

Table of Contents

Preface.....	ix
1. Introduction to Python.....	1
The Python Language	1
The Python Standard Library and Extension Modules	2
Python Implementations	3
Python Development and Versions	10
Python Resources	11
Installation	15
Installing Python from Binaries	16
Installing Python from Source Code	17
2. The Python Interpreter.....	21
The python Program	21
Python Development Environments	27
Running Python Programs	29
Running Python in the Browser	30
3. The Python Language.....	33
Lexical Structure	33
Data Types	40
Variables and Other References	52
Expressions and Operators	57
Numeric Operations	60
Sequence Operations	63

Set Operations	69
Dictionary Operations	71
Control Flow Statements	73
Functions	93
4. Object-Oriented Python.....	115
Classes and Instances	115
Special Methods	141
Decorators	157
Metaclasses	158
5. Type Annotations.....	171
History	171
Type-Checking Utilities	173
Type Annotation Syntax	174
The typing Module	176
Using Type Annotations at Runtime	191
How to Add Type Annotations to Your Code	192
Summary	194
6. Exceptions.....	195
The try Statement	195
The raise Statement	200
The with Statement and Context Managers	201
Generators and Exceptions	203
Exception Propagation	204
Exception Objects	205
Custom Exception Classes	210
ExceptionGroup and except*	212
Error-Checking Strategies	214
The assert Statement	219
7. Modules and Packages.....	221
Module Objects	222
Module Loading	227
Packages	233
Distribution Utilities (distutils) and setuptools	235
Python Environments	237

8. Core Built-ins and Standard Library Modules.....	247
Built-in Types	247
Built-in Functions	251
The sys Module	259
The copy Module	263
The collections Module	264
The functools Module	269
The heapq Module	271
The argparse Module	274
The itertools Module	275
9. Strings and Things.....	281
Methods of String Objects	281
The string Module	286
String Formatting	287
Text Wrapping and Filling	300
The pprint Module	300
The reprlib Module	301
Unicode	301
10. Regular Expressions.....	305
Regular Expressions and the re Module	305
Optional Flags	311
Match Versus Search	313
Anchoring at String Start and End	313
Regular Expression Objects	314
Match Objects	317
Functions of the re Module	318
REs and the := Operator	319
The Third-Party regex Module	320
11. File and Text Operations.....	321
The io Module	322
The tempfile Module	328
Auxiliary Modules for File I/O	330
In-Memory Files: io.StringIO and io.BytesIO	334
Archived and Compressed Files	335
The os Module	343

The errno Module	357
The pathlib Module	357
The stat Module	362
The filecmp Module	363
The fnmatch Module	365
The glob Module	366
The shutil Module	366
Text Input and Output	368
Richer-Text I/O	371
Internationalization	374
12. Persistence and Databases.....	383
Serialization	384
DBM Modules	396
The Python Database API (DBAPI)	399
13. Time Operations.....	411
The time Module	411
The datetime Module	415
The zoneinfo Module	422
The dateutil Module	424
The sched Module	425
The calendar Module	426
14. Customizing Execution.....	429
Per-Site Customization	429
Termination Functions	430
Dynamic Execution and exec	430
Internal Types	434
Garbage Collection	435
15. Concurrency: Threads and Processes.....	443
Threads in Python	445
The threading Module	446
The queue Module	456
The multiprocessing Module	459
The concurrent.futures Module	468
Threaded Program Architecture	471
Process Environment	475

Running Other Programs	476
The mmap Module	481
16. Numeric Processing.....	485
Floating-Point Values	485
The math and cmath Modules	488
The statistics Module	493
The operator Module	493
Random and Pseudorandom Numbers	496
The fractions Module	498
The decimal Module	500
Array Processing	502
17. Testing, Debugging, and Optimizing.....	513
Testing	514
Debugging	528
The warnings Module	538
Optimization	541
18. Networking Basics.....	563
The Berkeley Socket Interface	564
Transport Layer Security	579
SSLContext	580
19. Client-Side Network Protocol Modules.....	583
Email Protocols	584
HTTP and URL Clients	587
Other Network Protocols	595
20. Serving HTTP.....	597
http.server	598
WSGI	598
Python Web Frameworks	600
21. Email, MIME, and Other Network Encodings.....	611
MIME and Email Format Handling	611
Encoding Binary Data as ASCII Text	619
22. Structured Text: HTML.....	623
The html.entities Module	624

The BeautifulSoup Third-Party Package	624
Generating HTML	636
23. Structured Text: XML.....	643
ElementTree	644
Parsing XML with ElementTree.parse	650
Building an ElementTree from Scratch	652
Parsing XML Iteratively	653
24. Packaging Programs and Extensions.....	655
What We Don't Cover in This Chapter	656
A Brief History of Python Packaging	657
Online Material	658
25. Extending and Embedding Classic Python.....	659
Online Material	660
26. v3.7 to v3.n Migration.....	661
Significant Changes in Python Through 3.11	662
Planning a Python Version Upgrade	664
Summary	668
Appendix. New Features and Changes in Python 3.7 Through 3.11.....	669
Index.....	687
