Preface to the Series v
Preface to the Book vii
Contents xi
Overall Abstract xiii
Individual Chapter Abstract xv
About the Authors xix

1 **Oral History in Mathematics Education: An Overview** 1
Antonio Vicente Marafioti Garnica and Carlos Roberto Vianna
Some Procedures and Justifications 5
Choosing the Interviewees and the Moment of the Interview 6
Transcriptions and Textualizations 7
About the Analysis of the Sources 11
Oral History and Mathematics Education: Motivations and Examples 12
Teacher Education Programs 13
From the Center to the Periphery 13
About the References 18
References 19

2 **Oral History and Mathematics Education: Historiographical Research** 21
Maria Laura Magalhães Gomes
Historical Panorama of the Formation of (Mathematics) Teachers in Brazil 23
Oral History, History, and Historiography of Mathematics Education 24
Mapping the Training and Practice of Mathematics Teachers in Brazil:
What Research has Shown 28
References 32

3 **Oral History and Mathematics Education: The Dialogue with/among Different Theoretical and Philosophical Perspectives** 35
Marcelo Bezerra de Morais and Filipe Santos Fernandes
Introduction 35
Theorizations in Oral History and Mathematics Education 37
First Scenario: The Object/Process Under Investigation Guides
the Choice of Theoretical/Philosophical Perspectives 37
The Second Scenario: Different Theoretical and Philosophical References
are Mobilized in Order to Understand the Object/Process Under Investigation
in a Multiple Sense 40
Final Considerations 43
References 44

4 **Oral History in Mathematics Education: Possibilities for Effective Intervention in Teaching** 47
Heloisa da Silva
Introduction 47
History of Mathematics Education: Place, Affiliation, Identity, and Present Time 49

(Oral) History as an Approach to Teaching and Training of Mathematics Teachers 51
Contributions of Oral History to the Training of Mathematics Teachers 59
References 64

5 History of Mathematics Education and Oral History: Possibilities for the Classroom 67
Vinícius Sanches Tizzo and Antonio Vicente Marafioti Garnica
Introduction 67
History in Mathematics Education and Initial Training: Possibilities for Integration 69
History of Mathematics Teaching: An Introduction 71
Articulating Oral History and Elementary Education: Possibilities for Work with Children 73
Oral History in the Initial Training of Mathematics Teachers 75
Oral History as Support for Problematizing Public Policy in Education and Mathematics Education 76
Oral History Approach in the Discipline "Content, Methodology, and Teaching Practice of Mathematics" in a Pedagogy Course 77
History in Mathematics Education: A Discipline and a Pedagogical-Methodological Contribution for Teaching and Research 79
Oral History: Other Exercises Conducted in Mathematics Teaching Courses 81
Some Considerations 83
References 83

6 Oral History in Mathematics Education: On Non-historiographical Research 85
Maria Ednéia Martins Salandim
Introduction 85
About Oral History in Mathematics Education 87
About Themes and Research Intentions 90
On Oral History *in flux* in Mathematics Education: Some Examples 94
Final Considerations 96
References 97

7 Narratives and Their Power Against Silencing in and by Scientific Research 101
Luzia Aparecida de Souza
On "Inappropriate" Questions for the Narrative 105
Sources, Formation, and Narrative Aesthetics as Possibilities of Ethical Commitment in Academic Work 107
Narratives as Sources 107
Narratives as Possibility for Analysis 110
Form-Content 111
References 112

Combined Reference List 115
