

CONTENT

Introduction _____ 9

PRACTICAL CLASS 1 _____ 11

Theoretical part 1: The Microscopy _____ 11

Practical part 1: How to work with a microscope, observing temporary and permanent mounts _____ 19

PRACTICAL CLASS 2 _____ 25

Theoretical part 2: Osmosis _____ 25

Practical part 2: The osmotic effect in animal and plant cells _____ 28

PRACTICAL CLASS 3 _____ 33

Theoretical part 3: Genetics _____ 33

Practical part 3: Observation of genotype and phenotype expression _____ 38

PRACTICAL CLASS 4 _____ 43

Theoretical part 4: Cell culture _____ 43

Practical part 4: Cell counting in a Bürker chamber _____ 45

PRACTICAL CLASS 5 _____ 51

Theoretical part 5: *Paramecium caudatum* _____ 51

Practical part 5: Observation of *Paramecium caudatum*, the photodynamic effect, and chemotaxis _____ 54

PRACTICAL CLASS 6 _____ 61

Theoretical part 6: Cell division: Mitosis and Cytokinesis _____ 61

Practical part 6: Observation of permanent preparations of cells in a mitotic phase _____ 64

List of laboratory materials in the practical classes _____ 69

Literature _____ 73
