

Introduction .....	6
<b>1. Intermodal passenger transport.....</b>	<b>7</b>
1.1. <i>Integrated transport as main driver for intermodal passenger transport solutions</i> .....	8
1.2. <i>Current status of integrated transport systems – trolleybus role in scheme</i> .....	9
1.2.1. <i>Regional systems (“Verkehrsverbund”)</i> .....	9
1.2.2. <i>Functions and benefits from the contractor’s (public authority) view</i> .....	10
1.2.3. <i>Key quality requirements</i> .....	10
1.2.4. <i>Functions and benefits from the passenger’s view</i> .....	11
1.2.5. <i>Functions and benefits from view of operator</i> .....	11
1.2.6. <i>Trolleybus as core/crucial mode</i> .....	11
1.3. <i>Quality of service as the crucial requirement for PT competitiveness</i> .....	12
1.3.1. <i>Information technology equipment</i> .....	13
1.3.2. <i>Automatic Vehicle Monitoring System (AVMS)</i> .....	13
1.3.3. <i>Travel information tools</i> .....	14
1.3.4. <i>Ticketing system</i> .....	17
1.3.5. <i>Passengers counting tools</i> .....	18
<b>2. Analysis of the trolleybus transport role and potential in the transport system - trolley system as the backbone of public transport, and as part of intermodal passenger transport solutions .....</b>	<b>19</b>
2.1. <i>Development of trolleybus transport mode</i> .....	19
2.2. <i>Trolleybus vehicle development</i> .....	22
2.3. <i>Legislative framework of trolleybus operation</i> .....	26
<b>3. Examples of specific modal interchanges in selected trolleybus networks .....</b>	<b>27</b>
3.1. <i>General principles</i> .....	27
3.1.1. <i>Accessibility of transport services, the impact of intermodality / multimodality on increasing the share of public transport in the modal split, the impact on passenger satisfaction</i> .....	27
3.1.2. <i>Other major benefits - the system’s functionality, capacity, congestion reduction, use of public space, the impact on the quality of public space, increase of personal safety</i> .....	27
3.1.3. <i>The main user groups, intermodality influence on their attitudes</i> .....	28
3.1.4. <i>Costs of trolleybus line construction, operation, involvement of key actors in the process</i> .....	29
3.2. <i>Examples of specific modal interchanges in selected networks</i> .....	31
3.2.1. <i>Trolleybus extension projects in Brno</i> .....	31
3.2.1.1. <i>Brno-Starý Lískovec development project</i> .....	31
3.2.1.2. <i>Brno-Bystrc (ZOO) extension project</i> .....	32
3.2.1.3. <i>Integrated Mobility Centre in Brno</i> .....	35
3.2.2. <i>Intermodality in Szeged</i> .....	37
3.2.2.1. <i>Modal interchange Széchenyi tér</i> .....	37
3.2.2.2. <i>B+R Trolleybus intermodality in Szeged</i> .....	39
3.2.3. <i>Trolleybus projects in Salzburg</i> .....	40
3.2.3.1. <i>Intermodal interface Salzburg/Mülln</i> .....	40
3.2.3.2. <i>Stadtwerke Lehen</i> .....	42
3.2.3.3. <i>Mobility Management</i> .....	42
3.2.4. <i>Plan of intermodal integration node of Gdynia Karwiny</i> .....	43
3.2.5. <i>Hradec Králové Intermodal Transport Hub</i> .....	45
<b>4. Technical aspects of trolleybus as a key mode in intermodal passenger transport solutions .....</b>	<b>51</b>
4.1. <i>Common tram-trolleybus power supply</i> .....	51
4.2. <i>Common tram-trolleybus maintenance</i> .....	54
4.3. <i>Common tram-trolleybus corridors</i> .....	56
4.4. <i>Trolleybus &amp; motorbus synergies</i> .....	58
<b>5. The potential of trolleybus mode in the E-mobility era.....</b>	<b>59</b>
5.1. <i>EU electromobility initiatives and projects</i> .....	59
5.2. <i>Trolleybus in the future</i> .....	60
5.3. <i>Trolleybus potential in the e-mobility concept</i> .....	62
