List of Figures	xxv
List of Tables	xxix
About the Author	xxxiii

SECTION I Basic Sciences

Chapter 1 Introduction.....	3
1.1 Historical Perspective	3
1.1.1 Water Supply	3
1.1.2 History of Sanitary Engineering	4
1.2 Hydrologic Cycle	4
1.3 Urban Water Cycle	6
1.4 Essentials of a Water Supply System.....	7
1.5 Need for Wastewater Treatment System.....	8
1.6 Global Issue	9
1.7 Role of the Engineer.....	9
 Chapter 2 Standards of Measurement.....	 11
2.1 Systems of Units	11
2.2 Measures of Dimension	11
2.3 Dimensions and Units.....	12
2.4 Derived Units.....	12
2.4.1 Force	13
2.4.2 Mass and Weight	13
2.4.3 Pressure	14
2.4.4 Energy and Power.....	14
2.5 Symbols and Suffixes	14
2.6 Significant Figures.....	15
2.7 Numerical Precision	16
2.7.1 Absolute Precision.....	16
2.7.2 Relative Precision	16
2.8 Conversions	17
2.8.1 Temperature Conversions	17
2.8.2 Steps for Unit Cancellation	20

Chapter 3	Basic Hydraulics	23
3.1	Flow Velocity.....	23
3.2	Continuity Equation	24
3.3	Energy and Head	25
3.3.1	Flow Energy	25
3.3.2	Kinetic Energy	25
3.3.3	Gravitational Potential Energy	26
3.3.4	Hydraulic Head.....	26
3.3.5	Total Head	27
3.4	Bernoulli's Equation.....	28
3.4.1	Limitations of Bernoulli's Equation.....	28
3.4.2	Static Flow Conditions	29
3.5	General Energy Equation	30
3.6	Power	31
3.7	Flow Equations.....	33
3.7.1	Darcy-Weisbach Flow Equation	33
3.7.2	Hazen-Williams Flow Equation.....	36
3.7.3	Manning's Flow Equation	38
Chapter 4	Basic Chemistry	43
4.1	States of Matter	43
4.1.1	Structure of Atom.....	43
4.1.2	Periodic Table.....	44
4.2	Compounds.....	45
4.3	Acids and Bases.....	47
4.3.1	Neutralization.....	47
4.3.2	The pH Scale and Alkalinity.....	47
4.4	Solutions	49
4.5	Expressing Concentrations	50
4.5.1	Mass per Unit Volume, $C_{m/v}$	50
4.5.2	Mass per Unit Mass, $C_{m/m}$	50
4.6	Stoichiometry	51
4.7	Chemical Feeding.....	52
4.8	Common Chemicals	55
4.8.1	Activated Carbon.....	55
4.8.2	Alum (Aluminium Sulphate).....	56
4.8.3	Chlorine (Cl)	56
4.8.4	Lime and Soda Ash	57
Chapter 5	Microbial Water Quality.....	61
5.1	Basics of Microbiology.....	61
5.1.1	Bacteria.....	61

5.1.2	Algae	62
5.1.3	Fungi.....	62
5.1.4	Protozoa.....	63
5.1.5	Viruses.....	63
5.2	Microbiological Contaminants	63
5.3	Microbiological Tests	64
5.3.1	Indicator Organisms	64
5.3.2	Membrane Filtration Method	65
5.3.3	Multiple-Tube Fermentation Method.....	65
5.3.4	Sample Collection for Microbiological Testing	66
5.4	Biochemical Oxygen Demand.....	67
5.5	Nitrogen (N)	69
5.6	Solids	70
5.7	Hazardous Contaminants	70
5.8	Sampling.....	70
5.8.1	Grab Samples	71
5.8.2	Composite Samples	71

