Author Biography vii

Preface ix

Acknowledgments xiii

1. Extraction of Rare Earths From RE Concentrates

- 1.1 Rare Earth Minerals and Their Classifications 1
- 1.2 The Component Criteria of Main Rare Earth Concentrates in China 6
- 1.3 Summary of the Processes of Extracting Rare Earths From RE Concentrates 8
- 1.4 Extraction of Rare Earths From Monazite Concentrate 13
- 1.5 Extraction of Rare Earths From Bastnaesite Concentrate 27
- 1.6 Extraction of Rare Earths From Mixed Concentrate of Bastnaesite and Monazite-Baotou Rare Earth Concentrate 77
- 1.7 Extraction of Rare Earth Elements from Weathered Crust Elution-Deposited Rare Earth Ores 129
- 1.8 Extraction of Rare Earths From Other Mineral Concentrates Contained Rare Earths 136
- 1.9 Extraction of Scandium 147
- References 179

2. Extractants Used in Solvent Extraction-Separation of Rare Earths: Extraction Mechanism, Properties, and Features

- 2.1 Introduction 187
- 2.2 Di(2-ethylhexyl)phosphoric Acid (HDEHP, D₂EHPA, or P₂₀₄) 189
- 2.3 2-Ethylhexylphosphonic Acid Mono-2-Ethylhexyl Ester (HEH[EHP], P₅₀₇) 232
- 2.4 Naphthenic Acid 277

2.5 The Mixture of Cyanex 272 and P₅₀₇ 293

2.6 Neutral Phosphorous Extractants (TBP, P₃₅₀) 301

2.7 The Extractants of Amine and Quaternary Ammonium Salt 324

2.8 Saponification of Extractant 338

2.9 Functional Ionic Liquids for Environmentally Friendly Rare Earth Separation 364

2.10 Separation of Scandium and Impurities and Its Purification 364

References 384

3. Theory of Countercurrent Extraction

- 3.1 Introduction and Table of Symbols 391
- 3.2 Countercurrent Extraction 396
- 3.3 Fundamental Dependent Equations of Fraction Extraction 401
- 3.4 The Equation of the Minimum Extraction Ratio for Fraction Extraction 410
- 3.5 Equations of Calculating the Number of Stages for the Constant Mixed Extraction Ratio 414
- 3.6 Determination of the Number of Stages by the Method of Log Purity Plot 417
- 3.7 Calculation of the Number of Stages by Equations of Analytic Method 424
- 3.8 Selection of Optimal Extraction Ratio 433
- 3.9 Design of Optimization of Countercurrent Extraction Processes 442
- 3.10 Mathematical Simulation of the Dynamic Equilibrium of Countercurrent Extraction for Single Element 458
- 3.11 Dynamic Processes of Countercurrent Extraction System for Two and Multicomponents 472
- 3.12 Computational Simulation and Application of Reflux Extraction 499
- 3.13 Design and Application of Three-outlet Extraction Process 514
- References 531

4. Process Design of Solvent Extraction-Separation of Rare Earths

- 4.1 Progress of Theory of Countercurrent Extraction and Technology 533
- 4.2 Design of Rare Earth Separation Process 556
- 4.3 Rare Earth Separation Processes 563
- 4.4 Other Issues 580
- References 586

5. Equipment in Rare-Earth Solvent Extraction-Separation Process: Mixer- Settler of Solvent Extraction

- 5.1 Introduction 591
- 5.2 Types of Mixer-Settler Used in Rare Earth Solvent Extraction Process 593
- 5.3 Structure of the Mixer and Stirrer 604
- 5.4 Mixer-Settler Design 613
- 5.5 Methods of Increasing Efficiency of Mixer-Settler 628
- References 630

6. Ion-Exchange and Extraction Chromatography Separation of Rare Earth Elements

- 6.1 Introduction 631
- 6.2 The Basic Theory of Ion Exchange and Extraction Chromatography 633
- 6.3 Separation of Rare Earth Elements by Ion Exchange 642

- 6.4 Separation Rare Earth by Extraction Chromatography 655
- References 668

7. Chemical Separation Method

- 7.1 Introduction 671
- 7.2 Separation of Cerium by Oxidization 671
- 7.3 Enrichment and Purification of Europium 683
- 7.4 Separation of Rare Earth Elements and Nonrare Earth Impurities 697
- 7.5 Precipitation of Rare Earths by Oxalic Acid 701
- 7.6 Precipitation of Rare Earths by Ammonium Bicarbonate 720
- References 739

8. Treatment of Wastewater, Off-Gas, and Waste Solid

- 8.1 Introduction 743
- 8.2 Properties of Wastewater, Waste Solid and Off-Gas Generated in the Processes of Hydrometallurgy of Rare Earths 744
- 8.3 The Treatment of Waste Water, Off-Gas and Waste Solid 755
- 8.4 Method of Elimination of Ammonium Pollution From the Points Generated Wastewater 771
- References 775
