

Contents

Introduction

- What's New / 1
- Book Website / 2
- Pedagogical Approach / 3
- Principles > Software / 3
- Symbols and Notation / 3
- Enjoy the Ride / 3
- Plan of the Book / 3

PART I. CONCEPTS, STANDARDS, AND TOOLS

1 • Promise and Problems

- Preparing to Learn SEM / 7
- Definition of SEM / 9
- Basic Data Analyzed in SEM / 9
- Family Matters / 10
- Pedagogy and SEM Families / 14
- Sample Size Requirements / 15
- Big Numbers, Low Quality / 16
- Limits of This Book / 18
- Summary / 18
- Learn More / 18

2 • Background Concepts and Self-Test

- Uneven Background Preparation / 19
- Potential Obstacles to Learning about SEM / 20
- Significance Testing / 23
- Measurement and Psychometrics / 24
- Regression Analysis / 25
- Summary / 26
- Self-Test / 27
- Scoring Criteria / 28

3 • Steps and Reporting

- Basic Steps / 32
- Optional Steps / 38
- Reporting Standards / 39
- Reporting Example / 41
- Summary / 44
- Learn More / 44

4 • Data Preparation

- Forms of the Input Data / 46
- Positive Definiteness / 48
- Missing Data / 49
- Classical (Obsolete) Methods for Incomplete Data / 54
- Modern Methods for Incomplete Data / 55
- Other Data Screening Issues / 56
- Summary / 62
- Learn More / 62
- Exercises / 63

APPENDIX 4.A. Steps of Multiple Imputation

5 • Computer Tools

- Ease of Use, Not Suspension of Judgment / 67
- Human–Computer Interaction / 68
- Tips for SEM Programming / 68
- Commercial versus Free Computer Tools / 70
- R Packages for SEM / 71
- Free SEM Software with Graphical User Interfaces / 73
- Commercial SEM Computer Tools / 73
- SEM Resources for Other Computing Environments / 76
- Summary / 76

19

32

46

64

67

PART II. SPECIFICATION, ESTIMATION, AND TESTING

6 • Nonparametric Causal Models

79

- Graph Vocabulary and Symbolism / 79
- Contracted Chains and Confounding / 80
- Covariate Selection / 81
- Instrumental Variables / 82
- Conditional Independencies and Other Types of Bias / 84
- Principles for Covariate Selection / 88
- d-Separation and Basis Sets / 89
- Graphical Identification Criteria / 92
- Detailed Example / 96
- Summary / 98
- Learn More / 99
- Exercises / 99

7 • Parametric Causal Models

100

- Model Diagram Symbolism / 100
- Diagrams for Contracted Chains and Assumptions / 103
- Confounding in Parametric Models / 105
- Models with Correlated Causes or Indirect Effects / 106
- Recursive, Nonrecursive, and Partially Recursive Models / 109
- Detailed Example / 111
- Summary / 111
- Learn More / 112
- Exercises / 112

APPENDIX 7.A. Advanced Topics in Parametric Models

8 • Local Estimation and Piecewise SEM

117

- Rationale of Local Estimation / 117
- Piecewise SEM / 118
- Detailed Example / 120
- Summary / 130
- Learn More / 130
- Exercises / 130

9 • Global Estimation and Mean Structures

131

- Simultaneous Methods and Error Propagation / 131
- Maximum Likelihood Estimation / 132
- Default ML / 135
- Analyzing Nonnormal Data / 137
- Robust ML / 138
- FIML for Incomplete Data versus Multiple Imputation / 138
- Alternative Estimators for Continuous Outcomes / 140
- Fitting Models to Correlation Matrices / 141
- Healthy Perspective on Estimators and Global Estimation / 142

Detailed Example / 142	
Introduction to Mean Structures / 147	
Précis of Global Estimation / 150	
Summary / 151	
Learn More / 151	
Exercises / 151	
APPENDIX 9.A. Types of Information Matrices and Computer Options	153
APPENDIX 9.B. Casewise ML Methods for Data Missing Not at Random	155
10 • Model Testing and Indexing	156
Model Testing / 156	
Model Chi-Square / 156	
Scaled Chi-Squares and Robust Standard Errors for Nonnormal Distributions / 161	
Model Fit Indexing / 163	
RMSEA / 166	
CFI / 168	
SRMR / 169	
Thresholds for Approximate Fit Indexes / 170	
Recommended Approach to Fit Evaluation / 172	
Global Fit Statistics for the Detailed Example / 173	
Power and Precision / 174	
Summary / 177	
Learn More / 179	
Exercises / 179	
APPENDIX 10.A. Significance Testing Based on the RMSEA	180
11 • Comparing Models	182
Nested Models / 182	
Building and Trimming / 183	
Empirical versus Theoretical Respecification / 184	
Chi-Square Difference Test / 184	
Modification Indexes and Related Statistics / 187	
Intelligent Automated Search Strategies / 188	
Model Building for the Detailed Example / 188	
Comparing Nonnested Models / 190	
Equivalent Models / 194	
Coping with Equivalent or Nearly Equivalent Models / 196	
Summary / 198	
Learn More / 199	
Exercises / 199	
APPENDIX 11.A. Other Types of Model Relations and Tests	200
12 • Comparing Groups	203
Issues in Multiple-Group SEM / 204	
Detailed Example for a Path Model of Achievement and Delinquency / 205	
Tests for Conditional Indirect Effects Over Groups / 211	

