Part I. Introduction

1	Background	3
1.1	Bayesian Statistical Modeling: The Frequency of Use / 3	
1.2	The Key Impediments within Bayesian Statistics / 6	
1.3	Benefits of Bayesian Statistics within SEM / 9	
1.3.1	A Recap: Why Bayesian SEM? / 12	
1.4	Mastering the SEM Basics: Precursors to Bayesian SEM / 12	
1.4.1	The Fundamentals of SEM Diagrams and Terminology / 13	
1.4.2	LISREL Notation / 17	
1.4.3	Additional Comments about Notation / 19	
1.5	Datasets Used in the Chapter Examples / 20	
1.5.1	Cynicism Data / 21	
1.5.2	Early Childhood Longitudinal Survey–Kindergarten Class / 21	
1.5.3	Holzinger and Swineford (1939) / 21	
1.5.4	IPIP 50: Big Five Questionnaire / 22	
1.5.5	Lakaev Academic Stress Response Scale / 23	
1.5.6	Political Democracy / 23	
1.5.7	Program for International Student Assessment / 24	
1.5.8	Youth Risk Behavior Survey / 25	
2	Basic Elements of Bayesian Statistics	26
2.1	A Brief Introduction to Bayesian Statistics / 26	
2.2	Setting the Stage / 27	
2.3	Comparing Frequentist and Bayesian Estimation / 29	
2.4	The Bayesian Research Circle / 31	
2.5	Bayes' Rule / 32	
2.6	Prior Distributions / 34	
2.6.1	The Normal Prior / 35	
2.6.2	The Uniform Prior / 35	
2.6.3	The Inverse Gamma Prior / 35	
2.6.4	The Gamma Prior / 36	
2.6.5	The Inverse Wishart Prior / 36	
2.6.6	The Wishart Prior / 36	
2.6.7	The Beta Prior / 37	
2.6.8	The Dirichlet Prior / 37	

2.6.9	Different Levels of Informativeness for Prior Distributions / 38
2.6.10	Prior Elicitation / 39
2.6.11	Prior Predictive Checking / 42
2.7	The Likelihood (Frequentist and Bayesian Perspectives) / 43
2.8	The Posterior / 45
2.8.1	An Introduction to Markov Chain Monte Carlo Methods / 45
2.8.2	Sampling Algorithms / 47
2.8.3	Convergence / 52
2.8.4	MCMC Burn-In Phase / 53
2.8.5	The Number of Markov Chains / 53
2.8.6	A Note about Starting Values / 54
2.8.7	Thinning a Chain / 54
2.9	Posterior Inference / 55
2.9.1	Posterior Summary Statistics / 55
2.9.2	Intervals / 56
2.9.3	Effective Sample Size / 56
2.9.4	Trace-Plots / 57
2.9.5	Autocorrelation Plots / 57
2.9.6	Posterior Histogram and Density Plots / 57
2.9.7	HDI Histogram and Density Plots / 57
2.9.8	Model Assessment / 58
2.9.9	Sensitivity Analysis / 58
2.10	A Simple Example / 62
2.11	Chapter Summary / 71
2.11.1	Major Take-Home Points / 71
2.11.2	Notation Referenced / 73
2.11.3	Annotated Bibliography of Select Resources / 75
	Appendix 2.A: Getting Started with R / 76

Part II. Measurement Models and Related Issues

3	The Confirmatory Factor Analysis Model	89
3.1	Introduction to Bayesian CFA / 89	
3.2	The Model and Notation / 91	
3.2.1	Handling Indeterminacies in CFA / 93	
3.3	The Bayesian Form of the CFA Model / 96	
3.3.1	Additional Information about the (Inverse) Wishart Prior / 97	
3.3.2	Alternative Priors for Covariance Matrices / 100	
3.3.3	Alternative Priors for Variances / 100	
3.3.4	Alternative Priors for Factor Loadings / 101	
3.4	Example 1: Basic CFA Model / 101	
3.5	Example 2: Implementing Near-Zero Priors for Cross-Loadings / 120	
3.6	How to Write Up Bayesian CFA Results / 124	
3.6.1	Hypothetical Data Analysis Plan / 125	
3.6.2	Hypothetical Results Section / 125	
3.6.3	Discussion Points Relevant to the Analysis / 127	

