1	Unix Operating System	5
2	File System and Peripherals	6
2.1	File and Directory Names	7
2.2	Hidden Files	8
2.3	File Content: Text and Non-Text Files	8
3	Command Interpreter	9
3.1	Bash Command Interpreter	9
3.2	Specifying File/Directory Groups	10
4	Directory Structure	11
4.1	Special Directory Names	11
4.2	Home Directory	11
4.3	Current Directory and Changing the Current Directory (Commands <code>pwd</code> and <code>cd</code> )	11
4.4	Complete/Absolute and Incomplete/Relative Names	12
4.5	Creating and Deleting Directories (Commands <code>mkdir</code> , <code>rmdir</code> )	12
4.6	Deleting the Directory Structure (Command <code>rm</code> )	12
5	Using the Files	13
5.1	File Listing (Command <code>ls</code> )	13
5.2	Text Display of the File Content (Commands <code>cat</code> , <code>more</code> , <code>tail</code> and <code>head</code> )	14
5.3	Binary Display of the File Content (Command <code>od</code> )	15
5.4	Is It a Text or Binary File? (Command <code>file</code> )	16
5.5	Standard Input and Output Re-Directing	17
5.6	Creating and Merging Files	17
5.7	Pipe Creating	18
5.8	Editors	18
5.9	Basic Functions of the <code>joe</code> Editor	19
5.10	Searching for a File (Command <code>file</code> )	20
5.11	Copying the Files (Command <code>cp</code> )	20
5.12	Renaming and Moving Files; Renaming Directories (Command <code>mv</code> )	21
5.13	Deleting Files (Command <code>rm</code> )	21

<b>6</b>	<b>Processing of Text Files</b>	<b>23</b>
6.1	Searching in the Text File. Regular expressions (Command <code>grep</code> ) . . . . .	23
6.2	Replacing a Pattern with a New String (Command <code>sed</code> ) . . . . .	24
6.3	Cutting Parts of Lines (Command <code>cut</code> ) . . . . .	25
6.4	Replacing Characters in a Line (Command <code>tr</code> ) . . . . .	25
6.5	Other Selected Programmes for Text Files Processing (Commands <code>sort</code> , <code>uniq</code> , <code>diff</code> , <code>split</code> , <code>wc</code> , <code>touch</code> ) . . . . .	26
<b>7</b>	<b>Commands Related to Using the Account</b>	<b>27</b>
7.1	Accessing the Account . . . . .	27
7.2	File Transfer . . . . .	27
7.3	Changing the Account User Password (Command <code>passwd</code> ) . . . . .	28
7.4	Account Maintenance . . . . .	28
7.5	File Access Permissions (Command <code>chmod</code> ) . . . . .	29
<b>8</b>	<b>Environment Variables</b>	<b>31</b>
<b>9</b>	<b>Control Structure Commands</b>	<b>34</b>
9.1	Conditional command <code>if</code> . . . . .	34
9.1.1	Supporting commands for evaluation of expressions . . . . .	34
9.2	The command <code>case</code> . . . . .	36
9.3	Loop commands . . . . .	36
<b>10</b>	<b>Programming in Command Interpreter Environment</b>	<b>39</b>
10.1	Solved examples . . . . .	39
10.2	Transfer values from command line to the script (parameters of the script) . . . . .	40
10.3	The command <code>shift</code> - renumbering parameters of the script . . . . .	41
10.4	Loop with a counter . . . . .	42
10.5	Transfer of the value of the script environment variable value to external environment . . . . .	43
