## About this Book

13

## I Introduction to Geospatial Technology

15

### 1 Introduction to QGIS & Spatial Data Models

17

1.1	Introduction to Geospatial Data Models . . . . .	17
1.2	Task 1 - Working with the Browser panel . . . . .	19
1.3	Task 2 - Become Familiar with Geospatial Data Models . . . . .	20
1.4	Task 3 - Working with the Data Source Manager . . . . .	24
1.5	Discussion Questions . . . . .	30
1.6	Challenge Assignment . . . . .	30

### 2 Displaying Geospatial Data

33

2.1	Task 1 - Add Data, Organize Map Layers and Set Coordinate Reference System . . . . .	34
2.2	Task 2 - Style Data Layers . . . . .	40
2.3	Task 3 - Compose Map Deliverable . . . . .	47
2.4	Discussion Questions . . . . .	55
2.5	Challenge Assignment . . . . .	55

### 3 Creating Geospatial Data

57

3.1	Task 1 - Create a New Layer . . . . .	58
3.2	Task 2 - Georeferencing an Image . . . . .	59
3.3	Task 3 - Digitizing From Georeferenced Data . . . . .	64
3.4	Task 4 - Editing Existing Geospatial Data . . . . .	68
3.5	Discussion Questions . . . . .	70
3.6	Challenge Assignment . . . . .	70

### 4 Understanding Remote Sensing and Analysis

71

4.1	Task 1 - Display and Inspection of Image Data . . . . .	71
4.2	Task 2 - Performing an Unsupervised Classification . . . . .	76
4.3	Challenge Assignment . . . . .	79

### 5 Basic Geospatial Analysis Techniques

81

5.1	Task 1 - Querying and Extracting Subsets of Data . . . . .	82
5.2	Task 2 - Buffering and Clipping Data . . . . .	88
5.3	Task 3 - Preparing a Map . . . . .	93
5.4	Discussion Questions . . . . .	94
5.5	Challenge Assignment . . . . .	95

<b>II Spatial Analysis</b>	<b>97</b>
<b>1 Introduction to Table Joins and Classification</b>	<b>99</b>
1.1 Task 1 - Data Exploration and Attribute Joins . . . . .	99
1.2 Task 2 - Data Classification . . . . .	103
1.3 Discussion Questions . . . . .	108
1.4 Challenge Assignment . . . . .	108
<b>2 Working with Attributes and Spatial Queries</b>	<b>109</b>
2.1 Task 1 - Selecting Records . . . . .	109
2.2 Task 2 - Calculating Values . . . . .	113
2.3 Task 3 - Using Variables in Field Calculations . . . . .	116
2.4 Task 4 - Calculating Values Challenge . . . . .	118
2.5 Task 5 - Getting Statistics . . . . .	119
2.6 Task 6 - Conditional Formatting of Attribute Tables . . . . .	120
2.7 Task 7 - Buffering and Spatial Queries . . . . .	121
2.8 Discussion Questions . . . . .	125
2.9 Challenge Assignment . . . . .	125
<b>3 Vector Data Analysis - Overlay Techniques</b>	<b>127</b>
3.1 Task 1 - Clip . . . . .	127
3.2 Task 2 - Intersection . . . . .	130
3.3 Task 3 - Union . . . . .	133
3.4 Task 4 - Intersection # 2 . . . . .	134
3.5 Discussion Questions . . . . .	138
3.6 Challenge Assignment . . . . .	138
<b>4 Vector Data Analysis - Creating a Site Selection Model</b>	<b>139</b>
4.1 Task 1 - Exploring the Data . . . . .	139
4.2 Task 2 - Creating the Model - Part 1 . . . . .	141
4.3 Task 3 - Creating the Model - Part 2 . . . . .	147
4.4 Task 4 - Creating the Model - Part 3 . . . . .	152
4.5 Discussion Questions . . . . .	155
4.6 Challenge Assignment . . . . .	155
<b>5 Vector Data Analysis - Network Analysis</b>	<b>157</b>
5.1 Task 1 - Basic Network Analysis . . . . .	157
5.2 Task 2 - Allocating Service Areas . . . . .	160
5.3 Task 3 - Computing Network Isochrones . . . . .	163
5.4 Discussion Questions . . . . .	166
5.5 Challenge Assignment . . . . .	166
<b>6 Raster Data Analysis</b>	<b>167</b>
6.1 Task 1 - Preparing the Data . . . . .	167
6.2 Task 2 - Terrain Analysis . . . . .	175
6.3 Task 3 - Reclassification . . . . .	177
6.4 Task 4 - Using the Raster Calculator . . . . .	182
6.5 Task 5 - Final Analysis Steps with Vector Data . . . . .	184
6.6 Discussion Questions . . . . .	188
6.7 Challenge Assignment . . . . .	188
<b>III Data Acquisition and Management</b>	<b>189</b>
<b>1 Field Data Collection</b>	<b>191</b>
1.1 Task 1 - Creating a Basic QGIS Project . . . . .	192

