

Contents

Preface	xi
SECTION I. INTRODUCTION	1
1. The General & Cellular Basis of Medical Physiology	1
Introduction 1	
General Principles 1	
Functional Morphology of the Cell 8	
Structure & Function of DNA & RNA 18	
Transport Across Cell Membranes 28	
The Capillary Wall 35	
Intercellular Communication 36	
Homeostasis 48	
Aging 48	
Section I References 49	
SECTION II. PHYSIOLOGY OF NERVE & MUSCLE CELLS	51
2. Excitable Tissue: Nerve	51
Introduction 51	
Nerve Cells 51	
Excitation & Conduction 54	
Ionic Basis of Excitation & Conduction 58	
Properties of Mixed Nerves 60	
Nerve Fiber Types & Function 60	
Neurotrophins 61	
Neuroglia 63	
3. Excitable Tissue: Muscle	65
Introduction 65	
Skeletal Muscle 65	
Morphology 65	
Electrical Phenomena & Ionic Fluxes 68	
Contractile Responses 68	
Energy Sources & Metabolism 74	
Properties of Skeletal Muscles in the Intact Organism 75	
Cardiac Muscle 78	
Morphology 78	
Electrical Properties 78	
Mechanical Properties 78	
Metabolism 81	
Pacemaker Tissue 81	
Smooth Muscle 82	
Morphology 82	
Visceral Smooth Muscle 82	
Multi-Unit Smooth Muscle 84	
4. Synaptic & Junctional Transmission	85
Introduction 85	
Synaptic Transmission 85	
Functional Anatomy 85	
Electrical Events in Postsynaptic Neurons 88	
Inhibition & Facilitation at Synapses 91	
Chemical Transmission of Synaptic Activity 94	
Principal Neurotransmitter Systems 94	
Synaptic Plasticity & Learning 116	
Neuromuscular Transmission 116	
Neuromuscular Junction 116	
Nerve Endings in Smooth & Cardiac Muscle 118	
Denervation Hypersensitivity 119	

5. Initiation of Impulses in Sense Organs.....	121
Introduction	121
Sense Organs & Receptors	121
The Senses	121
Section II References	127
 SECTION III. FUNCTIONS OF THE NERVOUS SYSTEM	 129
6. Reflexes	129
Introduction	129
Monosynaptic Reflexes:	
The Stretch Reflex	129
Polysynaptic Reflexes: The Withdrawal Reflex	134
General Properties of Reflexes	137
 7. Cutaneous, Deep, & Visceral Sensation	 138
Introduction	138
Pathways	138
Touch	141
Proprioception	142
Temperature	142
Pain	142
Other Sensations	147
 8. Vision.....	148
Introduction	148
Anatomic Considerations	148
The Image-Forming Mechanism	152
The Photoreceptor Mechanism	156
Responses in the Visual Pathways & Cortex	160
Color Vision	163
Other Aspects of Visual Function	166
Eye Movements	168
 9. Hearing & Equilibrium	 171
Introduction	171
Anatomic Considerations	171
Hair Cells	175
Hearing	176
Vestibular Function	183
 10. Smell & Taste	 185
Introduction	185
Smell	185
Taste	188
Receptor Organs & Pathways	188
 11. Alert Behavior, Sleep, & the Electrical Activity of the Brain.....	 192
Introduction	192
The Thalamus & the Cerebral Cortex	192
The Reticular Formation & the Reticular Activating System	192
Evoked Cortical Potentials	193
The Electroencephalogram	194
Physiologic Basis of the EEG, Consciousness, & Sleep	196
 12. Control of Posture & Movement.....	 202
Introduction	202
General Principles	202
Corticospinal & Corticobulbar System	203
Anatomy & Function	203
Posture-Regulating Systems	206
Spinal Integration	207
Medullary Components	210
Midbrain Components	211
Cortical Components	212
Basal Ganglia	213
Cerebellum	217

13. The Autonomic Nervous System	223
Introduction	223
Anatomic Organization of Autonomic Outflow	223
Chemical Transmission at Autonomic Junctions	223
Responses of Effector Organs to Autonomic Nerve Impulses	226
14. Central Regulation of Visceral Function	232
Introduction	232
Medulla Oblongata	232
Hypothalamus	233
Anatomic Considerations	233
Hypothalamic Function	234
Relation to Autonomic Function	234
Relation to Sleep	235
Relation to Cyclic Phenomena	235
Hunger	235
Thirst	240
Control of Posterior Pituitary Secretion	242
Control of Anterior Pituitary Secretion	248
Temperature Regulation	251
15. Neural Basis of Instinctual Behavior & Emotions	256
Introduction	256
Anatomic Considerations	256
Limbic Functions	256
Sexual Behavior	257
Other Emotions	259
Motivation & Addiction	260
Brain Chemistry & Behavior	261
16. "Higher Functions of the Nervous System": Conditioned Reflexes, Learning, & Related Phenomena	266
Introduction	266
Methods	266
Learning & Memory	266
Functions of the Neocortex	272
Section III References	276