SECTION II *Water Treatment*

Chapter 6	Sources of Water Supply	77
6.1	Surface Water	77
6.1.1	Lakes and Ponds.....	77
6.1.2	Rivers and Streams.....	77
6.1.3	Artificial Reservoirs	78
6.1.4	Seawater	78
6.1.5	Wastewater Reclamation	78
6.1.6	Stored Rainwater	79
6.1.7	Yield Assessment	79
6.2	Intake Works.....	79
6.2.1	Reservoir Intakes.....	79
6.2.2	Twin Tower River intake	80
6.2.3	Single Well Type River Intake	80
6.2.4	Lake Intake.....	81
6.3	Water Transmission	81
6.4	Groundwater	81
6.4.1	Water Wells	81
6.4.2	Springs.....	82
6.4.3	Infiltration Galleries	82
6.4.4	Collector Wells	82
6.5	Well Types	83
6.6	Well Hydraulics	84

6.6.1	Steady Flow to an Artesian Well.....	84
6.6.2	Unconfined Well Equation	87
6.6.3	Modified Non-Equilibrium Equation	89
6.7	Failure of Wells and Remediation	90
6.8	Sanitary Protection.....	90
6.9	Well Abandonment.....	90
6.10	Water Quantity	91
6.11	Water Quality	91
6.12	Groundwater under the Influence (GUDI)	92
6.13	Choice of Source of Water Supply	93
Chapter 7	Water Demand and Water Quality	97
7.1	Design Period	97
7.2	Forecasting Population	97
7.2.1	Arithmetical Increase.....	98
7.2.2	Geometrical Increase Method.....	98
7.2.3	Incremental Increase Method.....	99
7.3	Estimating Water Demand	100
7.3.1	Domestic.....	100
7.3.2	Industrial and Commercial.....	101
7.3.3	Public Use.....	101
7.3.4	Firefighting	101
7.4	Total Demand	104
7.5	Factors Affecting per Capita Demand.....	104
7.6	Variation in Demand	106
7.6.1	Seasonal Variation.....	106
7.6.2	Daily Variation	106
7.6.3	Hourly Variation.....	107
7.7	Water Quality Standards	108
7.8	Water Quality Parameters	109
7.9	Physical Parameters.....	109
7.9.1	Turbidity	109
7.9.2	Color	110
7.9.3	Temperature.....	110
7.9.4	Taste and Odor	110
7.9.5	Solids	111
7.9.6	Water Density	111
7.9.7	Viscosity	112
7.10	Chemical Parameters.....	113
7.10.1	Hydrogen Ion Concentration (pH).....	113
7.10.2	Alkalinity	113
7.10.3	Hardness.....	113
7.10.4	Iron and Manganese	114
7.10.5	Fluorides.....	114

7.10.6	Nitrogen.....	115
7.10.7	Dissolved Gases.....	115
Chapter 8	Coagulation and Flocculation.....	119
8.1	Source of Supply and Treatment	119
8.2	Preliminary Treatment	120
8.3	Conventional Treatment	121
8.4	Coagulation.....	121
8.5	Coagulating Chemicals	122
8.5.1	Primary coagulants	122
8.5.2	Coagulant Aids.....	123
8.6	Chemistry of Coagulation	124
8.6.1	Chemical Reactions.....	124
8.6.2	Alum Floc (Sludge)	125
8.7	Flocculation Phenomenon	127
8.7.1	Mixers.....	127
8.7.2	Flocculation Tanks	128
8.7.3	Factors Affecting Flocculation.....	130
8.8	Jar Testing.....	131
8.9	Operational Control Tests.....	132
8.9.1	Acidity Tests.....	132
8.9.2	Turbidity Tests	132
8.9.3	Filterability Tests.....	133
8.9.4	Zeta Potential	133
8.9.5	Streaming Current Monitors	133
8.9.6	Particle Counters	133
Chapter 9	Sedimentation.....	137
9.1	Theory of Sedimentation.....	137
9.1.1	Plain Sedimentation	137
9.1.2	Discrete Settling.....	138
9.2	Sedimentation Aided with Coagulation	141
9.3	Sedimentation Basins and Tanks.....	141
9.3.1	Rectangular Basins.....	141
9.3.2	Circular and Square Basins.....	141
9.3.3	Tube Settlers.....	142
9.3.4	Solids Contact Units.....	142
9.3.5	Pulsator Clarifier.....	143
9.3.6	Ballasted Flocculation.....	143
9.4	Design Parameters.....	143
9.4.1	Detention Time.....	143
9.4.2	Surface Overflow Rate	144
9.4.3	Overflow Rate and Removal Efficiency	144

