SECTION 1

Inequalities as process: *doing inequalities* over the life course 1

Magda Nico and Gary Pollock

1 Inequality across time: social change, biography, and the life course 4

Dale Dannefer, Chengming Han, and Jiao Yu

2 Poverty and economic insecurity in the life course 15

Leen Vandecasteele, Dario Spini, Nicolas Sommet, and Felix Bühlmann

3 Inequality as process 27

Elisabetta Ruspini

4 Life course inequality and policy: a focus on child well-being 39

Gary Pollock, Jessica Ozan, and Haridhan Goswami

SECTION 2

Assessing inequalities: complementary methods:
imagining the understanding of inequalities 51

Magda Nico and Gary Pollock

5 Studying social inequality over the life course in modern societies: the methodological importance of life course studies 54

Gwendolin J. Blossfeld and Hans-Peter Blossfeld

6	The analysis of inequality in life trajectories: an integration of two approaches <i>Danilo Bolano and André Berchtold</i>	63
7	Evolution of COVID-19 lethality and geographically contrasting socio-economic factors in Brazil: a multilevel perspective <i>Joseph F. Hair, Jr., Luiz Paulo Fávero, and Rafael De Freitas Souza</i>	81
8	Health inequalities across the life course: theories, statistical pitfalls, and the possible impact of the COVID-19 pandemic <i>Fabian Kratz</i>	97
SECTION 3		
	The social stratification of health: the inherent longitudinality of health inequalities <i>Magda Nico and Gary Pollock</i>	111
9	Mental health inequalities <i>Jane D. McLeod and Max E. Coleman</i>	113
10	How an analysis of lifespan inequality can contribute to our understanding of life course inequalities <i>Alyson van Raalte</i>	124
11	Two centuries of inequalities: disability and partnership in Sweden <i>Lotta Vikström, Kateryna Karhina, and Johan Junkka</i>	136
12	The Covid-19 pandemic: inequalities and the life course <i>Richard A. Settersten, Jr., Laura Bernardi, Juho Härkönen, Toni C. Antonucci, Pearl A. Dykstra, Jutta Heckhausen, Diana Kuh, Karl Ulrich Mayer, Phyllis Moen, Jeylan T. Mortimer, Clara H. Mulder, Timothy M. Smeeding, Tanja Van Der Lippe, Gunhild O. Hagestad, Martin Kohli, René Levy, Ingrid Schoon, and Elizabeth Thomson</i>	152
SECTION 4		
	Economic and wealth inequalities: the challenge of complexity in the analysis of economic inequalities <i>Magda Nico and Gary Pollock</i>	173
13	Concepts of social stratification—static and dynamic perspectives <i>Steffen Hillmert</i>	175

- 14 Optimising the use of measures of social stratification in research with intersectional and longitudinal analytical priorities 188
Paul Lambert and Camilla Barnett
- 15 Stagnation and inequality in a historical view: a comment on Piketty's analysis of capitalism and the Portuguese case 199
Francisco Louçã
- 16 Things can't only get better: inequality and democracy over a life-span 208
Kevin Albertson and Richard Whittle

SECTION 5

**Youth, education and transition to adulthood:
half way down the stairs – somewhere else instead 223**

Magda Nico and Gary Pollock

- 17 Expansion and improved permeability of post-secondary education in Germany: consequences for social inequalities in educational attainment 226
Nicole Tieben and Daniela Rohrbach-Schmidt
- 18 Educational expansion across cohorts and over the life course: an international comparison of (rapid) educational expansion and the consequences of the differentiation of tertiary education 240
Pia N. Blossfeld, Gwendolin J. Blossfeld, and Hans-Peter Blossfeld
- 19 Class in successive life courses in Britain since 1945 252
Ken Roberts
- 20 Mapping young Norwegians' self-projects and future orientations 261
Ingunn Marie Eriksen and Kari Stefansen

SECTION 6

**Family and linked lives: families at the heart of linked
(lives and) inequalities 271**

Magda Nico and Gary Pollock

- 21 Care inequality in later life in ageing societies: the unequal distribution of the intensity of informal support in Europe 274
Marco Albertini and Riccardo Prandini

