

Sekcia I: Aplikovaná biológia / Applied Biology

Gajdošová, P., Gerši, Z., Vešelényiová, D.

5

In silico and *in vitro* analysis of the enzyme β -1,3-glucan synthase in the flagellate *Euglena gracilis*

Gelanová, V., Hutárová, L., Vešelényiová, D.

7

Characterization of cyanobacteria and microscopic algae isolates from cooling towers

Hirková, N., Bocánová, L., Bukovská, G.

9

Potential lytic activity of endolysin EN534-C against pathogenic bacterial strains

Kemenczeiová, J., Achs, A., Alaxin, P., Mrkvová, M.

11

Distribution of bean yellow mosaic virus in selected pea varieties (*Pisum sativum* L.)

Lukačovičová, I., Vešelényiová, D., Gerši, Z.

13

Comparative analysis of mitochondrial calpain gene expression in the flagellate *Euglena gracilis* and its stable white mutants

Mihala, P., Ťrgeová, E.

15

Determination of the antibacterial activity of plant extracts for selected bacteria by the drop-test method

Ondáč, M., Janeček, Š.

17

Pullulanases form the alpha-amylase family GH13 - Sequences, structures and evolution

Sekcia II: Aplikovaná chémia / Applied Chemistry

Ilková, S., Gašparová, M., Tokárová, Z.

21

Optimized synthetic approach towards pentafluorophenylpyrrole and its SE type of reaction with focus on WHA formylations

Lackovičová, L., Kabaňová, N., Tokárová, Z.

23

Ketcham's reaction side-products - Isolation, identification and importance

Pangallo, P., Rajnák, C., Bielková, Z.

25

Amino ligands as the building blocks for complexes based on d-elements

Pilková, M., Nemeček, P.

27

Optimization of HPLC method for quantification of selected polyphenols and phenolic acids with midrange polarity

Sekcia III: Aplikovaná informatika / Applied Informatics

Bohdan, N., Dirgová Luptáková, I.

31

Optimization of selected machine learning method for big data processing

Bučor, A., Ölvecký, M.

33

Testing the user experience and user interface of the mobile version of the website

Mäsiarová, Z., Pribilová, K.

35

Application of path planning algorithms using Lego Mindstorms

Pavko, M., Šimon, M.

37

Dependence of IoT devices on the cloud

Svrčíč, M., Huraj, L.

39

Simulating DDoS attacks in network simulators

Zelenajová, S., Hostovecký, M.

41

Examining the role of data analysis in improving overall equipment effectiveness (OEE) productivity

Sekcia IV: Biotechnológia / Biotechnology

Dronzeková, D., Karas, M., Moravčíková, J.

45

Agrobacterium tumefaciens mediated transformation of oilseed rape

Jurečková, L., Chmelová, D., Ondrejovič, M.

49

Evaluation of selected fermentation factors affecting the growth of the PHA-producer *Cupriavidus necator*