9.4.4	Effective Water Depth.....	144
9.4.5	Mean Flow Velocity	145
9.4.6	Weir Loading Rate	146
9.5	Factors Affecting Operation of Sedimentation	146
9.6	Volume of Sludge	147
9.7	Sludge Disposal	149

Chapter 10 Filtration..... 153

10.1	Filtration Mechanisms.....	153
10.2	Types of Filters	153
10.2.1	Slow Sand Filters (SSFs)	153
10.2.2	Rapid Gravity Filters (RGFs)	154
10.2.3	High-Rate Filters	155
10.2.4	Pressure Filters	155
10.3	Components of a Gravity Filter.....	155
10.3.1	Filter Box.....	156
10.3.2	Filter Media.....	156
10.3.3	Underdrain System.....	157
10.3.4	Surface Wash System	158
10.3.5	Wash-Water Troughs	158
10.3.6	Control Equipment	158
10.4	Filtration Operation	158
10.4.1	Filtering	158
10.4.2	Declining Rate Control	159
10.4.3	Split Flow Control	159
10.4.4	Backwashing	159
10.4.5	Backwash Operation	160
10.4.6	Filtering to Waste	161
10.4.7	Backwashing Key Points.....	161
10.5	Design and Performance Parameters	161
10.5.1	Filtration Rate.....	161
10.5.2	Unit Filter Run Volume	163
10.5.3	Flow Rate and Volume of Water Filtered.....	164
10.5.4	Backwash Rate	164
10.6	Operating Problems.....	165
10.7	Optimum Filter Operation.....	166

Chapter 11 Disinfection..... 169

11.1	Definition.....	169
11.1.1	Primary Disinfection.....	169
11.1.2	Secondary Disinfection.....	169
11.2	Disinfection Methods	170

11.2.1	Removal Processes	170
11.2.2	Inactivation Processes	170
11.3	Chlorine Compounds.....	172
11.3.1	Gas Chlorination	172
11.3.2	Chlorine Safety.....	173
11.4	Hypochlorination.....	173
11.4.1	Calcium Hypochlorite	173
11.4.2	Sodium Hypochlorite	173
11.4.3	Chlorine Dioxide Disinfection	174
11.5	Chemistry of Chlorination.....	174
11.6	Chlorine Practices	178
11.6.1	Chloramination.....	178
11.6.2	Breakpoint Chlorination.....	179
11.6.3	Superchlorination	179
11.6.4	Dechlorination.....	179
11.7	Points of Chlorination	179
11.7.1	Pre-Chlorination.....	179
11.7.2	Post-Chlorination	180
11.7.3	Re-Chlorination.....	180
11.8	Formation of Trihalomethanes	180
11.9	Factors Affecting Chlorine Dosage.....	180
11.10	Gas Chlorination Equipment.....	184
11.11	Chlorine Feed Control.....	185
11.11.1	Manual Control	186
11.11.2	Automatic Proportional Control.....	186
11.11.3	Automatic Residual Control	186
11.11.4	Hypochlorination Facilities	186
11.11.5	Hypochlorinators.....	186
Chapter 12	Water Softening	191
12.1	Types of Hardness	191
12.1.1	Carbonate Hardness	191
12.1.2	Non-Carbonate Hardness	191
12.2	Softening Methods	193
12.2.1	Lime-Soda Ash Softening.....	193
12.2.2	Chemical Dosages	193
12.3	Types of Lime-Soda Ash Processes	195
12.3.1	Selective Calcium Removal.....	195
12.3.2	Excess Lime Treatment.....	196
12.3.3	Split Treatment	197
12.4	Ion-Exchange Softening	198
12.4.1	Removal Capacity	198
12.4.2	Water Treatment Capacity	198