SECTION IV. ENDOCRINOLOGY, METABOLISM, & REPRODUCTIVE FUNCTION ... 279

17. Energy Balance, Metabolism, & Nutrition	279
Introduction	279
Energy Metabolism	279
Intermediary Metabolism	282
Carbohydrate Metabolism	285
Protein Metabolism	292
Fat Metabolism	298
Nutrition	311
18. The Thyroid Gland	317
Introduction	317
Anatomic Considerations	317
Formation & Secretion of Thyroid Hormones	317
Transport & Metabolism of Thyroid Hormones	321
Effects of Thyroid Hormones	323
Regulation of Thyroid Secretion	326
Clinical Correlates	328
19. Endocrine Functions of the Pancreas & Regulation of Carbohydrate Metabolism	333
Introduction	333
Islet Cell Structure	333
Structure, Biosynthesis, & Secretion of Insulin	334
Fate of Secreted Insulin	335
Effects of Insulin	336
Mechanism of Action	338
Consequences of Insulin Deficiency	340

Insulin Excess	344	Effects of Other Hormones & Exercise	
Regulation of Insulin Secretion	345	on Carbohydrate Metabolism	351
Glucagon	348	Hypoglycemia & Diabetes Mellitus in Humans	353
Other Islet Cell Hormones	350		
20. The Adrenal Medulla & Adrenal Cortex	356		
Introduction	356	Physiologic Effects of	
Adrenal Morphology	356	Glucocorticoids	369
Adrenal Medulla	358	Pharmacologic & Pathologic Effects	
Structure & Function of Medullary		of Glucocorticoids	370
Hormones	358	Regulation of Glucocorticoid	
Regulation of Adrenal Medullary		Secretion	372
Secretion	361	Effects of Mineralocorticoids	375
Adrenal Cortex	361	Regulation of Aldosterone Secretion	377
Structure & Biosynthesis of		Role of Mineralocorticoids in the	
Adrenocortical Hormones	361	Regulation of Salt Balance	380
Transport, Metabolism, & Excretion		Summary of the Effects of	
of Adrenocortical Hormones	366	Adrenocortical Hyper-	
Effects of Adrenal Androgens		& Hypofunction in Humans	380
& Estrogens	368		
21. Hormonal Control of Calcium Metabolism & the Physiology of Bone	382		
Introduction	382	The Parathyroid Glands	390
Calcium & Phosphorus Metabolism	382	Calcitonin	393
Bone Physiology	383	Effects of Other Hormones & Humoral Agents on	
Vitamin D & the		Calcium Metabolism	395
Hydroxycholecalciferols	387		
22. The Pituitary Gland	396		
Introduction	396	Physiology of Growth	404
Morphology	396	Pituitary Insufficiency	408
Intermediate-Lobe Hormones	397	Pituitary Hyperfunction in Humans	409
Growth Hormone	398		
23. The Gonads: Development & Function of the Reproductive System	411		
Introduction	411	Gametogenesis & Ejaculation	424
Sex Differentiation & Development	411	Endocrine Function of the Testes	428
Chromosomal Sex	411	Control of Testicular Function	431
Embryology of the Human		Abnormalities of Testicular Function	433
Reproductive System	413	The Female Reproductive System	433
Aberrant Sexual Differentiation	414	The Menstrual Cycle	433
Puberty	418	Ovarian Hormones	438
Precocious & Delayed Puberty	420	Control of Ovarian Function	444
Menopause	421	Abnormalities of Ovarian Function	447
Pituitary Gonadotropins & Prolactin	421	Pregnancy	448
The Male Reproductive System	424	Lactation	451
Structure	424		

