

Oxford Handbooks offer authoritative and up-to-date reviews of original research in a particular subject area. Specially commissioned chapters from leading figures in the discipline give critical examinations of the progress and direction of debates, as well as a foundation for future research. *Oxford Handbooks* provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities, social sciences, and sciences.

Advance praise for *The Oxford Handbook of Evolutionary Family Psychology*

"This volume is outstanding, cutting-edge science at its best. It provides the deepest and most comprehensive scientific understanding of the psychology of human families ever published. It will serve as the seminal volume for researchers for the next decade, and should be required reading for anyone who has family relationships—that is, almost everyone."

David M. Buss, author of *Evolutionary Psychology: The New Science of the Mind* and *The Handbook of Evolutionary Psychology*

"Salmon and Shackelford's *Oxford Handbook of Evolutionary Family Psychology* is an excellent compilation of articles about human families. The coverage is broad; the chapters are rigorous, yet very readable. I recommend it to senior undergraduates, graduate students and professionals who want insights about how Darwin's Theory of Evolution by Natural Selection can be used in understanding families."

Charles Crawford, Professor Emeritus of Psychology, Simon Fraser University

ISBN 978-0-19-539669-0

9 780195 396690

Part One • Introduction

1. Toward an Evolutionary Psychology of the Family 3
Catherine A. Salmon and Todd K. Shackelford
2. Evolutionary Anthropology of the Human Family 12
Mark V. Flinn
3. The Evolutionary History of Pair-bonding and Parental Collaboration 33
Bernard Chapais
4. The Evolution of Relationships in Nonhuman Families 51
Douglas W. Mock

Part Two • Human Families

5. Parent–Child Relationships 65
Marco Del Giudice and Jay Belsky
6. Parent–Offspring Conflict 83
Catherine A. Salmon and James Malcolm
7. Stepparenting, Divorce, and Investment in Children 97
Kermyt G. Anderson
8. Adoption: Forms, Functions, and Preferences 113
Anthony A. Volk
9. An Evolutionary Perspective on Siblings: Rivals and Resources 128
Thomas V. Pollet and Ashley D. Hoben
10. Trials and Tribulations of Childhood: An Evolutionary Perspective 149
Virginia Periss and David F. Bjorklund
11. Family Violence: How Paternity Uncertainty Raises the Stakes 169
Aaron T. Goetz and Gorge A. Romero
12. Grandparents and Extended Kin 181
Harald A. Euler

Part Three • Animal Families

13. Kin Recognition 211
Peter Hepper
14. Kin Selection and Cooperative Courtship in Birds 230
Alan H. Krakauer and Emily H. DuVal
15. Primate Kin Preferences: Explaining Diversity 248
Carol M. Berman

Part Four • Fictive Families

16. Pet Keeping: A Case Study in Maladaptive Behavior 281
John Archer
17. Pets in the Family: An Evolutionary Perspective 297
James A. Serpell and Elizabeth S. Paul
18. Fictive Kinship and Induced Altruism 310
Hector N. Qirko
19. Passion and Compassion: Psychology of Kin Relations Within
and Beyond the Family 329
Justin H. Park and Joshua M. Ackerman
20. Cooperation and Conflict in the Light of Kin Recognition Systems 345
Daniel Brian Krupp, Lisa M. DeBruine, and Benedict C. Jones

Part Five • Conclusions and Future Directions

21. Reflections on the Human Family 365
David C. Geary, Drew H. Bailey, and Jonathan Oxford
22. Between Conflict and Cooperation: New Horizons in the Evolutionary
Science of the Human Family 386
Gregory Gorelik, Todd K. Shackelford, and Catherine A. Salmon

Index 399
