Preface to the Second Edition	ix
Preface to the First Edition	xi
Acronyms	xiii
1 Introduction	1
1.1 Motivation	1
1.2 Probability Models	2
1.3 Sample Space	3
1.4 Events	6
1.5 Algebra of Events	7
1.6 Graphical Methods of Representing Events	11
1.7 Probability Axioms	13
1.8 Combinatorial Problems	19
1.9 Conditional Probability	23
1.10 Independence of Events	25
1.11 Bayes' Rule	38
1.12 Bernoulli Trials	45
2 Discrete Random Variables	61
2.1 Introduction	61
2.2 Random Variables and Their Event Spaces	62
2.3 The Probability Mass Function	64
2.4 Distribution Functions	66
2.5 Special Discrete Distributions	68
2.6 Analysis of Program MAX	92
2.7 The Probability Generating Function	96
2.8 Discrete Random Vectors	99
2.9 Independent Random Variables	104

3	Continuous Random Variables	115
3.1	Introduction	115
3.2	The Exponential Distribution	119
3.3	The Reliability and Failure Rate	124
3.4	Some Important Distributions	129
3.5	Functions of a Random Variable	148
3.6	Jointly Distributed Random Variables	153
3.7	Order Statistics	157
3.8	Distribution of Sums	167
3.9	Functions of Normal Random Variables	182
4	Expectation	193
4.1	Introduction	193
4.2	Moments	197
4.3	Expectation Based on Multiple Random Variables	200
4.4	Transform Methods	208
4.5	Moments and Transforms of Some Distributions	217
4.6	Computation of Mean Time to Failure	228
4.7	Inequalities and Limit Theorems	237
5	Conditional Distribution and Expectation	247
5.1	Introduction	247
5.2	Mixture Distributions	255
5.3	Conditional Expectation	262
5.4	Imperfect Fault Coverage and Reliability	268
5.5	Random Sums	279
6	Stochastic Processes	289
6.1	Introduction	289
6.2	Classification of Stochastic Processes	294
6.3	The Bernoulli Process	300
6.4	The Poisson Process	304
6.5	Renewal Processes	314
6.6	Availability Analysis	319
6.7	Random Incidence	328
6.8	Renewal Model of Program Behavior	332
7	Discrete-Time Markov Chains	337
7.1	Introduction	337
7.2	Computation of n -step Transition Probabilities	341
7.3	State Classification and Limiting Probabilities	347
7.4	Distribution of Times Between State Changes	356
7.5	Markov Modulated Bernoulli Process	358
7.6	Irreducible Finite Chains with Aperiodic States	361
7.7	* The $M/G/1$ Queuing System	377

7.8 Discrete-Time Birth–Death Processes 385

7.9 Finite Markov Chains with Absorbing States 392

8 Continuous-Time Markov Chains 405

8.1 Introduction 405

8.2 The Birth–Death Process 412

8.3 Other Special Cases of the Birth–Death Model 446

8.4 Non-Birth–Death Processes 454

8.5 Markov Chains with Absorbing States 496

8.6 Solution Techniques 520

8.7 Automated Generation 530

9 Networks of Queues 555

9.1 Introduction 555

9.2 Open Queuing Networks 560

9.3 Closed Queuing Networks 568

9.4 General Service Distribution and Multiple Job Types 596

9.5 Non-product-form Networks 604

9.6 Computing Response Time Distribution 617

9.7 Summary 630

10 Statistical Inference 637

10.1 Introduction 637

10.2 Parameter Estimation 639

10.3 Hypothesis Testing 692

11 Regression and Analysis of Variance 727

11.1 Introduction 727

11.2 Least-squares Curve Fitting 732

11.3 The Coefficients of Determination 735

11.4 Confidence Intervals in Linear Regression 738

11.5 Trend Detection and Slope Estimation 742

11.6 Correlation Analysis 745

11.7 Simple Nonlinear Regression 748

11.8 Higher-dimensional Least-squares Fit 749

11.9 Analysis of Variance 751

A Bibliography 765

A.1 Theory 765

A.2 Applications 770

B Properties of Distributions 777

C Statistical Tables 780

D Laplace Transforms 801

E Program Performance Analysis	808
Author Index	811
Subject Index	819
8.1 Introduction	821
8.2 The Birth-Death Process	825
8.3 Other Special Cases of the Birth-Death Process	835
8.4 Non-Birth-Death Processes	845
8.5 Markov Chains with Absorbing States	855
8.6 Solution Techniques	865
8.7 Automated Generation	875
9.1 Introduction	885
9.2 Open Queueing Systems	895
9.3 Closed Queueing Networks	905
9.4 General Service Disciplines and Multiple Job Types	915
9.5 Non-product-form Networks	925
9.6 Computing Response Time Distributions	935
9.7 Summary	945
10.1 Introduction	955
10.2 Mixture Distributions	965
10.3 Conditional Expectation	975
10.4 Hypothesis Testing	985
10.5 Random Sums	995
11.1 Introduction	1005
11.2 Least-squares Curve Fitting	1015
11.3 The Coefficients of Determination	1025
11.4 Confidence Intervals in Linear Regression	1035
11.5 Fitted Location and Slope Estimation	1045
11.6 Correlation Analysis	1055
11.7 Stepwise Regression	1065
11.8 Higher-dimensional Least-squares Fit	1075
11.9 Analysis of Variance	1085
A.1 Bibliography	1095
A.2 Theory	1105
A.3 Applications	1115
B.1 Properties of Estimation	1125
C.1 Statistical Tables	1135
D.1 Tables of Functions	1145
