Contributing Authors	ix
Foreword by <i>Eugene Braunwald</i>	xi
Foreword by <i>Arnold M. Katz</i>	xiii
From the Introduction to the First Edition by <i>Richard J. Bing</i>	xv
Preface	xvii
Acknowledgments	xix

I. Basic Cardiovascular Physiology

1. Introductory Cardiovascular Concepts	3
2. Control of the Circulation	16
3. Heart Cells and Organelles	42

II. Electrophysiology and Electrocardiogram

4. Channels, Pumps, and Exchangers.	73
5. Pacemakers, Conduction System, and Electrocardiogram	119
<i>Lionel H. Opie and James M. Downey</i>	

III. Calcium and Contraction: Receptors and Signals

6. Excitation-Contraction Coupling and Calcium.	159
<i>Lionel H. Opie and Donald M. Bers</i>	
7. Receptors and Signal Transduction	186
8. Myocardial Contraction and Relaxation	221
<i>Lionel H. Opie and R. John Solaro</i>	
9. Signal Systems: Coordinating Life and Death	247
<i>Lionel H. Opie and Michael M. Sack</i>	

IV. The Heart

10. Oxygen Supply: Coronary Flow	279
<i>Lionel H. Opie and Gerd Heusch</i>	

11. Fuels: Aerobic and Anaerobic Metabolism. 306
Lionel H. Opie and Gary D. Lopaschuk
12. Ventricular Function 355
Lionel H. Opie and Mark G. Perlroth
13. Overload Hypertrophy and Its Molecular Biology 402

V. The Circulation

14. Blood Pressure and Peripheral Circulation. 431
Lionel H. Opie and David J. Paterson
15. Cardiac Output and Exercise 460
Lionel H. Opie and David J. Paterson
16. Heart Failure: Neurohumoral Responses 485

VI. Pathophysiology

17. Lack of Blood Flow: Ischemia and Angina 525
Lionel H. Opie and Gerd Heusch
18. Acute Coronary Syndromes: Cell Death 553
19. Myocardial Reperfusion: Stunning, Hibernation, and
Preconditioning 574
Lionel H. Opie and Gerd Heusch
20. Electricity Out of Control: Arrhythmias 599
- Subject Index. 625