1.2	Task 2 - Using the QGIS Plugin for Mergin Maps . . . . .	204
1.3	Task 3 - Collecting Field Data with Mergin Maps Input . . . . .	206
1.4	Task 4 - Synching the Data Back to QGIS . . . . .	208
<b>2</b>	<b>Setting Up a Project Database</b>	<b>211</b>
2.1	Task 1 - Investigate and Normalize Project Data . . . . .	211
2.2	Task 2 - Create a New PostGIS Database . . . . .	214
2.3	Task 3 - Populate the New PostGIS Database . . . . .	217
2.4	Discussion Questions . . . . .	222
<b>3</b>	<b>Working with Vector Topology</b>	<b>223</b>
3.1	Task 1 - Topology Rules - Part 1 . . . . .	223
3.2	Task 2 - Topology Rules - Part 2 . . . . .	226
3.3	Task 3 - Fixing Topology Errors . . . . .	227
3.4	Discussion Questions . . . . .	230
3.5	Challenge Assignment . . . . .	230
<b>4</b>	<b>Spatial Data Quality &amp; Metadata</b>	<b>231</b>
4.1	Task 1 - Exploring Data Accuracy by Mapping Delimited Text Coordinates . . . . .	231
4.2	Task 2 - Metadata and Layer Notes . . . . .	233
4.3	Task 3 - Data Aggregation - Dissolving Features . . . . .	237
4.4	Discussion Questions . . . . .	239
4.5	Challenge Assignment . . . . .	239
<b>5</b>	<b>Raster Data Structure</b>	<b>241</b>
5.1	Task 1 - Merging and Clipping Raster Data . . . . .	241
5.2	Task 2 - Raster Pyramids . . . . .	244
5.3	Discussion Questions . . . . .	246
5.4	Challenge Assignment . . . . .	247
<b>6</b>	<b>Geocoding Address Data</b>	<b>249</b>
6.1	Task 1 - Geocoding Using the Nominatim Service . . . . .	249
6.2	Task 2 - Geocoding Using Road Data and the MMQGIS Plugin . . . . .	252
6.3	Task 3 - Building a Map . . . . .	254
6.4	Discussion Questions . . . . .	255
6.5	Challenge Assignment . . . . .	255
<b>IV</b>	<b>Cartographic Design</b>	<b>257</b>
<b>1</b>	<b>Map Composition</b>	<b>259</b>
1.1	Task 1 - Inverted Polygon Shapeburst Fills . . . . .	259
1.2	Task 2 - Composing a Map and Configuring Map Elements . . . . .	262
1.3	Task 3 - Creating Locator Maps . . . . .	273
<b>2</b>	<b>Using the Style Manager &amp; Working with Legend Patch Shapes</b>	<b>277</b>
2.1	Task 1 - Using the Style Manager . . . . .	278
2.2	Task 2 - Importing Legend Patch Shapes . . . . .	281
2.3	Task 3 - Creating Legend Patch Shapes from Features . . . . .	283
<b>3</b>	<b>Automating Print Layouts with Templates and Atlases</b>	<b>289</b>
3.1	Task 1 - Working with Print Templates . . . . .	289
3.2	Task 2 - Creating An Atlas . . . . .	292
<b>4</b>	<b>Working with Labels &amp; Annotation</b>	<b>301</b>
4.1	Task 1 - Automatic Label Placement . . . . .	301

