|---------------------------------------------|----|
| INTRODUCTION                                | 11 |
| 1. THE NATURE OF TIME SERIES                | 15 |
| 1.1 DESCRIPTION OF TIME SERIES              | 16 |
| 1.2 WHITE NOISE                             | 17 |
| 1.3 STATIONARITY                            | 17 |
| 1.4 TRANSFORMATIONS OF TIME SERIES          | 19 |
| 1.5 TREND, SEASONAL, AND IRREGULAR PATTERNS | 21 |
| 1.6 ARMA MODELS OF TIME SERIES              | 22 |
| 1.7 STYLIZED FACTS ABOUT TIME SERIES        | 23 |
| 2. DIFFERENCE EQUATIONS                     | 27 |
| 2.1 LINEAR DIFFERENCE EQUATIONS             | 27 |
| 2.2 LAG OPERATOR                            | 28 |
| 2.3 THE SOLUTION OF DIFFERENCE EQUATIONS    | 29 |
| 2.3.1 PARTICULAR SOLUTION AND LAG OPERATORS | 30 |
| 2.3.2 SOLUTION BY ITERATION                 | 31 |
| 2.3.3 HOMOGENOUS SOLUTION                   | 33 |
| 2.3.4 PARTICULAR SOLUTION                   | 34 |
| 2.4 STABILITY CONDITIONS                    | 35 |
| 2.5 STABILITY AND STATIONARITY              | 36 |

|       |                                                                                |     |
|-------|--------------------------------------------------------------------------------|-----|
| 3.    | UNIVARIATE TIME SERIES                                                         | 41  |
| 3.1   | ESTIMATION OF AN ARMA MODEL                                                    | 41  |
| 3.1.1 | AUTOCORRELATION FUNCTION – ACF                                                 | 42  |
| 3.1.2 | PARTIAL AUTOCORRELATION FUNCTION – PACF                                        | 45  |
| 3.1.3 | Q-TESTS                                                                        | 48  |
| 3.1.4 | DIAGNOSTICS OF RESIDUALS                                                       | 50  |
| 3.1.5 | INFORMATION CRITERIA                                                           | 50  |
| 3.1.6 | BOX-JENKINS METHODOLOGY                                                        | 52  |
| 3.2   | TREND IN TIME SERIES                                                           | 54  |
| 3.2.1 | DETERMINISTIC TREND                                                            | 54  |
| 3.2.2 | STOCHASTIC TREND                                                               | 55  |
| 3.2.3 | STOCHASTIC PLUS DETERMINISTIC TREND                                            | 56  |
| 3.2.4 | ADDITIONAL NOTES ON TRENDS IN TIME SERIES                                      | 57  |
| 3.3   | SEASONALITY IN TIME SERIES                                                     | 58  |
| 3.3.1 | REMOVING SEASONAL PATTERNS                                                     | 59  |
| 3.3.2 | ESTIMATING SEASONAL PATTERNS                                                   | 60  |
| 3.3.3 | DETECTING SEASONAL PATTERNS                                                    | 62  |
| 3.3.4 | HODRICK-PRESCOTT FILTER                                                        | 62  |
| 3.4   | UNIT ROOTS                                                                     | 64  |
| 3.4.1 | DICKEY-FULLER TEST                                                             | 66  |
| 3.4.2 | AUGMENTED DICKEY-FULLER TEST                                                   | 68  |
| 3.4.3 | SHORTCOMINGS OF THE DICKEY-FULLER TEST                                         | 71  |
| 3.4.4 | PHILLIPS-PERRON TEST                                                           | 72  |
| 3.4.5 | KPSS TEST                                                                      | 73  |
| 3.5   | UNIT ROOTS AND STRUCTURAL CHANGE                                               | 76  |
| 3.5.1 | PERRON'S TEST                                                                  | 77  |
| 3.5.2 | ZIVOT AND ANDREWS' TEST                                                        | 81  |
| 3.6   | DETECTING A STRUCTURAL CHANGE                                                  | 84  |
| 3.6.1 | SINGLE STRUCTURAL CHANGE                                                       | 85  |
| 3.6.2 | MULTIPLE STRUCTURAL CHANGE                                                     | 91  |
| 3.7   | CONDITIONAL HETEROSKEDASTICITY<br>AND NON-LINEAR STRUCTURE                     | 98  |