Chapter 13	Miscellaneous Methods I.....	205
13.1	Fluoridation	205
13.1.1	Fluoride Chemicals	205
13.1.2	Fluoridation Systems.....	206
13.2	Defluoridation.....	208
13.2.1	Calcium Phosphate.....	208
13.2.2	Tri-Calcium Phosphate.....	209
13.2.3	Ion Exchange	209
13.2.4	Lime	209
13.2.5	Aluminum Compounds	209
13.2.6	Activated Carbon.....	209
13.3	Iron and Manganese Control	209
13.4	Control Methods	210
13.4.1	Phosphate Treatment	210
13.4.2	Feed System	211
13.5	Removal Methods.....	211
13.5.1	Oxidation by Aeration.....	211
13.5.2	Oxidation with Chlorine.....	211
13.5.3	Oxidation with Permanganate.....	212
13.5.4	Ion Exchange with Zeolites	212
13.6	Arsenic Removal	213
13.7	Nitrate Removal.....	214

Chapter 14	Miscellaneous Methods II.....	217
14.1	Taste and Odor Control	217
14.1.1	Organics in Raw Water	217
14.1.2	Chemical Dosing.....	218
14.2	Taste and Odor Removal	218
14.2.1	Oxidation.....	218
14.2.2	Aeration.....	218
14.2.3	Chemical Oxidation	219
14.2.4	Adsorption.....	220
14.2.5	Forms of Activated Carbon	220
14.3	Membrane Filtration.....	221
14.3.1	Microfiltration and Ultrafiltration	221
14.3.2	Nanofiltration and Reverse Osmosis	222
14.4	Desalination.....	222
14.4.1	Membrane Technology	222
14.4.2	Distillation of Seawater	223
14.5	Water Stabilization	223
14.5.1	Classifying Water Stability	223
14.5.2	Chemistry of Corrosion.....	223
14.5.3	Stability Index	224
14.5.4	Corrosion Control.....	226

SECTION III Water Distribution

Chapter 15	Water Distribution.....	231
15.1	System Components	231
15.2	Methods of Water Distribution.....	232
15.2.1	Gravitational System	232
15.2.2	Pumping System.....	232
15.2.3	Combined Gravity and Pumping System.....	233
15.3	Equalizing Demand.....	233
15.3.1	Equalizing Storage Capacity	233
15.3.2	Other Purposes of Storage.....	235
15.3.3	Types of Storage	235
15.4	Pipeline Layout.....	237
15.4.1	Dead End Systems.....	237
15.4.2	Gridiron System	238
15.4.3	Ring System	238
15.4.4	Radial system	239
15.5	Pipe Material	239
15.5.1	Plastic Pipes.....	239
15.5.2	Cast Iron Pipes	240
15.5.3	Ductile Iron Pipes.....	240
15.5.4	Steel Pipes	240
15.5.5	Cement Concrete and RCC Pipes.....	240
15.5.6	Asbestos Cement Pipes	241
15.6	Pipe Joints.....	241
15.6.1	Flanged Joint	241
15.6.2	Socket and Spigot Joint	241
15.6.3	Flexible Joint	242
15.6.4	Mechanical Joint	243
15.6.5	Expansion Joint	243
15.6.6	Simplex Joint	243
15.7	Pipelaying and Testing.....	244
15.7.1	Anchoring of Pipes.....	244
15.7.2	Backfilling with Earth.....	245
15.7.3	Testing of Pipes	245
15.7.4	Flow Velocity	245
15.8	Valves	246
15.8.1	Gate Valve	246
15.8.2	Globe Valve	246
15.8.3	Air and Vacuum Relief Valves	246
15.8.4	Rotary Valves	247
15.8.5	Special Function Valves	247
15.8.6	Exercising of Valves.....	248

15.9	Cross Contamination	248
15.9.1	Back Pressure	248
15.9.2	Back Siphoning	249
15.9.3	Backflow Prevention.....	249
15.10	Hydrants	250
15.11	Service Connections	250
15.12	Water Meters	250
15.13	Thrust Control	251
15.14	Dual Water Systems	251

Chapter 16 Pipeline Systems..... 253

16.1	Series and Parallel Systems	253
16.2	Equivalent Pipe.....	253
16.3	System Classification.....	255
16.3.1	Class I Systems.....	255
16.3.2	Class II Systems	256
16.3.3	Class III Systems.....	260
16.4	Complex Pipe Networks	260
16.5	Hardy Cross Method	261
16.6	Computer Applications.....	263