- 3.7 Chapter Summary / 128
 - 3.7.1 Major Take-Home Points / 128
 - 3.7.2 Notation Referenced / 131
 - 3.7.3 Annotated Bibliography of Select Resources / 132
 - 3.7.4 Example Code for *Mplus* / 133
 - 3.7.5 Example Code for R / 136

4 Multiple-Group Models 138

- 4.1 A Brief Introduction to Multiple-Group Models / 138
- 4.2 Introduction to the Multiple-Group CFA Model (with Mean Differences) / 139
- 4.3 The Model and Notation / 140
- 4.4 The Bayesian Form of the Multiple-Group CFA Model / 142
- 4.5 Example 1: Using a Mean-Difference, Multiple-Group CFA Model to Assess for School Differences / 144
- 4.6 Introduction to the MIMIC Model / 153
- 4.7 The Model and Notation / 153
- 4.8 The Bayesian Form of the MIMIC Model / 154
- 4.9 Example 2: Using the MIMIC Model to Assess for School Differences / 156
- 4.10 How to Write Up Bayesian Multiple-Group Model Results with Mean Differences / 158
 - 4.10.1 Hypothetical Data Analysis Plan / 158
 - 4.10.2 Hypothetical Results Section / 159
 - 4.10.3 Discussion Points Relevant to the Analysis / 160
- 4.11 Chapter Summary / 161
 - 4.11.1 Major Take-Home Points / 162
 - 4.11.2 Notation Referenced / 163
 - 4.11.3 Annotated Bibliography of Select Resources / 165
 - 4.11.4 Example Code for *Mplus* / 166
 - 4.11.5 Example Code for R / 167

5 Measurement Invariance Testing 169

- 5.1 A Brief Introduction to MI in SEM / 169
 - 5.1.1 Stages of Traditional MI Testing / 170
 - 5.1.2 Challenges within Traditional MI Testing / 172
- 5.2 Bayesian Approximate MI / 173
- 5.3 The Model and Notation / 174
- 5.4 Priors within Bayesian Approximate MI / 176
- 5.5 Example: Illustrating Bayesian Approximate MI for School Differences / 178
 - 5.5.1 Results for the Conventional MI Tests / 181
 - 5.5.2 Results for the Bayesian Approximate MI Tests / 182
 - 5.5.3 Results Comparing Latent Means across Approaches / 184
- 5.6 How to Write Up Bayesian Approximate MI Results / 186
 - 5.6.1 Hypothetical Data Analysis Plan / 187
 - 5.6.2 Hypothetical Analytic Procedure / 188
 - 5.6.3 Hypothetical Results Section / 189

- 5.6.4 Discussion Points Relevant to the Analysis / 190
- 5.7 Chapter Summary / 190
 - 5.7.1 Major Take-Home Points / 190
 - 5.7.2 Notation Referenced / 192
 - 5.7.3 Annotated Bibliography of Select Resources / 193
 - 5.7.4 Example Code for *Mplus* / 194
 - 5.7.5 Example Code for R / 195

Part III. Extending the Structural Model

- 6 The General Structural Equation Model** 199
 - 6.1 Introduction to Bayesian SEM / 199
 - 6.2 The Model and Notation / 201
 - 6.3 The Bayesian Form of SEM / 203
 - 6.4 Example: Revisiting Bollen's (1989) Political Democracy Example / 204
 - 6.4.1 Motivation for This Example / 205
 - 6.4.2 The Current Example / 206
 - 6.5 How to Write Up Bayesian SEM Results / 213
 - 6.5.1 Hypothetical Data Analysis Plan / 213
 - 6.5.2 Hypothetical Results Section / 214
 - 6.5.3 Discussion Points Relevant to the Analysis / 215
 - 6.6 Chapter Summary / 216
 - 6.6.1 Major Take-Home Points / 217
 - 6.6.2 Notation Referenced / 219
 - 6.6.3 Annotated Bibliography of Select Resources / 221
 - 6.6.4 Example Code for *Mplus* / 222
 - 6.6.5 Example Code for R / 223
- Appendix 6.A: Causal Inference and Mediation Analysis / 224
- 7 Multilevel Structural Equation Modeling** 228
 - 7.1 Introduction to MSEM / 228
 - 7.1.1 MSEM Applications / 230
 - 7.1.2 Contextual Effects / 232
 - 7.2 Extending MSEM into the Bayesian Context / 233
 - 7.3 The Model and Notation / 235
 - 7.4 The Bayesian Form of MSEM / 238
 - 7.5 Example 1: A Two-Level CFA with Continuous Items / 243
 - 7.5.1 Implementation of Example 1 / 244
 - 7.5.2 Example 1 Results / 246
 - 7.6 Example 2: A Three-Level CFA with Categorical Items / 247
 - 7.6.1 Implementation of Example 2 / 253
 - 7.6.2 Example 2 Results / 253
 - 7.7 How to Write Up Bayesian MSEM Results / 258
 - 7.7.1 Hypothetical Data Analysis Plan / 258
 - 7.7.2 Hypothetical Results Section / 259
 - 7.7.3 Discussion Points Relevant to the Analysis / 260