4.2	Task 2 - Labeling Expressions . . . . .	304
4.3	Task 3 - Manually Placing Labels . . . . .	306
4.4	Task 4 - Working with Labels in a Print Layout . . . . .	308
4.5	Task 5 - Working with Annotations . . . . .	311
4.6	Discussion Questions . . . . .	314
<b>5</b>	<b>Creating a Colorful U.S. State Map with Expression-based Symbols</b>	<b>315</b>
5.1	Task 1 - Using the Topological Coloring algorithm . . . . .	316
5.2	Task 2 - Implementing Shapeburst Fills . . . . .	317
5.3	Task 3 - Creating a Random Dot Boundary Using a Marker Line and a Data Defined Override . . . . .	319
5.4	Task 4 - Finishing Touches . . . . .	320
5.5	Challenge Assignment . . . . .	321
<b>V</b>	<b>Advanced Data Visualization</b>	<b>323</b>
<b>1</b>	<b>Using Live Layer Effects</b>	<b>325</b>
1.1	Task 1 - Exploring Live Layer Effects . . . . .	325
1.2	Task 2 - Lifting Features Off of a Busy Background . . . . .	327
1.3	Task 3 - Neon Cartography . . . . .	328
1.4	Task 4 - Symbolizing Bathymetry . . . . .	331
1.5	Task 5 - Applying Layer Effects at the Class Level . . . . .	331
<b>2</b>	<b>Creating Effects with Blending Modes</b>	<b>335</b>
2.1	Task 1 - Opacity Versus Blending Modes . . . . .	336
2.2	Task 2 - Feature Blending Mode . . . . .	338
2.3	Task 3 - Dodge Blending Mode . . . . .	339
2.4	Discussion Questions . . . . .	340
<b>3</b>	<b>The Power of Geometry Generators</b>	<b>343</b>
3.1	Task 1 - Rendering Polygons as Centroids . . . . .	344
3.2	Task 2 - Centroid versus Pole of Inaccessibility . . . . .	346
3.3	Task 3 - Creating Interior Buffers . . . . .	347
3.4	Discussion Questions . . . . .	348
<b>4</b>	<b>Mapping Photopoints</b>	<b>351</b>
4.1	Task 1 - Importing Geotagged Photos . . . . .	351
4.2	Task 2 - Using Form Widgets and Identify Features . . . . .	353
4.3	Task 3 - Creating Wedge Buffers and Using a Raster Image Marker . . . . .	354
<b>5</b>	<b>Rendering Points</b>	<b>359</b>
5.1	Task 1 - Using the Point Cluster Renderer . . . . .	360
5.2	Task 2 - Using the Point Displacement Renderer . . . . .	361
5.3	Task 3 - Generating Heatmaps . . . . .	363
<b>6</b>	<b>Animating Temporal Data with the Temporal Controller</b>	<b>365</b>
6.1	Task 1 - Configuring Temporal Settings . . . . .	365
6.2	Task 2 - Labeling Time and Using Decorations . . . . .	369
6.3	Task 3 - Creating an Animated GIF . . . . .	371
6.4	Challenge Assignment . . . . .	374
<b>7</b>	<b>Working with 3D Views</b>	<b>375</b>
7.1	Task 1 - Working with the 2.5D Renderer . . . . .	375
7.2	Task 2 - Creating an Elevation Profile (QGIS 3.26+) . . . . .	377
7.3	Task 3 - Setting Up a 3D View . . . . .	379
7.4	Task 4 - Adding a 3D View to a Print Layout . . . . .	381

7.5	Task 5 - Creating an Animation . . . . .	382
7.6	Task 6 - Working with 3D Vector Data . . . . .	384
7.7	Challenge Assignment . . . . .	387
<b>8</b>	<b>Working with Mesh Data</b>	<b>389</b>
8.1	Task 1 - Loading Mesh Data . . . . .	390
8.2	Task 2 - Symbolizing Mesh Data . . . . .	391
8.3	Task 3 - Using Crayfish to Plot Mesh Data . . . . .	394
8.4	Task 4 - Animating Mesh Data . . . . .	394
8.5	Challenge Assignment . . . . .	397
<b>9</b>	<b>Working with Point Cloud Data</b>	<b>399</b>
9.1	Task 1 - Loading Point Cloud Data and Rendering in 2D . . . . .	399
9.2	Task 2 - Rendering Point Clouds in 3D . . . . .	406
9.3	Challenge Assignment . . . . .	407
	<b>Conclusion</b>	<b>409</b>
	<b>Appendix</b>	<b>411</b>
A.	Coordinate Reference Systems . . . . .	411
B.	Keyboard Shortcuts . . . . .	416
C.	Popular Plugins . . . . .	420
D.	Getting Involved . . . . .	424
	<b>Index</b>	<b>425</b>