22	The apple, the tree and the forest: family histories as <i>radars</i> of social mobility and inequalities	285
	<i>Magda Nico and Maria Gilvania Valdivino Silva</i>	

23	Family formation and social inequalities: a life course perspective	300
	<i>Stefano Cantalini</i>	

24	Farewell's children: using the life course perspective to understand female late fertility	312
	<i>Rosalina Pisco Costa</i>	

SECTION 7

Gender inequalities: time varying and trajectories 323

Magda Nico and Gary Pollock

25	The mutual constitution of gendered and sexualised inequalities in life courses	325
----	---	-----

José Fernando Serrano-Amaya

26	Gender trajectories and the production of inequalities from a life course perspective	338
----	---	-----

Sofia Aboim and Pedro Vasconcelos

27	Inequalities in work and the intersectional life course	349
----	---	-----

Phyllis Moen and Mahala Miller

28	LGBTIQ+ life course inequalities and queer temporalities	362
----	--	-----

María do Mar Castro Varela and Yener Bayramoğlu

SECTION 8

Racial and ethnic inequalities: the weight of structure on the skin 371

Magda Nico and Gary Pollock

29	The centrality of race to inequality across the world-system	373
	<i>Manuela Boatcă</i>	

30	A life course approach to understanding ethnic health inequalities in later life: an example using the United Kingdom as national context	383
----	---	-----

Sarah Stopforth, Laia Bécares, James Nazroo, and Dharmi Kapadia

31	The inequalities of empire: comparative perspectives	394
	<i>Cátia Antunes and Miguel Bandeira Jerónimo</i>	
32	How the COVID-19 pandemic is shifting the migrant-inequality narrative	410
	<i>Ferdinand C. Mukumbang</i>	
	<i>Index</i>	423
	1955–2016	
	The evolution of the real average wage in Portugal under the euro (2000–2019)	202
	Share of top 1% individuals/tax unit in (total tax/individual) % of total	211
	Theil's measure of inequality for family income by age of head in several birth cohorts (observation periods 1957–1967, 1967–1977, 1977–1987, 1987–1997, 1997–2007, 2007–2016)	212
	Graphical representation of the yearly state distribution of family income by age, females on the left panel and males on the right one	216
	Graphical representation of the yearly state distribution of working nonmarital trajectories by age, females on the left panel and males on the right one	217
	Graphical representation of the yearly state distribution of health trajectories by age, females on the left panel and males on the right one	218
	Clusters of family situation, working life, and health status by age, women	219
	Clusters of family situation, working life, and health status by age, men	220
	Proportion of people who have supplementary health services per region in Brazil	221
	Gini indexes per state and region in Brazil	222
	Temporal evolution of the accumulated COVID-19 confirmed cases and lethality in Brazil	223
	Temporal evolution of the accumulated COVID-19 lethality by Brazilian state	224
	Histogram of the dependent variable (last available death) before and after the Box-Cox transformation	225
	Random intercept and slope by state	226
	Values predicted through GLS and through multilevel modeling, observed	227
	COVID-19 lethality (RR) across time in the Republic of Korea	228
	Qualitative assumptions about links between different dimensions of social inequality and health	229
	Selective mortality and health trajectories by education level (left) and by age (right) of the final	230
	Conditional profile plots (left) and conditional effect plots (right) of the final educational level on self-rated health	231
	Conditional profile plots of the final educational level on self-rated health by estimation model and level of education	232
	French male ages at death from the 2016 period life table	233
	Marital rates (net I, I_{net}) and population development in Sweden by sex 1800–2015	234
	Regression results of how disability affects the chance/risk to experience partnership or singleness from the 1800s until the 2010s	235
	Marital chances (HR) by type of disability and gender in Sweden – net rates	236
	1900–1950 (the Västergötland region, BOPINK dataset)	237
	Marital chances (HR) plotted by sex and region (HR) from Cox proportional regression model, by type of disability and gender	238