Chapter 17 Pumps and Pumping 267

17.1	Positive Displacement Pumps.....	267
17.2	Velocity Pumps.....	267
17.2.1	Types of centrifugal pumps.....	267
17.2.2	Positive Displacement Pump Characteristics	268
17.2.3	Performance Curves of Centrifugal Pumps	268
17.3	System Head	272
17.4	Affinity Laws.....	274
17.5	Specific Speed	275
17.6	Homologous Pumps.....	275
17.7	Multiple Pumps	276
17.8	Cavitation.....	277
17.8.1	Net Positive Suction Head	278
17.8.2	Permissible Suction Lift	279
17.9	Operation and Maintenance	279

Chapter 18 Water Distribution Operation 285

18.1	Head Losses in Water Main	285
18.1.1	Flow Capacity.....	285
18.1.2	Pipe Roughness, Coefficient C.....	286
18.2	Free Flow Velocity and Discharge, Q	287

18.3	Hydrant Testing	287
18.4	Water Quality	290
18.4.1	Monitoring.....	290
18.4.2	Secondary Disinfection.....	290
18.4.3	Flushing and Cleaning of Water Mains	290
18.4.4	Repairs and Breaks	291
18.4.5	Field Disinfection	291

SECTION IV Wastewater Collection

Chapter 19 Wastewater Collection System..... 297

19.1	Sewer Mains	297
19.1.1	Combined Sewers.....	297
19.1.2	Storm Sewers.....	299
19.2	Infiltration & Inflow	299
19.3	Wastewater Flows.....	300
19.4	Sewer Mains	301
19.4.1	Pipe Size.....	301
19.4.2	Sewer Grade	301
19.4.3	Pipe Flow Velocity and Capacity	302
19.4.4	Gravity Sewer Mains.....	303
19.4.5	Force Mains.....	304
19.5	Operation and Maintenance	304
19.5.1	Detecting and Repairing an Obstruction	304
19.5.2	Crown Corrosion	305
19.5.3	Repairing Broken Sections.....	305
19.5.4	Building Services	306
19.5.5	Force Main Maintenance	306
19.6	Inspection	306
19.6.1	Smoke Test	306
19.6.2	Dye Test.....	307
19.6.3	Closed Circuit Television	307
19.7	Inverted Siphon.....	307
19.7.1	Design of Inverted Siphon.....	308
19.8	Manholes	309
19.8.1	Ordinary Manhole.....	309
19.8.2	Constructional Details.....	309
19.8.3	Drop Manholes and Dead-End Manholes.....	310
19.8.4	Manhole Safety	311
19.8.5	Sewer Ventilation	311
19.7.4	Manhole Inspection and Maintenance	311
19.9	Sampling and Flow Measurement.....	312

19.9.1	Flow Measurement in Sewers	312
19.9.2	Sample Collection	312
19.10	Wastewater Pumping	313
19.10.1	Wet Well Lift Stations	313
19.10.2	Dry Well Lift Stations	314
19.11	Wastewater Flow Pumps	314
19.11.1	Wet Wells	315
19.11.2	Screens	315
19.11.3	Electrical and Controls	315
19.12	Lift Station Maintenance	315
19.12.1	Screening Baskets and Bar Screens	315
19.12.2	Wet Well Floor Maintenance	316
19.12.3	Sump Pump Operation and Maintenance	317
19.13	Pump Operating Sequence	317
19.13.1	Level Setting	317
19.13.2	Pumping Rate in Lift Stations	318
Chapter 20	Design of Sewers	327
20.1	Open Channel Flow	327
20.1.1	Flow Classification	327
20.1.2	Hydraulic Slope	327
20.2	Manning's Flow Equation	328
20.2.1	Hydraulic Radius	329
20.2.2	Uniform Flow Problems	329
20.2.3	Circular Pipes Flowing Full	329
20.3	Efficient Conveyance Section	331
20.4	Maximum and Minimum Flow Velocities	331
20.4.1	Minimum Flow Velocity	331
20.4.2	Maximum Velocity or Non-Scouring Velocity	332
20.5	Partial Full Pipes	333
20.6	Storm Drainage	335
20.7	Rational Method	336
20.7.1	Runoff Coefficient	336
20.7.2	Time of Concentration	336
20.7.3	Rainfall Intensity	338
20.7.4	Areal Weighing of Runoff Coefficients	339
20.7.5	Limitations of Rational Method	339
20.7.6	Urban Catchments	341
Chapter 21	Construction of Sewers	347
21.1	Materials for Sewers	347
21.1.1	Vitrified Clay Pipe (VCP)	347
21.1.2	Plastic Pipe	347