- 7.8 Chapter Summary / 261
 - 7.8.1 Major Take-Home Points / 262
 - 7.8.2 Notation Referenced / 264
 - 7.8.3 Annotated Bibliography of Select Resources / 267
 - 7.8.4 Example Code for *Mplus* / 268
 - 7.8.5 Example Code for R / 268

Part IV. Longitudinal and Mixture Models

- 8 The Latent Growth Curve Model** 275
 - 8.1 Introduction to Bayesian LGCM / 275
 - 8.2 The Model and Notation / 276
 - 8.2.1 Extensions of the LGCM / 279
 - 8.3 The Bayesian Form of the LGCM / 280
 - 8.3.1 Alternative Priors for the Factor Variances and Covariances / 281
 - 8.4 Example 1: Bayesian Estimation of the LGCM Using ECLS-K Reading Data / 283
 - 8.5 Example 2: Extending the Example to Include Separation Strategy Priors / 287
 - 8.6 Example 3: Extending the Framework to Assessing MI over Time / 291
 - 8.7 How to Write Up Bayesian LGCM Results / 297
 - 8.7.1 Hypothetical Data Analysis Plan / 297
 - 8.7.2 Hypothetical Results Section / 298
 - 8.7.3 Discussion Points Relevant to the Analysis / 299
 - 8.8 Chapter Summary / 299
 - 8.8.1 Major Take-Home Points / 300
 - 8.8.2 Notation Referenced / 302
 - 8.8.3 Annotated Bibliography of Select Resources / 304
 - 8.8.4 Example Code for *Mplus* / 305
 - 8.8.5 Example Code for R / 305
- 9 The Latent Class Model** 308
 - 9.1 A Brief Introduction to Mixture Models / 308
 - 9.2 Introduction to Bayesian LCA / 309
 - 9.3 The Model and Notation / 310
 - 9.3.1 Introducing the Issue of Class Separation / 312
 - 9.4 The Bayesian Form of the LCA Model / 313
 - 9.4.1 Adding Flexibility to the LCA Model / 314
 - 9.5 Mixture Models, Label Switching, and Possible Solutions / 315
 - 9.5.1 Identifiability Constraints / 319
 - 9.5.2 Relabeling Algorithms / 320
 - 9.5.3 Label Invariant Loss Functions / 321
 - 9.5.4 Final Thoughts on Label Switching / 321
 - 9.6 Example: A Demonstration of Bayesian LCA / 321
 - 9.6.1 Motivation for This Example / 322
 - 9.6.2 The Current Example / 324

