|------------------|------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Preface</b>   |                                                                                                                              | <b>vii</b> |
| <b>Chapter 1</b> | <b>Carbon Nanotubes: A New Alternative for Electrochemical Sensors</b>                                                       | <b>1</b>   |
|                  | <i>Gustavo A. Rivas, María D. Rubianes, María L. Pedano,<br/>Nancy F. Ferreyra, Guillermina Luque and Silvia A. Miscoria</i> |            |
| <b>Chapter 2</b> | <b>Corrosion of Construction Steel in Concrete.<br/>The Influence of the Marine Environment</b>                              | <b>47</b>  |
|                  | <i>Marcela Vázquez, Ángel Vico and Walter Morris</i>                                                                         |            |
| <b>Chapter 3</b> | <b>Corrosion of Silver in Aqueous Chloride Solutions<br/>and Applications to the Corrosion of Ancient Silver Coins</b>       | <b>85</b>  |
|                  | <i>B. Bozzin, and G. Giovannelli</i>                                                                                         |            |
| <b>Chapter 4</b> | <b>Electrochemical Processes in Textile Processing</b>                                                                       | <b>113</b> |
|                  | <i>Bechtold Thomas and Brunner Heiko</i>                                                                                     |            |
| <b>Index</b>     |                                                                                                                              | <b>167</b> |