21.1.3	Fiberglass Polymer Pipe (FRPP).....	347
21.1.4	Concrete Pipe (CP).....	348
21.1.5	Asbestos Cement Pipe (ACP).....	348
21.1.6	Brick Masonry.....	348
21.1.7	Cast-Iron Pipe.....	349
21.1.8	Steel Pipe.....	349
21.1.9	Cast-in-Place Reinforced Concrete	349
21.2	Layout and Installation.....	349
21.2.1	Setting Out	349
21.2.2	Alignment and Gradient.....	350
21.2.3	Excavation of Trenches	350
21.2.4	Bedding	351
21.2.5	Laying.....	352
21.2.6	Lasers	353
21.2.7	Jointing	354
21.3	Testing	356
21.3.1	Water Test.....	356
21.3.2	Air Testing.....	356
21.3.3	Ball Test.....	357
21.3.4	Mirror Test	357
21.3.5	Smoke Test	357
21.3.6	Back Filling.....	357
21.4	Structural Requirements.....	358
21.5	Loading Conditions	358
21.6	Dead Loads.....	358
21.7	Field Supporting Strength	362
21.7.1	Load-Carrying Capacity	362
21.7.2	Load Factor.....	362

SECTION V Wastewater Treatment

Chapter 22	Natural Purification	369
22.1	BOD Reaction.....	369
22.2	Natural Process.....	371
22.2.1	Zone of Degradation	371
22.2.2	Zone of Active Decomposition.....	372
22.2.3	Zone of Recovery	372
22.2.4	Clear Water Zone	372
22.3	Oxygen Sag Curve.....	372
22.4	Dilution into Sea.....	376
22.5	Disposal by Land Treatment	376
22.6	Comparison of Disposal Methods	377

Chapter 23	Characteristics of Wastewater.....	381
23.1	Treatment Facility.....	381
23.2	Domestic Wastewater	382
23.3	Physical Characteristics.....	382
23.4	Chemical Characteristics.....	383
23.4.1	Solids	383
23.4.2	Dissolved Gases.....	384
23.4.3	Alkalinity and pH.....	384
23.4.4	Biochemical Oxygen Demand.....	384
23.4.5	Chemical Oxygen Demand	384
23.4.6	Nutrients	385
23.4.7	Toxins	385
23.5	Biological Characteristics.....	385
23.6	Percentage Removal	387
23.7	Industrial Wastewater	388
23.7.1	Equivalent Population	388
23.7.2	Composite Concentration	389
23.8	Infiltration and Inflow.....	390
23.9	Municipal Wastewater	390
23.9.1	Hydraulic and Organic Loading.....	390
23.9.2	Main Points	391
23.10	Evaluation of Wastewater	391
23.10.1	Automatic Compositing.....	392
23.10.2	Manual Compositing	392
23.10.3	Sample Locations	393
Chapter 24	Primary Treatment	399
24.1	Preliminary Treatment	399
24.1.1	Screens	399
24.1.2	Coarse Screens	400
24.1.3	Fine Screens	400
24.1.4	Mechanically Cleaned Screens	400
24.1.5	Volume of Screenings	400
24.1.6	Disposal of Screenings.....	400
24.1.7	Flow through Screens.....	401
24.2	Comminution of Sewage	401
24.3	Flow Measurement	401
24.3.1	Parshall Flume.....	402
24.3.2	Palmer-Bowlus Flume	402
24.3.3	Weirs.....	402
24.4	Grit-Removal Units.....	402
24.4.1	Settling Velocity	403
24.4.2	Grit Channels	403

