

CONTENTS

CONTENTS	3
1 THE MAIN OBJECTIVES OF THE THESIS	4
2 THE SCOPE OF CHAPTERS	4
3 THE STATE OF THE ART	5
3.1 Nonadaptive speech enhancement techniques	5
3.1.1 Spectral subtraction	5
3.1.2 Iterative Wiener filtering.....	6
3.1.3 Estimation maximization (E-M) approach.....	7
3.2 Conventional adaptive methods	8
3.2.1 NLMS (Normalized Least Mean Square) method	8
3.2.2 RLS (Recursive Least Squares) method	10
4 ALTERNATIVE STOCHASTIC GRADIENT ALGORITHMS.....	12
4.1 Leaky-LMS	13
4.2 Dead-zone LMS	13
4.3 Signed-error LMS, Signed-data LMS and Signed-signed LMS	14
4.4 Simultaneous perturbation stochastic approximation (SPSA).....	15
4.4.1 The principle of simultaneous perturbation.....	16
4.4.2 The configuration of parameters.....	16
4.4.3 Convergence performance	18
5 OPTIMAL STEP-SIZE (OSS) STRATEGY	19
5.1 mathematical description	19
5.1.1 The idea of the OSS method.....	19
5.1.2 Calculation of the optimal step	21
5.1.3 Tap-weight update.....	22
5.2 Exponential averaging and regularization.....	22
5.3 Experimental analysis	23
6 CONCLUSION	24
REFERENCES	26
CURRICULUM VITAE	28
