

Contents

1	The Physical Principles of Light Propagation and Light–Matter Interactions	1
	James Norman Monks	
2	Design, Alignment, and Usage of Infinity-Corrected Microscope . . .	17
	Sanjukta Sarkar	
3	Epifluorescence Microscopy	57
	Rezgui Rachid	
4	Basic Digital Image Acquisition, Design, Processing, Analysis, Management, and Presentation	77
	Rocco D’Antuono	
5	Confocal Microscopy	105
	Jeremy Sanderson	
6	Live-Cell Imaging: A Balancing Act Between Speed, Sensitivity, and Resolution	139
	Jeroen Kole, Haysam Ahmed, Nabanita Chatterjee, Gražvydas Lukinavičius, and René Musters	
7	Structured Illumination Microscopy	173
	Nicholas Hall and Ian Dobbie	
8	Stimulated Emission Depletion Microscopy	195
	Silvia Galiani, Jana Koth, Ulrike Schulze, and B. Christoffer Lagerholm	
9	Two-Photon Imaging	215
	Giuseppe Sancataldo, Olga Barrera, and Valeria Vetri	
10	Modern Microscopy Image Analysis: Quantifying Colocalization on a Mobile Device	243
	Vadim Zinchuk and Olga Grossenbacher-Zinchuk	
11	Spinning Disk Microscopy	263
	Kim Freeman	

12	Light-Sheet Fluorescence Microscopy	279
	George O. T. Merces and Emmanuel G. Reynaud	
13	Localization Microscopy: A Review of the Progress in Methods and Applications	299
	Jack W. Shepherd and Mark C. Leake
