

CONTENTS

| | |
|--|----|
| Foreword..... | 3 |
| Chapter 1- Introduction..... | 6 |
| 1. Current state..... | 6 |
| 2. ISO 13822..... | 7 |
| 3. Foreseen development of standards for existing structures | 8 |
| 4. Concluding remarks..... | 11 |
| Chapter 2- General framework..... | 13 |
| 1. Introduction..... | 13 |
| 2. Principles of assessment..... | 14 |
| 3. Investigation..... | 15 |
| 4. Basic variables..... | 16 |
| 5. Evaluation of inspection results..... | 17 |
| 6. Structural analysis..... | 18 |
| 7. Verification..... | 19 |
| 8. Assessment in the case of damage..... | 19 |
| 9. Final report and decision..... | 20 |
| 10. Concluding remarks..... | 21 |
| Annex terminology..... | 22 |
| Chapter 3- Procedures for the assessment of existing structures..... | 30 |
| 1. Introduction..... | 30 |
| 2. Hierachy of terms..... | 31 |
| 3. Assesmet procedure according to ČSN ISO 13822..... | 32 |
| 3.1 Entry data..... | 32 |
| 3.2 Preliminary assessment..... | 32 |
| 3.2.1 Investigation..... | 32 |
| 3.2.2 Analysis..... | 39 |
| 3.2.3 Preliminary verification of a structures..... | 41 |
| 3.2.4 Decision on immediate measure..... | 42 |
| 3.2.5 Recommendations for futher procedure..... | 42 |
| 3.3 Detailed assessment..... | 43 |
| 3.4 Assessment results..... | 44 |
| 4. The structure of the report..... | 45 |
| 5. Concluding remarks..... | 45 |
| Chapter 4 – Method for assessment of buildings – partial factor method..... | 47 |
| 1. Introduction..... | 47 |
| 2. Principles of verification based on limit states using the partial factor method..... | 48 |
| 2.1 Load..... | 48 |
| 2.1.1 Characteristic load values..... | 48 |
| 2.1.1.1 Values of pernament characteristic loads..... | 48 |
| 2.1.1.2 Values of variable characteristic loads..... | 50 |
| 2.1.1.3 Values of accidental loads..... | 51 |
| 2.1.2 Representative values of actions..... | 51 |
| 2.1.3 Design values of actions..... | 52 |
| 2.1.4 Design values of load effects..... | 52 |
| 2.1.5 Partial factors of actions..... | 52 |
| 2.1.6 Load combinations for load-bearing capacity limit states..... | 52 |

| | |
|--|-----|
| 2.1.6.1 combinations for permanent and temporary design situations..... | 52 |
| 2.1.6.2 Combinations for exceptional, seismic and fatigue design situations..... | 55 |
| 2.1.7 Load combinations for limit states of serviceability..... | 55 |
| 2.2 Material properties..... | 56 |
| 2.2.1 Characteristic value of material properties..... | 55 |
| 2.2.2 Design value of material properties..... | 57 |
| 2.2.3 Design value of material resistance..... | 57 |
| 2.2.4 Partial factors of material..... | 57 |
| 3. Concluding remarks..... | 57 |
| Chapter 5- Examples..... | 59 |
| Example 1 - Investigation and evaluation of part a ceiling structures..... | 59 |
| 1. Report..... | 59 |
| 2. Concluding remarks..... | 65 |
| Example 2 - Investigation and evaluation of the music pavilion..... | 66 |
| 1. Report..... | 66 |
| 2. Concluding remarks..... | 72 |
| Example 3 - Investigation and evaluation of the object villa..... | 73 |
| 1. Report..... | 73 |
| 2. Concluding remarks..... | 82 |
| Annex A – Evaluation of results..... | 83 |
| A.1 General..... | 83 |
| A.2 Characteristics of Location..... | 83 |
| A.3 Characteristics of Dispersion..... | 84 |
| A.4 Characteristics of Asymmetry and Kurtosis..... | 85 |
| A.5 General and Central Moments..... | 86 |
| A.6 Combination of Two Random Samples..... | 87 |
| A.7 Note on Terminology and Software Products..... | 89 |
| A.8 Grouped Data, Histogram..... | 90 |
| Annex B – Partial faktors..... | 93 |
| B.1 Introduction..... | 93 |
| B.2 Target reliability level..... | 93 |
| B.3 Design value method..... | 94 |
| B.4 Partial faktors method..... | 95 |
| B.5 Partial faktors for material..... | 96 |
| B.6 Partial faktors for permanent load..... | 97 |
| B.7 Partial faktors for variable loads. | 98 |
| B.8 Concluding remarks..... | 100 |
| Annex C – Report on assessment..... | 102 |
| C.1 Introduction..... | 102 |
| C.2 Report format based on ISO 13822. | 102 |
| C.3 An example of the final report | 104 |
| C.4 Concluding remarks..... | 109 |
