

## Abstracts of lectures

|                                                                                                    |           |
|----------------------------------------------------------------------------------------------------|-----------|
| <b>Basics of Atomic force microscopy (L. Pařízek)</b>                                              | <b>7</b>  |
| <b>Advanced measuring modes (L. Pařízek)</b>                                                       | <b>8</b>  |
| <b>Sample preparation (J. Příbyl)</b>                                                              | <b>9</b>  |
| <b>AFM data processing (Š. Klimovič)</b>                                                           | <b>10</b> |
| <b>Integration of AFM with other techniques (A. Dulebo)</b>                                        | <b>11</b> |
| <b>AFM probes (A. Dulebo)</b>                                                                      | <b>13</b> |
| <b>SPR, AFM - a study of living cells for the diagnosis of oncological diseases (M. Domšicová)</b> | <b>14</b> |
| <b>Potential of label-free techniques with AFM measurements (D. Hadraba)</b>                       | <b>16</b> |
| <b>My experience with Atomic Force Microscopy (A. Tripepi)</b>                                     | <b>17</b> |
| <b>Enhanced Cell Growth By Thin ALD Coatings On TiO<sub>2</sub> Nanotubes (K. Baishya)</b>         | <b>18</b> |
| <b>Summarization of various AFM data improvement methods and their limitations (D. Kabanov)</b>    | <b>22</b> |
| <b>Presentation of Cellular Imaging Core Facility (M. Ešner)</b>                                   | <b>23</b> |
| <b>Introducing Josef Dadok National NMR Centre (R. Fiala)</b>                                      | <b>24</b> |
| <b>Biomolecular Interactions and Crystallography Core Facility (J. Houser)</b>                     | <b>26</b> |
| <b>Cryo-electron Microscopy and Tomography Core Facility (K. Škubník)</b>                          | <b>28</b> |
| <b>Core Facility Nanobiotechnology (Jan Příbyl)</b>                                                | <b>29</b> |
