<b>List of contributors</b>	xiii
<b>Foreword</b>	xvii
<b>Preface</b>	xx
<b>About the companion website</b>	xxii
<b>The Scenarios</b>	xxiiii
<b>Section 1 Starting your dissertation journey</b> 1	
<b>1 Starting the journey of your final-year project</b>	3
<i>Megan Bonner-Janes</i>	
What is a final-year project?	3
Why do nurses need to do a research-based project?	5
Undergraduate versus postgraduate projects	6
What are the features of a degree education?	7
Features of a final-year project	8
Planning your final-year project: essential considerations	9
Completing your final-year project and gaining a good classification	11
Don't panic!	13
<b>2 Introduction to writing your evidence-based practice dissertation/project</b>	14
<i>Alan Glasper, and Diane Carpenter</i>	
Sample guidelines for students undertaking a nursing associate project, an undergraduate healthcare project/dissertation or a master's degree project	14
Typical learning outcomes for a nursing associate course 2000-word literature review	15
Typical learning outcomes for an undergraduate evidence-based practice dissertation/project	15

Typical learning outcomes for a postgraduate evidence-based practice dissertation/project	16
The dissertation/project/assignment	17
Guidelines for students undertaking a nursing associate evidence-based practice assignment	18
Guidelines for students undertaking an undergraduate evidence-based practice final project	19
Guidelines for students undertaking an undergraduate evidence-based practice dissertation	20
Guidelines for a typical postgraduate evidence-based practice dissertation/project module learning outcomes	22
Conclusion	23
<b>3 Clinical effectiveness and evidence-based practice: background and history</b>	<b>24</b>
<i>Mary O'Toole and Alan Glasper</i>	
Introduction	24
Historical aspects of evidence-based practice	25
The contribution of the nursing profession to evidence-based practice	27
How is evidence sourced?	27
Conclusion	29
<b>4 What is evidence-based practice and clinical effectiveness?</b>	<b>31</b>
<i>Andrée le May</i>	
Clinical effectiveness	31
Evidence-based practice	35
Making care more effective	38
<b>5 The challenges of delivering practice based on best evidence (in primary, secondary and tertiary settings)</b>	<b>43</b>
<i>Andrée le May</i>	
An evidence base for practice	43
Barriers to the use of research evidence in practice	45
Encouraging the use of research evidence in practice	48
Conclusion	53
<b>Section 2 Sourcing and accessing evidence for your dissertation</b>	<b>57</b>
<b>6 Sourcing the best evidence</b>	<b>59</b>
<i>Diane Carpenter and Alan Glasper</i>	
Exploring and refining your question	59
Searching for research articles	62
Devising your search strategy	66

Accessing journal literature	69
The Cochrane Library	70
Websites and other resources	74
Support from your library service	75
Conclusion	78
<b>7 What is grey literature and where can it be found?</b>	<b>80</b>
<i>Diane Carpenter and Alan Glasper</i>	
What is 'grey literature'?	80
Where can I find grey literature?	81
Important websites	82
What about Google scholar?	82
<b>8 Harvard or Vancouver: getting it right all the time</b>	<b>83</b>
<i>Diane Carpenter and Alan Glasper</i>	
Vancouver system	84
Harvard system	85
Use of computer referencing packages	87
Conclusion	88
<b>9 Posing an evidence-based practice question: using the PICO and SPICE models</b>	<b>89</b>
<i>Alan Glasper and Diane Carpenter</i>	
What is the PICO model?	90
Examples of PICO formulated questions	91
What is the SPICE model?	94
<b>Section 3 Developing your healthcare/evidence-based practice dissertation</b>	<b>97</b>
<b>10 Managing your time wisely</b>	<b>99</b>
<i>Diane Carpenter and Alan Glasper</i>	
An evidence-based practice healthcare dissertation/final project or evidence-informed decision-making assignment as a frame of mind	100
Conclusion	104
<b>11 Developing your study skills</b>	<b>106</b>
<i>Diane Carpenter, and Alan Glasper</i>	
Knowing yourself	108
Being organised	111
Organising things in terms of what goes where	112
Consolidating your ideas and activities by talking to others about it	112

## viii **Contents**

<b>12 Getting the most from your personal tutor</b>	<b>114</b>
<i>Ellen Kitson-Reynolds</i>	
Before approaching your academic support	114
How to get started	115
Agreeing a working pattern	116
Anticipating and preventing problems	116
Good planning is the essence	117
Supervision at a distance	118
Additional support	118
<b>Section 4 Preparing to use research evidence in your dissertation</b>	<b>121</b>
<b>13 Clinical standards, audit and inspection</b>	<b>123</b>
<i>Diane Carpenter and Alan Glasper</i>	
What is healthcare governance?	124
What are the seven pillars of clinical governance? Are they still relevant in contemporary practice?	126
The role of the Care Quality Commission	127
NICE quality standards	132
Developing audit tools to measure compliance to policy standards	136
Healthcare regulators	139
Responding to an adverse incident	143
<b>14 Understanding quantitative research</b>	<b>146</b>
<i>Diane Carpenter and Alan Glasper</i>	
Is it a quantitative study?	146
Why quantitative?	148
Types of quantitative studies	148
Key elements in a quantitative study	151
Strengths of quantitative studies	154
Limitations	154
Conclusion	154
<b>15 Understanding qualitative research</b>	<b>156</b>
<i>Diane Carpenter and Alan Glasper</i>	
Why qualitative?	157
Types of qualitative studies	158
Key elements in a qualitative study	159
Strengths of qualitative studies	160
Limitations	162
Conclusion	163