24.4.3	Aerated Grit Chamber.....	403
24.4.4	Detritus Tank.....	405
24.4.5	Cyclone Separators.....	405
24.4.6	Grit Disposal	405
24.5	Pre-aeration	405
24.6	Process Calculations.....	406
24.7	Primary Clarification.....	407
24.8	Circular Clarifier	407
24.9	Rectangular Clarifiers	408
24.10	Scum Removal.....	409
24.11	Factors Affecting Settling	409
24.11.1	Temperature.....	410
24.11.2	Short-Circuiting.....	410
24.11.3	Settling Characteristics of Solids	410
24.11.4	Detention Time.....	410
24.11.5	Surface Settling or Overflow Rate	410
24.11.6	Weir Loading.....	411
24.12	Secondary Clarifier	414
24.13	Sludge Handling	415

Chapter 25 Activated Sludge Process 421

25.1	Biological Treatment	421
25.1.1	Suspended Growth Systems	421
25.1.2	Fixed Growth Systems	421
25.2	Principles of the Activated Sludge Process	422
25.2.1	Transfer.....	422
25.2.2	Conversion.....	422
25.2.3	Flocculation.....	422
25.3	Components of ASP	423
25.3.1	Aeration Tanks	423
25.3.2	Final Settling Tanks	424
25.3.3	Sludge Recirculation and Wasting	424
25.4	Factors Affecting ASP.....	425
25.5	Process Loading Parameters	425
25.5.1	Aeration Period.....	425
25.5.2	Volumetric BOD Loading	425
25.5.3	Food to Microorganism (F/M) Ratio	426
25.5.4	Sludge Age	427
25.5.5	Substrate Utilization Rate	429
25.6	Final Clarification.....	430
25.6.1	Hydraulic Loading	430
25.6.2	Solids Loading	430
25.6.3	Sludge Settlement.....	431
25.6.4	Return Rate and SVI.....	432

25.6.5	Return Ratio and Sludge Thickness	432
25.6.6	State Point Analysis.....	433
25.7	Variations of ASP	435
25.7.1	Conventional Aeration.....	435
25.7.2	Contact Stabilization	436
25.7.3	Extended Aeration.....	437
25.7.4	Oxidation Ditch.....	437
25.7.5	High-Rate Aeration	438
25.7.6	High Purity Oxygen System.....	438
25.8	Oxygen Transfer	439
25.8.1	Mass Transfer Equation.....	440
25.8.2	Specific Uptake Rate (SUR).....	440
25.8.3	Oxygen Transfer Efficiency	440
25.9	Operating Problems.....	441
25.9.1	Aeration Tank Appearance	441
25.9.2	Secondary Clarifier Appearance	442
Chapter 26	Stabilization Ponds	447
26.1	Facultative Ponds.....	447
26.2	Loading Parameters.....	448
26.2.1	BOD Removal	449
26.2.2	Winter Storage.....	450
26.3	Algae.....	451
26.4	Berms.....	451
26.5	Daily Monitoring	452
26.5.1	Visual Monitoring	452
26.5.2	Water Color	452
26.5.3	Water Level	452
26.6	Operational Problems	453
26.6.1	Scum Control.....	453
26.6.2	Odor Control	453
26.7	Lagoon Maintenance	454
26.7.1	Lagoon Weeds	454
26.7.2	Berm Erosion.....	454
26.7.3	Mosquitos	454
26.7.4	Daphnia	454
Chapter 27	Attached Growth Systems.....	459
27.1	Trickling Filters.....	459
27.2	Main Components of the Trickling Filter.....	460
27.2.1	Filter Media.....	460
27.2.2	Underdrains	460
27.2.3	Wastewater Distribution	461

