<i>Preface</i>	page xi
1 Introduction and Preview	1
1.1 What is a Network?	1
1.2 Why Study Networks?	2
1.3 A Little Bit of History	4
1.4 Building Network Models	8
1.5 Discovering Network Structure	10
1.6 Preliminaries	11
1.7 Further Reading	15
2 Examples of Networks	16
2.1 Introduction	16
2.2 Technological Networks	16
2.3 Information Networks	20
2.4 Financial Networks	25
2.5 Social Networks	32
2.6 Biological Networks	42
2.7 Ecological Networks	49
2.8 Terrorist Networks	51
2.9 Further Reading	53
2.10 Exercises	54
3 Graphs and Networks	56
3.1 Introduction	56
3.2 Definitions	56
3.3 The Adjacency Matrix	61
3.4 The Incidence Matrix	62
3.5 Paths and Connectivity	63
3.6 Two Huge Real-World Networks	65
3.7 Clusters and Hubs	67
3.8 Graph-Searching Algorithms	70
3.9 Minimum Spanning Trees	73
3.10 Further Reading	73
3.11 Exercises	73

4	Random Graph Models	76
4.1	Introduction	76
4.2	Erdős–Rényi Random Graphs	77
4.3	Technical Tools	78
4.4	Graph Properties	87
4.5	Giant Component	95
4.6	Further Reading	103
4.7	Exercises	103
5	Percolation on $\mathbb{Z}^d$	105
5.1	Introduction	105
5.2	Examples of Percolation	106
5.3	Discrete Percolation	112
5.4	Subcritical Phase	116
5.5	Supercritical Phase	120
5.6	Critical Point	120
5.7	Power-Law Conjectures	121
5.8	The Number of Infinite Clusters	128
5.9	Further Reading	134
5.10	Exercises	134
6	Percolation Beyond $\mathbb{Z}^d$	136
6.1	Introduction	136
6.2	Example: Polymer Gelation	136
6.3	Percolation on Trees	138
6.4	Percolation on Transitive Graphs	144
6.5	Continuum Percolation	149
6.6	Further Reading	158
6.7	Exercises	158
7	The Topology of Networks	161
7.1	Introduction	161
7.2	It's a Small World	161
7.3	The Watts–Strogatz Model	164
7.4	Degree Distributions	169
7.5	The Power Law and Scale-Free Networks	171
7.6	Properties of a Scale-Free Network	173
7.7	Further Reading	180
7.8	Exercises	180
8	Models of Network Evolution and Growth	182
8.1	Introduction	182
8.2	The Configuration Model	183
8.3	Expected-Degree Random Graph	199
8.4	Preferential Attachment	201
8.5	Random Copying	212
8.6	Further Reading	215
8.7	Exercises	216

9 Network Sampling	218
9.1 Introduction	218
9.2 Objectives for Network Sampling	220
9.3 Sampling of Nodes	221
9.4 Sampling of Edges	225
9.5 Sampling by Network Exploration	226
9.6 Further Reading	237
9.7 Exercises	238
10 Parametric Network Models	239
10.1 Introduction	239
10.2 Exponential Families	239
10.3 The p_1 Model	241
10.4 The p_2 Model	248
10.5 Markov Random Graphs	254
10.6 Exponential Random Graph Models	257
10.7 Latent Space Models	265
10.8 Further Reading	269
10.9 Exercises	270
11 Graph Partitioning: I. Graph Cuts	272
11.1 Introduction	272
11.2 Binary Cuts	274
11.3 Multiway Cuts	290
11.4 Further Reading	293
11.5 Exercises	293
12 Graph Partitioning: II. Community Detection	294
12.1 Introduction	294
12.2 Equivalence Concepts	295
12.3 Deterministic Blockmodels	297
12.4 Stochastic Blockmodels	300
12.5 Modularity	317
12.6 Optimizing Modularity in Large Networks	332
12.7 Consistency	338
12.8 Sampling for Network Structure	340
12.9 Further Reading	344
12.10 Exercises	344
13 Graph Partitioning: III. Spectral Clustering	346
13.1 Introduction	346
13.2 Graph Laplacians	346
13.3 Spectral Clustering of Networks	350
13.4 Regularized Spectral Clustering	356
13.5 Further Reading	359
13.6 Exercises	359
14 Graph Partitioning: IV. Overlapping Communities	362
14.1 Introduction	362

14.2	Mixed-Membership SBMs	363
14.3	Alternative Algorithms	366
14.4	Latent Cluster Random-Effects Model	371
14.5	Further Reading	372
14.6	Exercises	372
15	Examining Network Properties	374
15.1	Introduction	374
15.2	Similarity Measures for Large Networks	375
15.3	Exchangeable Random Structures	378
15.4	Homomorphisms and Isomorphisms	385
15.5	Property Testing in Networks	388
15.6	Further Reading	391
15.7	Exercises	391
16	Graphons as Limits of Networks	393
16.1	Introduction	393
16.2	Kernels and Graphons	395
16.3	Szemerédi's Regularity Lemma	399
16.4	Sampling of Graphons	401
16.5	Graphon Estimation	403
16.6	Further Reading	409
16.7	Exercises	409
17	Dynamic Networks	411
17.1	Introduction	411
17.2	Networks with a Time Component	412
17.3	Dynamic Community Discovery	415
17.4	Longitudinal Social Networks	420
17.5	Graph Distances for Comparing Networks	422
17.6	Dynamic Biological Networks	425
17.7	Further Reading	438
17.8	Exercises	439
	<i>References</i>	441
	<i>Index of Examples</i>	475
	<i>Subject Index</i>	477
