

# Contents

Curriculum Vitae.....	4
1. Neural Interface technology – the road to miniaturization and minimal invasivity.....	8
2. Electrical stimulation of nerve cells.....	10
3. Wireless power transfer.....	13
4. Red light-driven neural interface technology based on ultrathin plastic devices .....	14
5. Noninvasive neurostimulation using interfering high-frequency electric fields.....	19
6. Conclusions and outlook.....	23
7. References.....	24