27.2.4	Loading on Filters	461
27.2.5	Recirculation	462
27.2.6	Staging.....	463
27.3	BOD Removal Efficiency	463
27.4	Operating Problems	464
27.4.1	Ponding.....	464
27.4.2	Fly Nuisance.....	464
27.4.3	Odor Nuisance.....	465
27.5	Secondary Clarification.....	465
27.6	Rotating Biological Contactors.....	467
27.6.1	Staging.....	468
27.6.2	Operation.....	468
27.7	Process Control Parameters.....	468
27.7.1	Soluble BOD.....	470
27.7.2	Organic Loading	470
27.8	Operation of RBC System	472
Chapter 28	Anaerobic Systems.....	477
28.1	Septic Tanks	477
28.2	Design Considerations	477
28.2.1	Capacity.....	477
28.2.2	Free Board	477
28.2.3	Inlet and Outlet.....	478
28.2.4	Detention time	478
28.2.5	Shape of the Tank.....	478
28.2.6	Disposal of the Tank Effluent.....	480
28.3	Soil Absorption System	480
28.3.1	Percolation Test	480
28.3.2	Absorption Field.....	481
28.4	Soak Pit.....	481
28.5	Biological Filters	481
28.6	Upflow Filters	482
28.7	Upflow Anaerobic Sludge Blanket	484
28.7.1	Zones and Components	485
28.7.2	Design Approach.....	486
Chapter 29	Bio-Solids.....	491
29.1	Primary Sludge	491
29.2	Secondary Sludge	491
29.3	Processing of Sludges	493
29.4	Sludge Thickening	493
29.4.1	Gravity Thickener	494
29.4.2	Concentration Factor	494

29.4.3	Floatation Thickener	494
29.4.4	Gravity Belt Thickener	495
29.4.5	Centrifuge Thickening	495
29.5	Mass Volume Relationship	496
29.6	Sludge Stabilization	498
29.7	Sludge Digestion	498
29.7.1	Anaerobic Sludge Digestion	498
29.7.2	Aerobic Sludge Digestion	499
29.7.3	Anaerobic Digester Capacity	499
29.7.4	Two-Stage Digestion	501
29.7.5	Volatile Solids Reduction in Digestion	502
29.7.6	Gas Composition	503
29.7.7	Digester Solid Mass Balance	503
29.8	Dewatering of Sludges	503
29.8.1	Sludge Drying Beds	504
29.8.2	Mechanical Methods of Dewatering Sludge	505
29.8.3	Sludge Conditioning	507
29.9	Disposal of Sludge	507
29.9.1	Incineration	508
29.9.2	Sanitary Land Fill	508
29.9.3	Disposal in Water or Sea	508
29.9.4	Sludge Composting	509
Chapter 30	Advanced Wastewater Treatment	513
30.1	Suspended Solids Removal	513
30.1.1	Microscreening	514
30.1.2	Ultrafiltration	514
30.1.3	Granular Media Filtration	515
30.2	Control of Nutrients	516
30.3	Phosphorus Removal	516
30.3.1	Biological Phosphorous Removal	516
30.3.2	Chemical Phosphorus Removal	517
30.3.3	Biological–Chemical Phosphate Removal	518
30.4	Nitrogen Removal	518
30.4.1	Biological Nitrification–Denitrification	518
30.4.2	Three-Stage Nitrification–Denitrification	520
30.5	Treatment Methods for the Removal of Toxins	521
30.5.1	Carbon Adsorption	521
30.5.2	Chemical Oxidation	522
30.6	Wastewater Disinfection	522
30.7	Improved Treatment Technologies	522
30.7.1	Sequencing Batch Reactor (SBR)	522
30.7.2	Membrane Bioreactor Process (MRP)	523
30.7.3	Ballasted Floc Reactor (BFR)	523

30.7.4	Biological Aerated Filters (BAFs).....	523
30.7.5	Integrated Fixed-Film Activated Sludge (IFAS).....	523
30.8	Water Recycle and Reuse	523
30.8.1	Water Conservation	524
30.8.2	Reuse of Processed Wastewater	524
30.9	Water Quality and Reuse.....	524
30.9.1	Urban Landscape.....	525
30.9.2	Reclaimed Wastewater	525
30.10	Industrial Wastewater Treatment.....	525
30.11	Industrial Wastewater Discharges	526
30.12	Industrial Wastewater Treatment.....	527
30.12.1	Removal of Chromium.....	527
30.12.2	Removal of Phenol	528
30.12.3	Removal of Mercury	529
30.13	Common Effluent Treatment Plants	529

Appendices.....	533
