate analysis 277
Statistical analysis 283
Mann-Whitney U Test 283
Paired-samples t-test 289
Presenting results 292
Contemporary issues and trends in educational research 293
Lessons learnt the hard way 294
Core points 295
Checklist for your understanding 296
Further reading 296
Answers 297

13 Qualitative analysis and presentation 298
Chapter overview 299
Introduction 299
Process for analysing qualitative data 300
Coding data 301
Open coding (core words) 302
Axial coding (themes) 303
Selective coding (theories) 306
Other forms of coding 307
Approaches to analysis 308
Grounded theory 308
Narrative analysis 309
Thematic analysis 310
Sociocultural artefact analysis 311
Drawing analysis 313
Considerations relating to qualitative data analysis 316
Ensuring reliability, validity and ethics 316
Problems with recall 317
Transcription 318
Software 319
Displaying data 319
Visual representations 319
Word clouds 320
Vignettes 321

A ten-stage approach to qualitative analysis 322
Contemporary issues and trends in educational research 322
Core points 323
Checklist for your understanding 325
Further reading 325

Section 4 Engaging with your own research 327

14 Structuring the research 329
Chapter overview 330
A return to the quest allegory 330
Introduction 330
The use of logical arguments 332
Dialectic method 335
Simple logical arguments 337
Constructing a logical argument 338
Fallacies in arguments 340
Core points 342
Checklist for your understanding 343
Further reading 343

15 A return to the beginning 344
Chapter overview 345
The quest allegory 345
Introduction 346
Presenting research 348
Dissertations, independent studies and the thesis 348
Research journals 350
Research reports 351
Conference papers 351
Research posters 352
Research as professional development 353
Overcoming writer's block 356
Concluding thoughts 358
Elevate your perspective 359
Research as transformation 360
Core points 361
Checklist for your understanding 362
Further reading 362

Glossary 363