| 3.7.1 | CONDITIONAL AND UNCONDITIONAL EXPECTATIONS                                     | 100 |
| 3.7.2 | ARCH MODEL                                                                     | 101 |
| 3.7.3 | GARCH MODEL                                                                    | 104 |
| 3.7.4 | DETECTING CONDITIONAL HETEROSKEDASTICITY                                       | 107 |
| 3.7.5 | THE BDS TEST                                                                   | 110 |
| 3.7.6 | AN ALTERNATIVE TO THE BDS TEST: INTEGRATION<br>ACROSS THE CORRELATION INTEGRAL | 114 |
| 3.7.7 | IDENTIFICATION AND ESTIMATION OF A GARCH MODEL                                 | 118 |
| 3.7.8 | EXTENSIONS OF ARCH -TYPE MODELS                                                | 122 |

|        |                                                                                                                           |     |
|--------|---------------------------------------------------------------------------------------------------------------------------|-----|
| 3.7.9  | MULTIVARIATE (G)ARCH MODELS                                                                                               | 129 |
| 3.7.10 | STRUCTURAL BREAKS IN VOLATILITY                                                                                           | 135 |
| 4.     | MULTIPLE TIME SERIES                                                                                                      | 141 |
| 4.1    | VAR MODELS                                                                                                                | 143 |
| 4.1.1  | STRUCTURAL FORM, REDUCED FORM,<br>AND IDENTIFICATION                                                                      | 144 |
| 4.1.2  | STABILITY AND STATIONARITY OF VAR MODELS                                                                                  | 145 |
| 4.1.3  | ESTIMATION OF A VAR MODEL                                                                                                 | 148 |
| 4.2    | GRANGER CAUSALITY                                                                                                         | 150 |
| 4.3    | COINTEGRATION AND ERROR CORRECTION MODELS                                                                                 | 154 |
| 4.3.1  | DEFINITION OF COINTEGRATION                                                                                               | 157 |
| 4.3.2  | THE ENGLE-GRANGER METHODOLOGY                                                                                             | 162 |
| 4.3.3  | EXTENSIONS TO THE ENGLE-GRANGER METHODOLOGY                                                                               | 168 |
| 4.3.4  | THE JOHANSEN METHODOLOGY                                                                                                  | 170 |
| 5.     | PANEL DATA AND UNIT ROOT TESTS                                                                                            | 177 |
| 5.1    | LEVIN, LIN, AND CHU PANEL UNIT-ROOT TEST WITH<br>A NULL OF UNIT ROOT AND LIMITED COEFFICIENTS<br>HETEROGENEITY VAR MODELS | 178 |
| 5.2    | IM, PESARAN, AND SHIN UNIT-ROOT TEST WITH A NULL<br>OF UNIT ROOT AND HETEROGENEOUS COEFFICIENTS                           | 181 |
| 5.3    | HADRI UNIT-ROOT TESTS WITH A NULL OF STATIONARITY                                                                         | 184 |
| 5.4    | BREUER, MCNOWN, AND WALLACE TEST<br>FOR CONVERGENCE                                                                       | 186 |
| 5.5    | VOGELSANG TEST FOR $\beta$ -CONVERGENCE                                                                                   | 187 |
|        | APPENDIX A: MONTE CARLO SIMULATIONS                                                                                       | 193 |
|        | APPENDIX B: STATISTICAL TABLES                                                                                            | 196 |
|        | REFERENCES                                                                                                                | 202 |
|        | INDEX                                                                                                                     | 216 |
