

KEY CONCEPTS
IN HUMAN GEOGRAPHY

SERIES EDITOR: **ROB KITCHIN**

'An excellent and supremely accessible guide to some key issues in development geography.'

Stuart Corbridge, London School of Economics

'Key Concepts in Development Geography provides a clearly stated, informed and strongly structured pathway through the key literatures and debates.'

Jonathan Rigg, Durham University

Key Concepts in Development Geography is a new kind of textbook that forms part of an innovative set of companion texts for the human geography sub-disciplines. Organized around 24 short essays, **Key Concepts in Development Geography** is an introductory text that provides students with the core concepts that form contemporary research and ideas within the development geography discipline. Written in a clear and transparent style, the book includes:

- An introductory chapter providing a succinct overview of the recent developments in the field
- 24 key concept entries that provide comprehensive definitions, explanations and evolutions of the subject
- Excellent pedagogy to enhance students' understanding including a glossary, figures, diagrams, and further reading.

Organized around five of the most important areas of concern, the book covers: the meanings and measurement of development; its theory and practice; work, employment and development; people, culture and development; and contemporary issues in development. The perfect companion for undergraduate and postgraduate students on geography degrees, the book is a timely look at the pressingly important field of international development studies today.

Rob Potter is Professor of Human Geography at the University of Reading.

Dennis Conway is Professor Emeritus in the Department of Geography at Indiana University, Bloomington.

Ruth Evans is Lecturer in Human Geography at the University of Reading.

Sally Lloyd-Evans is Lecturer in Human Geography at the University of Reading.
