Introduction	1
I. GETTING STARTED	
1. Survey of Counterexamples	21
1.1 Formal counterexamples	22
1.2 Informal counterexamples	42
2. Universality	65
2.1 First-order logic	65
2.2 Model-extension	68
2.3 Taxonomy: Particular and Universal sentences	70
2.4 Remarks on the taxonomy	72
2.5 Particular and Universal sets	74
2.6 First barrier theorems	77
2.7 Analysis of counterexamples	78
3. Time	84
3.1 Hume's other law	84
3.2 Tense logic	86
3.3 Prior's other counterexample	89
3.4 Future-switching	90
3.5 Taxonomy: Past and Future sentences	94
3.6 Problems with the taxonomy	96
3.7 First-order tense logic*	99
3.8 Refining the taxonomy*	103
3.9 Beyond fragility*	104
3.10 Refined barriers	110
3.11 Unrefined barriers	114
4. General Barrier Theorems	116
4.1 A more general approach	116
4.2 Variants and corollaries	118
5. Modality	119
5.1 Clarifying the thesis	119
5.2 Modal logic	121
5.3 Two modal barriers	124
5.4 The modal barrier—version A	125
5.5 The modal barrier—version B	130

II. GETTING COMPLEX

6. <i>Can, Should, Will</i>	139
6.1 <i>Ought</i> implies <i>can</i>	139
6.2 <i>Will</i> implies <i>can</i>	141
6.3 Tense-modal logic	142
6.4 Restricted and unrestricted future-switching	146
6.5 The tetralemma	148
7. Context-Sensitivity	151
7.1 Gods, amnesiacs, messy shoppers	152
7.2 Indexical logic	162
7.3 Counterexamples to the indexical barrier	171
7.4 Partial context-shifting	172
7.5 Resolving the tetralemma	174
7.6 An intermediate step: the 2011 solution	176
8. Normativity	180
8.1 The normative and the descriptive	180
8.2 Deontic-alethic modal logic	181
8.3 S-shifting	185
8.4 Taxonomy: non-normative and normative sentences	186
8.5 The limited <i>is/ought</i> barrier	189
8.6 Responses to formal counterexamples	193
9. All the Barriers	196
9.1 QIDMTL	196
9.2 Five relations	200
9.3 Taxonomy	203
9.4 Symmetry, sensitivity, and closure under negation	204
9.5 Limited General Barrier Theorem	206
9.6 Analysis of formal counterexamples	207
9.7 Is there a second interpretation of the <i>is/ought</i> barrier?*	212

III. GETTING INFORMAL

10. Informal Models, Informal Logic	217
10.1 Preliminaries: motivation and inspiration	218
10.2 Preliminaries: <i>formal</i> is said in many ways	223
10.3 Formal models	226
10.4 Informal models and informal logic	232
10.5 More about Combinations	235
10.6 The messiness of the natural	241

11. Informal Barriers	249
11.1 Domain-extension	249
11.2 Other changes	255
11.3 Norm-shifting and Hume's Law	265
11.4 Analysis of informal counterexamples	274
11.5 Returning to the surface	286
<i>ℒ_TEX Symbol List</i>	289
<i>Bibliography</i>	291
<i>Index</i>	297