9.7	How to Write Up Bayesian LCA Results / 340	
9.7.1	Hypothetical Data Analysis Plan / 340	
9.7.2	Hypothetical Results Section / 341	
9.7.3	Discussion Points Relevant to the Analysis / 343	
9.8	Chapter Summary / 344	
9.8.1	Major Take-Home Points / 344	
9.8.2	Notation Referenced / 346	
9.8.3	Annotated Bibliography of Select Resources / 347	
9.8.4	Example Code for <i>Mplus</i> / 348	
9.8.5	Example Code for R / 352	
10	The Latent Growth Mixture Model	354
10.1	Introduction to Bayesian LGMM / 354	
10.2	The Model and Notation / 356	
10.2.1	Concerns with Class Separation / 359	
10.3	The Bayesian Form of the LGMM / 363	
10.3.1	Alternative Priors for Factor Means / 365	
10.3.2	Alternative Priors for the Measurement Error Covariance Matrix / 365	
10.3.3	Alternative Priors for the Factor Covariance Matrix / 365	
10.3.4	Handling Label Switching in LGMMs / 365	
10.4	Example: Comparing Different Prior Conditions in an LGMM / 366	
10.5	How to Write Up Bayesian LGMM Results / 378	
10.5.1	Hypothetical Data Analysis Plan / 378	
10.5.2	Hypothetical Results Section / 379	
10.5.3	Discussion Points Relevant to the Analysis / 381	
10.6	Chapter Summary / 381	
10.6.1	Major Take-Home Points / 382	
10.6.2	Notation Referenced / 384	
10.6.3	Annotated Bibliography of Select Resources / 386	
10.6.4	Example Code for <i>Mplus</i> / 387	
10.6.5	Example Code for R / 387	

Part V. Special Topics

11	Model Assessment	393
11.1	Model Comparison and Cross-Validation / 395	
11.1.1	Bayes Factors / 395	
11.1.2	The Bayesian Information Criterion / 398	
11.1.3	The Deviance Information Criterion / 400	
11.1.4	The Widely Applicable Information Criterion / 402	
11.1.5	Leave-One-Out Cross-Validation / 403	
11.2	Model Fit / 404	
11.2.1	Posterior Predictive Model Checking / 404	
11.2.2	Missing Data and the PPC Procedure / 409	
11.2.3	Testing Near-Zero Parameters through the PPPP / 410	
11.3	Bayesian Approximate Fit / 411	
11.3.1	Bayesian Root Mean Square Error of Approximation / 412	
11.3.2	Bayesian Tucker-Lewis Index / 413	

11.3.3	Bayesian Normed Fit Index / 414	
11.3.4	Bayesian Comparative Fit Index / 414	
11.3.5	Implementation of These Indices / 415	
11.4	Example 1: Illustrating the PPC and the PPPP for CFA / 416	
11.5	Example 2: Illustrating Bayesian Approximate Fit for CFA / 419	
11.6	How to Write Up Bayesian Approximate Fit Results / 422	
11.6.1	Hypothetical Data Analysis Plan / 422	
11.6.2	Hypothetical Results Section / 423	
11.6.3	Discussion Points Relevant to the Analysis / 425	
11.7	Chapter Summary / 425	
11.7.1	Major Take-Home Points / 425	
11.7.2	Notation Referenced / 427	
11.7.3	Annotated Bibliography of Select Resources / 431	
11.7.4	Example Code for <i>Mplus</i> / 432	
11.7.5	Example Code for R / 432	
12	Important Points to Consider	434
12.1	Implementation and Reporting of Bayesian Results / 434	
12.1.1	Priors Implemented / 435	
12.1.2	Convergence / 435	
12.1.3	Sensitivity Analysis / 435	
12.1.4	How Should We Interpret These Findings? / 436	
12.2	Points to Check Prior to Data Analysis / 436	
12.2.1	Is Your Model Formulated “Correctly”? / 436	
12.2.2	Do You Understand the Priors? / 440	
12.3	Points to Check after Initial Data Analysis, but before Interpretation of Results / 443	
12.3.1	Convergence / 443	
12.3.2	Does Convergence Remain after Doubling the Number of Iterations? / 448	
12.3.3	Is There Ample Information in the Posterior Histogram? / 450	
12.3.4	Is There a Strong Degree of Autocorrelation in the Posterior? / 452	
12.3.5	Does the Posterior Make Substantive Sense? / 455	
12.4	Understanding the Influence of Priors / 456	
12.4.1	Examining the Influence of Priors on Multivariate Parameters (e.g., Covariance Matrices) / 457	
12.4.2	Comparing the Original Prior to Other Diffuse or Subjective Priors / 460	
12.5	Incorporating Model Fit or Model Comparison / 462	
12.6	Interpreting Model Results the “Bayesian Way” / 463	
12.7	How to Write Up Bayesian Results / 464	
12.7.1	(Hypothetical) Results for Bayesian Two-Factor CFA / 465	
12.8	How to Review Bayesian Work / 469	
12.9	Chapter Summary and Looking Forward / 470	
	Glossary	473
	References	482