24. Endocrine Functions of the Kidneys, Heart, & Pineal Gland.....	454
Introduction	454
The Renin-Angiotensin System	454
Erythropoietin	459
Section IV References	465
Hormones of the Heart & Other Natriuretic Factors	460
Pineal Gland	462
SECTION V. GASTROINTESTINAL FUNCTION	467
25. Digestion & Absorption.....	467
Introduction	467
Carbohydrates	467
Proteins & Nucleic Acids	471
Lipids	473
Absorption of Water & Electrolytes	475
Absorption of Vitamins & Minerals	477
26. Regulation of Gastrointestinal Function.....	479
Introduction	479
General Considerations	479
Gastrointestinal Hormones	482
Mouth & Esophagus	488
Stomach	491
Section V References	512
Exocrine Portion of the Pancreas	497
Liver & Biliary System	498
Small Intestine	504
Colon	508
SECTION VI. CIRCULATION	515
27. Circulating Body Fluids.....	515
Introduction	515
Blood	515
Bone Marrow	515
White Blood Cells	516
Immunity	520
Platelets	531
Red Blood Cells	532
Blood Types	537
Plasma	539
Hemostasis	540
Lymph	546
28. Origin of the Heartbeat & the Electrical Activity of the Heart.....	547
Introduction	547
Origin & Spread of Cardiac Excitation	547
The Electrocardiogram	549
Cardiac Arrhythmias	554
Electrocardiographic Findings in Other Cardiac & Systemic Diseases	561
29. The Heart as a Pump.....	565
Introduction	565
Mechanical Events of the Cardiac Cycle	565
Cardiac Output	570
30. Dynamics of Blood & Lymph Flow.....	577
Introduction	577
Functional Morphology	577
Biophysical Considerations	581
Arterial & Arteriolar Circulation	587
Capillary Circulation	590
Lymphatic Circulation & Interstitial Fluid Volume	593
Venous Circulation	595
31. Cardiovascular Regulatory Mechanisms.....	597
Introduction	597
Local Regulation	597
Substances Secreted by the Endothelium	598
Systemic Regulation by Hormones	600
Systemic Regulation by the Nervous System	602

32. Circulation Through Special Regions.....	611
Introduction	611
Cerebral Circulation	611
Anatomic Considerations	611
Cerebrospinal Fluid	612
The Blood-Brain Barrier	614
Cerebral Blood Flow & Its Regulation	616
Brain Metabolism & Oxygen Requirements	619
Coronary Circulation	620
Splanchnic Circulation	623
Cutaneous Circulation	625
Placental & Fetal Circulation	627
33. Cardiovascular Homeostasis in Health & Disease.....	630
Introduction	630
Compensations for Gravitational Effects	630
Exercise	632
Inflammation & Wound Healing	635
Shock	636
Hypertension	641
Heart Failure	643
Section VI References	644
SECTION VII. RESPIRATION.....	647
34. Pulmonary Function.....	647
Introduction	647
Properties of Gases	647
Anatomy of the Lungs	649
Mechanics of Respiration	650
Gas Exchange in the Lungs	660
Pulmonary Circulation	661
Other Functions of the Respiratory System	664
35. Gas Transport Between the Lungs & the Tissues.....	666
Introduction	666
Oxygen Transport	666
Carbon Dioxide Transport	669
36. Regulation of Respiration.....	671
Introduction	671
Neural Control of Breathing	671
Regulation of Respiratory Activity	672
Chemical Control of Breathing	672
Nonchemical Influences on Respiration	678
37. Respiratory Adjustments in Health & Disease.....	681
Introduction	681
Effects of Exercise	681
Hypoxia	683
Hypoxic Hypoxia	684
Other Forms of Hypoxia	690
Oxygen Treatment	691
Hypercapnia & Hypocapnia	692
Other Respiratory Abnormalities	692
Diseases Affecting the Pulmonary Circulation	694
Effects of Increased Barometric Pressure	694
Artificial Respiration	695
Section VII References	697
SECTION VIII. FORMATION & EXCRETION OF URINE.....	699
38. Renal Function & Micturition.....	699
Introduction	699
Functional Anatomy	699
Renal Circulation	702
Glomerular Filtration	705
Tubular Function	708
Water Excretion	713
Acidification of the Urine & Bicarbonate Excretion	720

Regulation of Na^+ & Cl^- Excretion	723	Effects of Disordered Renal Function	724
Regulation of K^+ Excretion	724	The Bladder	726
Diuretics	724		

39. Regulation of Extracellular Fluid Composition & Volume..... 729

Introduction	729	Defense of Specific Ionic Composition	730
Defense of Tonicity	729	Defense of H^+ Concentration	730
Defense of Volume	729		

Section VIII References 738

Self-Study: Objectives, Essay Questions, & Multiple-Choice Questions (*black edges*) 739

Answers to Quantitative & Multiple-Choice Questions (*black edges*)..... 807

Appendix 811

General References	811	Some Standard Respiratory Symbols	821
Normal Values & the Statistical		Equivalents of Metric, United States,	
Evaluation of Data	811	& English Measures	821
Abbreviations & Symbols Commonly		Greek Alphabet	822
Used in Physiology	814		

Index 823

Standard Atomic Weights *Inside Front Cover*

Ranges of Normal Values in Human Whole Blood, Plasma, or Serum *Inside Back Cover*