Summary / 212

Learn More / 213

Exercises / 213

PART III. MULTIPLE-INDICATOR APPROXIMATION OF CONCEPTS

13 • Multiple-Indicator Measurement

217

Concepts, Indicators, and Proxies / 218

Reflective Measurement and Effect Indicators / 219

Causal-Formative Measurement and Causal Indicators / 220

Composite Measurement and Composite Indicators / 221

Mixed-Model Measurement / 222

Considerations in Selecting a Measurement Model / 223

Cautions on Formative Measurement / 224

Alternative Measurement Models and Approaches / 225

Summary / 227

Learn More / 228

14 • Confirmatory Factor Analysis

229

EFA versus CFA / 229

Suggestions for Selecting Indicators / 231

Basic CFA Models / 232

Other Methods for Scaling Factors / 234

Detailed Example for a Basic CFA Model of Cognitive Abilities / 236

Respecification of CFA Models / 243

Estimation Problems / 246

Equivalent CFA Models / 249

Special Tests with Equality Constraints / 251

Models for Multitrait-Multimethod Data / 252

Second-Order and Bifactor Models with General Factors / 255

Summary / 258

Learn More / 259

Exercises / 259

APPENDIX 14.A. Identification Rules for Correlated Errors or Multiple Loadings

260

15 • Structural Regression Models

263

Full SR Models / 263

Two-Step Modeling / 265

Other Modeling Strategies / 268

Detailed Example of Two-Step Modeling in a High-Risk Sample / 269

Partial SR Models with Single Indicators / 274

Example for a Partial SR Model / 278

Summary / 281

Learn More / 283

Exercises / 283

16 • Composite Models	284
Modern Composite Analysis in SEM / 285	
Disambiguation of Terms / 285	
Special Computer Tools / 288	
Motivating Example / 289	
Alternative Composite Model / 294	
Partial Least Squares Path Modeling Algorithm / 297	
PLS-PM Analysis of the Composite Model / 300	
Henseler–Ogasawara Specification and ML Analysis / 301	
Summary / 304	
Learn More / 305	
Exercises / 305	
PART IV. ADVANCED TECHNIQUES	
17 • Analyses in Small Samples	309
Suggestions for Analyzing Common Factor Models / 309	
Analysis of a Common Factor Model in a Small Sample / 311	
Controlling Measurement Error in Manifest-Variable Path Models / 315	
Adjusted Test Statistics for Small Samples / 316	
Bayesian Methods and Regularized SEM / 317	
Summary / 318	
Learn More / 318	
Exercises / 318	
18 • Categorical Confirmatory Factor Analysis	319
Basic Estimation Options for Categorical Data / 319	
Overview of Continuous/Categorical Variable Methodology / 320	
Latent Response Variables and Thresholds / 321	
Polychoric Correlations / 321	
Measurement Model and Diagram / 323	
Methods to Scale Latent Response Variables / 323	
Estimators, Adjusted Test Statistics, and Robust Standard Errors / 324	
Models with Continuous and Ordinal Indicators / 325	
Detailed Example for Items about Self-Rated Depression / 325	
Other Estimation Options for Categorical CFA / 327	
Item Response Theory and CFA / 329	
Summary / 329	
Learn More / 330	
Exercises / 330	
19 • Nonrecursive Models with Causal Loops	331
Causal Loops / 331	
Assumptions of Causal Loops / 333	

Identification Requirements / 333	
Respecification of Nonrecursive Models That Are Not Identified / 336	
Order Condition and Rank Condition / 337	
Detailed Example for a Nonrecursive Partial SR Model / 338	
Blocked-Error R^2 for Nonrecursive Models / 344	
Summary / 345	
Learn More / 345	
Exercises / 346	
APPENDIX 19.A. Evaluation of the Rank Condition	347
20 • Enhanced Mediation Analysis	349
Mediation Analysis in Cross-Sectional Designs / 350	
Effect Sizes for Indirect Effects / 353	
Cross-Lag Panel Designs for Mediation / 356	
Conditional Process Analysis / 358	
Causal Mediation Analysis Based on Nonparametric Models and Counterfactuals / 360	
Reporting Standards for Mediation Studies / 368	
Summary / 371	
Learn More / 371	
Exercises / 371	
21 • Latent Growth Curve Models	372
Basic Latent Growth Models / 372	
Data Set for Analyzing Basic Growth Models with No Covariates / 374	
Example Analyses of Basic Growth Models / 379	
Example for a Growth Predictor Model with Time-Invariant Covariates / 382	
Practical Suggestions for Latent Growth Modeling / 385	
Extensions of Latent Growth Models / 385	
Summary / 389	
Learn More / 390	
Exercises / 390	
APPENDIX 21.A. Unequal Measurement Intervals and Options for Defining the Intercept	391
22 • Measurement Invariance	393
Levels of Invariance / 395	
Analysis Decisions / 398	
Partial Measurement Invariance / 401	
Detailed Example for a Two-Factor Model of Divergent Thinking / 402	
Practical Suggestions for Measurement Invariance Testing / 408	
Measurement Invariance Testing in Categorical CFA / 409	
Other Statistical Approaches to Estimating Measurement Invariance / 410	
Summary / 412	
Learn More / 412	
Exercises / 413	

23 • Best Practices in SEM

- Resources / 414
- Bottom Lines and Statistical Beauty / 414
- Mightily Distinguish Your Work (Be a Hero) / 415
- Family Relations / 416
- Specification / 417
- Identification / 418
- Measures / 419
- Sample and Data / 419
- Estimation / 420
- Respecification / 422
- Tabulation / 422
- Interpretation / 423
- Summary / 424
- Learn More / 424

About the Author

The companion website (www.guilford.com/kline-materials) supplies data, annotated syntax, and output for the book's examples, in files that can be opened with any basic text editor, as well as primers on significance testing, regression, and psychometrics.
