

# Contents

## Contributions in: COVID-19, Persistence, Self-Learning, MOOC, First-Year Engineering, PBL, Industrial Practice, Diversity, Equity, and Inclusion, Engineering Design, Engineering Ethics, Accreditation, Double Minority Status, Dropout, Assessment, Adaptability, Learning and Engagement, Academic Performance, Student Success, STEM, School Culture, Mechanical, Electromechanical, Civil, Electric, Computing, Material Engineering

<b>Editorial</b>	1037
<i>Ahmad Ibrahim</i>	
<b>Perception Matters: Student Educational Experiences in COVID-19 are related to Engineering Self-Efficacy and Persistence Intentions</b>	1038–1048
<i>Allison M. Esparza, Karen E. Rambo-Hernandez, Camille S. Burnett and Bimal P. Nepal</i>	
<b>Applying a Software Learning Platform to Implement a Project Based Methodology in Teaching Mechanical Engineering to Undergraduates</b>	1049–1058
<i>Francisca Guerrero-Villar, Rubén Dorado-Vicente, Eloísa Torres-Jiménez and Amalia Palomar-Torres</i>	
<b>Investigating Electromechanical Engineering Lecturers' Perceptions of MOOCs</b>	1059–1073
<i>Enrique Rosales-Asensio, Enrique González, Diego Baragaño and Carlos Sierra</i>	
<b>Implementing a Cornerstone Design Thinking Course in First Year Civil Engineering</b>	1074–1101
<i>Gustavo G. Majzoub, Eduardo Zancul, Roseli de Deus Lopes, Sérgio Scheer, Tatiana Hochgreb-Hägele and Paulo Blikstein</i>	
<b>Enculturating First-Year Engineering Students: A Theoretical Framework</b>	1102–1117
<i>Noemi V. Mendoza Diaz</i>	
<b>Continuing Engineering Education in Changeable and Reconfigurable Manufacturing – Implications of Problem-Based Learning in Industrial Practice</b>	1118–1130
<i>Ann-Louise Andersen and Carin Rösiö</i>	
<b>Instructors' Perspectives of Diversity, Equity, and Inclusion Activities in Engineering and Computer Science Courses</b>	1131–1139
<i>Sumaia Ali Raisa, Christopher D. Griffin, Melissa Morris and Karen E. Rambo-Hernandez</i>	
<b>Student Reflections on the use of a Market Simulator in an Engineering Design Course</b>	1140–1153
<i>Nicole P. Pitterson, Sarah Crimmins, Alejandro Espera Jr. and Steven Hoffenson</i>	
<b>Situation of Engineering Ethics Education of Postgraduates in China: A Preliminary Investigation</b>	1154–1166
<i>Botao Zhong, Xuejiao Xing, Li Jiao, Haitao Wu and Jun Sun</i>	
<b>A Successful Framework for the Accreditation of an Electrical Engineering and Automation Program</b>	1167–1180
<i>Yu Gao, Lei Yu and Liang Chen</i>	
<b>Stereotypes and Stereotype Threats Experienced by Latinx Engineering Undergraduates</b>	1181–1195
<i>Elizabeth Turochy, Linnel Marie S. Ballesteros, Toby Nii Tairo Nelson, Michael Perez, Kyle Estes, Cristina Poleacovschi, Erin Doran and Timothy Yuen</i>	
<b>Predicting Engineering Undergraduates Dropout: A Case Study in Chile</b>	1196–1206
<i>Claudia Martínez-Araneda, Mariella Gutiérrez Valenzuela and Michelle Bizama Varas</i>	
<b>Development and Assessment of a New Approach to Teaching Parallel Databases</b>	1207–1215
<i>Weihong Zhao, Meruert Serik and Saule Zhumagulova</i>	
<b>Application of Cognitive, Behavioral, and Emotional Adaptability Lens for Interpreting the Teaching Experiences of Engineering Instructors during a Switch to Remote Instruction</b>	1216–1233
<i>Grace Panther and Heidi A. Diefes-Dux</i>	
<b>Investigating the Impact of Information Technology-enhanced Constructivist Teaching on Engineering Undergraduates Learning and Engagement</b>	1234–1241
<i>Kui Qian, Di Liu, Hong Lu and Gui Chen</i>	
<b>The Effect of McGraw-Hill Connect Online Assessment on Students' Academic Performance in a Mechanics of Materials Course</b>	1242–1255
<i>Ashraf Badir, Seneshaw Tsegaye and Senthil Girimurugan</i>	

<b>A Systematic Multi-Level Assessment Approach to Enhance Students' Academic Performance in Sequential Logic Design</b>	1256–1267
<i>Awos Kanan, Rajaa Alqudah and Amjed Al-Mousa</i>	
<b>Narrowing Enrollment Gaps for Underrepresented College Students in Engineering: Using Contextualized Admissions Measures to Predict Student Success</b>	1268–1285
<i>Michael N. Bastedo, Mark Umbricht, Emma Bausch, Bo-Kyung Byun, Yiping Bai and Joy Richardson</i>	
<b>Quantitative Investigation of Preparatory Math Coursework as a Barrier for Degree Attainment in Engineering</b>	1286–1296
<i>Eric W. Burkholder</i>	
<b>Impact of College Culture on Enthusiasm and Quality of Life of Students: A Case Study in China</b>	1297–1304
<i>Haijun Zhou, Zimin Lin, Lei Zhang, Qizhong Fang and Ruiyang Chen</i>	
<b>Guide for Authors</b>	1305