<b>16 Using historical literature</b>	<b>164</b>
<i>Diane Carpenter and Alan Glasper</i>	
What is the use of history in a world focused on scientific evidence?	165
Where does historical research fit methodologically?	165
Would such a study constitute primary research or would it be possible to appraise historical research that others had done?	167
Could I possibly justify doing a historical evidence-based practice project?	168
How do I go about undertaking a study based on historical evidence?	168
<b>Section 5 Critically appraising evidence</b>	<b>175</b>
<b>17 Selecting and using appraisal tools: how to interrogate research papers</b>	<b>177</b>
<i>Diane Carpenter and Alan Glasper</i>	
Introduction	177
What is critical appraisal? What are critical appraisal tools?	
Why is critical appraisal of published research important? What does critical appraisal mean to nurses and other healthcare professionals?	178
What is the best critical appraisal tool to use?	179
Commencing your critique	180
Is an individual paper worth adding to the shortlist? Preparing your initial long shortlist	181
Commencing your initial read and review of an empirical journal paper	181
Points to consider about the paper(s) before using any critiquing tool	183
Applying a critiquing framework tool of your choice to your selected papers	185
Critiquing models	187
Conclusion	196
<b>18 Critically reviewing qualitative papers using a CASP critiquing tool</b>	<b>199</b>
<i>Diane Carpenter and Alan Glasper</i>	
Screening questions	200
The CASP qualitative questions	201
Data analysis	204
Research findings	204

## x **Contents**

The value of the research	205
Reflection	205
<b>19 Critically reviewing quantitative papers using a CASP critiquing tool</b>	<b>207</b>
<i>Diane Carpenter and Alan Glasper</i>	
Question 1 ‘Did the study ask a clearly focused question?’	208
Question 2 ‘Was this a randomised controlled trial and was it appropriately so?’	209
Question 3 ‘Were participants appropriately allocated to intervention and control groups?’	211
Question 4 ‘Were participants, staff and study personnel “blind” to participants study group?’	211
Question 5 ‘Were all the participants who entered the trial accounted for at its conclusion?’	213
Question 6 ‘Were the participants in all groups followed up and data collected in the same way?’	213
Question 7 ‘Did the study have enough participants to minimise the play of chance?’	213
Question 8 ‘How are the results presented and what is the main result?’	214
Question 9 ‘How precise are these results?’	215
Question 10 ‘Were all important outcomes considered so the results can be applied?’	215
<b>20 Critically reviewing a journal paper using the Parahoo model</b>	<b>217</b>
<i>Diane Carpenter and Alan Glasper</i>	
Introduction	217
Framework for appraisal	218
Conclusion	228
<b>Section 6 Taking your dissertation further: disseminating evidence, knowledge transfer; writing as a professional skill</b>	<b>231</b>
<b>21 Publishing your work or making a conference or poster presentation</b>	<b>233</b>
<i>Diane Carpenter and Alan Glasper</i>	
Your dissertation or final assignment is complete: what next?	233
Motivation	234
Conference poster or abstract and presentation at a conference	235
Writing a paper for publication	241
What will you do with your evidence-based practice healthcare dissertation/final project or evidence-informed decision-making assignment?	247

<b>22 Reflecting on your evidence-based practice healthcare dissertation/final project or evidence-informed decision-making assignment journey</b>	<b>248</b>
<i>Justine Barksby</i>	
Reflection	248
Frameworks for reflection	250
Some final points on reflection	256
Conclusion	257
<b>23 Building the architecture of your dissertation</b>	<b>258</b>
<i>Diane Carpenter and Alan Glasper</i>	
Writing your evidence-based practice healthcare dissertation/final project or evidence-informed decision-making assignment	258
<b>Section 7 Bonus chapters (website only)</b>	<b>265</b>
<b>24 Public health: writing a master's level dissertation</b>	
<i>Sarah Adrienne Hughes</i>	
<b>25 Critically reviewing a journal paper using the Rees model</b>	
<i>Diane Carpenter and Colin Rees</i>	
<b>26 Managing a learning difference</b>	
<i>Michelle Cowen</i>	
<b>27 Research governance in practice</b>	
<i>Jane March-McDonald</i>	
<b>28 Using evidence in practice</b>	
<b>Index</b>	<b>267</b>
