Preface to the sixth edition vii

Preface to the seventh edition ix

Acknowledgements xi

Part 1: Introducing clinical biochemistry

- | | | |
|--|--|--|
| 1 The clinical biochemistry laboratory 2 | 3 Interpretation of results: general 6 | 5 Interpretation of results: monitoring 10 |
| 2 The use of the laboratory 4 | 4 Interpretation of results: diagnosis 8 | 6 Analytical aspects 12 |

Part 2: Core biochemistry

- | | | |
|---|---|---|
| 7 Fluid and electrolytes: basic concepts 14 | 18 Proteinuria 36 | 29 Jaundice 58 |
| 8 Water and sodium balance: physiological mechanisms 16 | 19 Acute kidney injury 38 | 30 Liver disease 60 |
| 9 Hyponatraemia: pathophysiology 18 | 20 Chronic kidney disease 40 | 31 Glucose metabolism and diabetes mellitus 62 |
| 10 Hyponatraemia: assessment and management 20 | 21 Acid-base: concepts and vocabulary 42 | 32 Diagnosis and monitoring of diabetes mellitus 64 |
| 11 Hypernatraemia 22 | 22 Metabolic acid-base disorders 44 | 33 Diabetic ketoacidosis 66 |
| 12 Hyperkalaemia 24 | 23 Respiratory and mixed acid-base disorders 46 | 34 Hypoglycaemia 68 |
| 13 Hypokalaemia 26 | 24 Acid-base disorders: diagnosis and management 48 | 35 Calcium regulation and hypocalcaemia 70 |
| 14 Intravenous fluid therapy 28 | 25 Proteins and enzymes 50 | 36 Hypercalcaemia 72 |
| 15 Investigation of renal function (1) 30 | 26 Immunoglobulins 52 | 37 Phosphate and magnesium 74 |
| 16 Investigation of renal function (2) 32 | 27 Myocardial infarction 54 | 38 Metabolic bone disease 76 |
| 17 Urinalysis 34 | 28 Liver function tests 56 | 39 Osteoporosis and fragility fractures 78 |

Part 3: Endocrinology

- | | | |
|---------------------------------------|--|---|
| 40 Endocrine control 80 | 45 Hypothyroidism 90 | 49 Hyperfunction of the adrenal cortex 98 |
| 41 Dynamic function tests 82 | 46 Hyperthyroidism 92 | 50 Gonadal function 100 |
| 42 Pituitary function 84 | 47 Adrenocortical pathophysiology 94 | 51 Subfertility 102 |
| 43 Growth disorders and acromegaly 86 | 48 Hypofunction of the adrenal cortex 96 | |
| 44 Thyroid pathophysiology 88 | | |

Part 4: Specialised investigations

- | | | |
|---|---|---|
| 52 Nutritional assessment 104 | 64 Ascites 128 | 76 Fetal monitoring and prenatal diagnosis 152 |
| 53 Nutritional support 106 | 65 Pleural fluid 130 | 77 Pregnancy 154 |
| 54 Parenteral nutrition 108 | 66 Cerebrospinal fluid 132 | 78 Antenatal screening 156 |
| 55 The metabolic response to injury 110 | 67 Identification of body fluids 134 | 79 Screening the newborn for disease 158 |
| 56 Gastrointestinal disorders 112 | 68 Lipoprotein metabolism 136 | 80 Paediatric biochemistry 160 |
| 57 Disorders of the pancreas 114 | 69 Clinical disorders of lipid metabolism 138 | 81 Inborn errors of metabolism 162 |
| 58 Iron 116 | 70 Hypertension 140 | 82 Methods involving antibodies: immunoassay 164 |
| 59 Zinc and copper 118 | 71 Cancer and its consequences 142 | 83 Methods to separate and identify molecules 166 |
| 60 Therapeutic drug monitoring 120 | 72 Tumour markers 144 | 84 Selected inherited disorders 168 |
| 61 Toxicology 122 | 73 Multiple endocrine neoplasia 146 | |
| 62 Metal poisoning 124 | 74 Hyperuricaemia 148 | |
| 63 Alcohol 126 | 75 Myopathy 150 | |

Case history comments 169
